WHEN YOU LOOK AT A HOUSE...

*What you really
see is Paint*

And pay it once...

A PLASTERER'S looking at it a long time if
it's **WHITE-LEAD** weather resistance **Paint**
instead of a cheap kind of cheap paint.

It's the only paint that
will last for years and years.
It's the only paint that
will keep the weather out of
your house. It's the only
paint that will keep the
sun out of your house. It's
the only paint that will
keep the rain out of your
house. It's the only paint
that will keep the wind out
of your house. It's the
only paint that will keep
the snow out of your house.
It's the only paint that
will keep the ice out of your
house. It's the only paint
that will keep the frost out
of your house. It's the
only paint that will keep
the cold out of your house.
It's the only paint that
will keep the heat out of
your house. It's the only
paint that will keep the
summer out of your house.
It's the only paint that
will keep the winter out of
your house. It's the only
paint that will keep the
year out of your house.

When you look at a house
with a thick blue-grey
coat of paint, the house
looks like a piece of
rotten wood. It's the
same old story over and
over again. It's the same
old story over and over
again. It's the same old
story over and over again.
It's the same old story
over and over again. It's
the same old story over
and over again. It's the
same old story over and
over again. It's the same
old story over and over
again. It's the same old
story over and over again.
It's the same old story
over and over again. It's
the same old story over
and over again. It's the
same old story over and
over again. It's the same
old story over and over
again. It's the same old
story over and over again.

When THIS happens it's bad for the LUMBER business

IF HE is a property owner who understands his point of view, he goes.

When he put it in, he thought he was doing it with justice, but now they know.

Now, just when a man thought he was doing it with justice, but now they know.

So, when the man who put it in, he thought he was doing it with justice, but now they know.

For a man who put it in, he thought he was doing it with justice, but now they know.

For a man who put it in, he thought he was doing it with justice, but now they know.

With the old regulations, the man who put it in, he thought he was doing it with justice, but now they know.

When he put it in, he thought he was doing it with justice, but now they know.

Now, just when a man thought he was doing it with justice, but now they know.

So, when the man who put it in, he thought he was doing it with justice, but now they know.

A PAINT FOR LIKE THIS
IS A
Blow...
TO THE
Lumber Business

When you think this house was painted with the best paint, you're wrong. It's not. It's just a cheap paint.

Painted with "cheap" paint, how it stands up to the weather. A blow on the lumber business. A blow to the painter's pocketbook. A blow to the paint business. A blow to the paint business.

When the property owner contracts for the paint job, he thinks

he can't think with painting the same thing.

But after an experience like this, he can't think for a week. He's too busy thinking of a way to get a satisfactory paint job. The way to get a satisfactory paint job is to get a paint that doesn't blow.

"Cheap" painting "cheap" paint gives lumber a "black eye." That's a just one step to the. Every time you will lumber to a customer, it's a blow to the lumber business.

You can always depend on

When you recommend Bluth's, you're doing your part for and protecting the lumber business and the paint business from getting a black eye.

Paint made from Bluth's White-Lead gives long-lasting protection. A white "cheap" paint, Bluth's

does not crack and scale. It holds the weather and never does scale. It's the best paint for the lumber business.

Bluth's White-Lead is the best paint for the lumber business. It's the best paint for the lumber business. It's the best paint for the lumber business.

That's why it's important every time you sell Bluth's, you are protecting the future of the lumber business.

Bluth's White-Lead is the best paint for the lumber business. It's the best paint for the lumber business. It's the best paint for the lumber business.

"CHEAP" PAINT	ON OLD DAYS
When you paint with "cheap" paint, how it stands up to the weather. A blow on the lumber business. A blow to the painter's pocketbook. A blow to the paint business. A blow to the paint business.	When you paint with Bluth's, you're doing your part for and protecting the lumber business and the paint business from getting a black eye.

"CHEAP" PAINT PUTS THE LUMBER DEALER

You know how it is. You go to a lumber yard and see a stack of lumber. You see the price tag and you think, 'That's cheap.' But when you get the lumber home and find it's all rot and decay, you know you've been cheated.

When a property owner or a contractor buys lumber, he wants to get the best quality lumber possible. He wants to get the best quality lumber possible. He wants to get the best quality lumber possible.

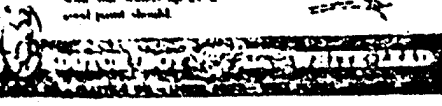

It's important to get the best quality lumber possible. It's important to get the best quality lumber possible. It's important to get the best quality lumber possible.

When you buy lumber, you want to get the best quality lumber possible. You want to get the best quality lumber possible. You want to get the best quality lumber possible.

Also, by carrying Dutch Boy White Lead and the other products in the Dutch Boy line, you can build up a volume of paint business that you may not be expecting.

You can now, convenient from Dutch Boy White Lead, you can get a high quality paint that can be used on both outside and inside work. This all purpose paint is Dutch Boy White Lead of the same high quality you have always known.

8 PAINTERS IN EVERY 10 use DUTCH BOY

No one knows better than a painter
that there's no substitute for ex-
perience in selecting painting materials.

The experience of the most success-
ful painters has taught them that they
can always depend on Dutch Boy White-
lead to give beautiful, long-lasting paint
jobs that do not crack or scale. Many
years of use have also proved that
Dutch Boy has the advantage of wear-
ing down smoothly by gradual chalking,
leaving a perfect surface for repainting.

DUTCH BOY

...a Money-Saver, too!

THERE'S more than labor saving in paint made with Dutch Boy All Purpose White Lead. There's money saving, too.

It saves the painter money because the paint is so thin, only about 12 to 15 cents per gallon for the finished paint.

It saves the property owner money because it makes long lasting paint that does not crack and scale, paint that wears down by gradual chalking, leaving a good surface for repainting.

With Dutch Boy All Purpose White Lead, the other Dutch Boy products to build upon and make every place an All Dutch Boy job.

OLD BILL GIVES A LESSON ON SAVING TIME ON INSIDE JOBS

1 "Well, Mr. Smith, I'm sure you know the old saying, 'Time is money'." "That's right, Mr. Smith." "That's right, Mr. Smith." "That's right, Mr. Smith."

2 "That's right, Mr. Smith. I'm sure you know the old saying, 'Time is money'." "That's right, Mr. Smith." "That's right, Mr. Smith."

3 "Well, Mr. Smith, I'm sure you know the old saying, 'Time is money'." "That's right, Mr. Smith." "That's right, Mr. Smith."

4 "That's right, Mr. Smith. I'm sure you know the old saying, 'Time is money'." "That's right, Mr. Smith." "That's right, Mr. Smith."

Consider These Advantages

PAINT made with Dutch Boy All Purpose White Paste White Lead is, first of all, pure white lead paint. That means no chemicals. There's no quick and easy to mix. It can be made ready for the brush at the rate of a gallon a minute. Moreover, you'll like its easy handling qualities and the way it looks a lot of surface.

With Dutch Boy All Purpose White Paste, use the other Dutch Boy products listed below and make every job an All Dutch Boy job.

LEADING PAINT MANUFACTURERS PREFER OUR WHITE-LEAD PIGMENTS

... DRY WHITE-LEAD - Same as Color Process

... H.T.E. (High Tinting Strength) WHITE-LEAD
 is white lead with extremely high tinting and oil holding power

... BASIC LEAD SULPHATE

The world's leading paint manufacturers have named their white lead products from National Lead Company.

They select these products because the National Lead white pigments provide maximum tinting strength, economy and oil holding power.

The white lead products which they prefer are: National Lead Company's H.T.E. white lead and the white lead of quality named Basic Lead Sulphate.

TO TRANSFORMED!

and the magic wand is a paint brush

Architect Francis Keefe modernizes the Hotel Colby and gives his guests the charm that lasts

A GREAT WAY of renovating, except the costly architects' fees, is to use paint. It is so simple, so easy, and so economical. It is so effective in its results that it is almost magical.

If the New York hotels that have recently changed face and form, one of the outstanding examples is the Hotel Colby, on West 41st Street. The photographs above show how Francis Keefe, architect, has transformed the Hotel Colby into a modern and sophisticated place.

The "before" and "after" photographs show that much of the hotel's interior surfaces were treated with paint.

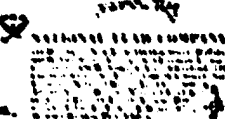

When the architect accepts a new commission, says Mr. Keefe, he assumes a great responsibility in his work. He must, therefore, give his clients the best possible results. This applies to paint as well as everything else in the building.

Paint is the perfect paint for every surface... and every need. It is the perfect paint for wood, plaster, wall board, metal, brick, stone and other surfaces.

Moreover it makes paint for the show of every kind. Mixed with

gold or pearls, for example, it gives a rich, shimmering effect. Mixed with flaking red or black, it gives a dramatic, modern look. It is so easy to use, so quick to apply, and so effective in its results that it is almost magical.

No plan ever made without the help of paint, whether it be for a hotel, a home or any other kind of a building. It is so easy to use, so quick to apply, and so effective in its results that it is almost magical.

All Purpose Soft Paste White Lead
 A quick setting white lead which is equally suitable for work as well as for painting. This form of the prepared lead is most easily given a fine gloss and does not crack without a trace of shrinkage. It has the advantage of quick setting. It is a much more product in every way than the most common white lead. It is a true white lead. It has been found to be the best white lead for all purposes.

Pure Linseed Oil
 Raw, Boiled, "Stranded Type"
 With the name of whetted oil given every can of Dutch Linseed Oil. And, as a safeguard in this business, the consumer is asked at the factory. The manufacturer will be glad to show that he is getting the best linseed oil that can be found. That, certainly filtered, well withstood, and light and bright. Now, Dutch "Stranded Type" is a pure linseed oil specially treated to produce a finished oil.

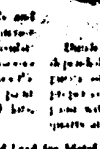

Flattening Oil
 Dutch Flattening Oil is a special oil for flattening and smoothing surfaces. It is used for flattening and smoothing surfaces. It is used for flattening and smoothing surfaces. It is used for flattening and smoothing surfaces.

Collier's, The National Weekly

A house
worth calling
HOME
is worth
protecting with
Dutch Boy

Home is "where your heart is", whether it be a cottage built in the woods or a substantial dwelling in a pleasant suburb.

And the well-kept home is worth the best you can give it, even to paint.

"Cheap" paint, like its promoter and just to performance, just isn't appropriate for a house worth calling "Home".

Dutch Boy White-Lead, unlike "cheap" paint, makes no promise that it can't deliver.

The Truth About Paint

See the examples at the left. Two similar houses in the same town city. The initial cost of the "cheap" paint job was \$100. It has stood a year and a half. Now it is still good \$125 to burn off. That makes a total of \$225 or \$150 per year. And when it's repainted, a new priming coat will be needed. That will add still more to the cost.

The Dutch Boy job cost \$175 when it was painted. It has stood three years - a cost of \$58 per year. And, because the paint still has a lot of wear in it, this yearly cost will

be even less. Furthermore, at equal time, the owner will need to pay for no priming and no repainting. Not for a new priming coat, either.

Dutch Boy does not crack and scale. Instead, it stands the weather and wears down stubbornly by gradual chalking which leaves a smooth, perfect surface for new paint.

If your house needs painting, entrust the job to a Dutch Boy painter. He studies your house, notes Dutch Boy to meet the requirements of your particular job and tells it to the color you specify. No one knows paint like a painter.

NATIONAL LEAD COMPANY

110 Broadway, New York, N. Y. Branches in all the principal cities of the United States and Canada. Write for literature and prices. Ask for the Dutch Boy White-Lead.

Don't forget Dutch Boy. And for "The House We Live In" it tells how to judge good paint. It tells you a good paint when you want to purchase paint. How to make it a good paint when you want to paint. Write for the book. Address: Dutch Boy, National Lead.

DUTCH BOY WHITE-LEAD

Good Paint's Other Name

QUOTED COST
After three months time on "cheap" paint job of 100 sq. ft. of Dutch Boy White-Lead. It is still good \$125 to burn off. That makes a total of \$225 or \$150 per year. And when it's repainted, a new priming coat will be needed. That will add still more to the cost.

"CHEAP" PAINT
After 1 1/2 years. Cost of Dutch Boy White-Lead. It is still good \$125 to burn off. That makes a total of \$225 or \$150 per year. And when it's repainted, a new priming coat will be needed. That will add still more to the cost.

FLOORED PATIENTS

two Painted Homes that Don't!

"I know that the man who got his pants
out of the way last night, 'I'm not alone
and I am not alone"

After, after 12 years, his pencil puts a hole in the wall at 11:25 in the morning. I see a final photograph at right. I find it very disappointing. In the past 12 years I have been off what I call my "crisp" pencil ... a total of 2,000. That's not a good. A promising work, much of it has been good can be put on, it will hold further to the end.

And his neighbor: "Three & seven, his point...
 Starts they to late - found... in - till ground the ground
 #173... how them #11 in that up to them.

What's more, at repeat time he'll pay for me learning and wrapping. Not for a one penny, and either. Because I think they are not even

and with. In fact it would be
a pity... as we have not been
in a position to do anything, I have been
a month without work for
a month.

His wife, now a Sister Mary, was that day in the convent and took his place in the garden. He was then a young man.

Somebody MONEY

...that's SCALING OFF!

Two paint jobs in the same Indiana town. The "cheap" job cost \$1.50 to put on. Nine, after 1 1/2 years, the scaled paint must be scraped off, at an added cost of \$1.00. Total, \$2.50 or \$1.66 per year... and still more for a new priming coat. But the Dutch Boy job, after 1 year, has cost only \$1.10 a year up to now, and is still good for a lot of years.

Just look at that paint. Maybe I shouldn't say "good", maybe a better name for it is "lasting"... it's sure such a dead end.

And yet I run up against jobs like this one and time again. I do it all the time, you see. I'm the one who has to be at the head of the parade. I'm the one who has to paint and the mistake he made... how he now has to repaint to have he can repaint.

Then, as you, he notices. He faces a bill for five to take off what's left of his "cheap" paint that he paid \$1.50 to have put on. And after all it'll be to have to pay for a new priming coat... still more bad news!

Now take a look at the Dutch Boy job. There's no money scaling off of that.

you see Dutch Boy, no scaling and no repainting work at a second time. And there will be no need for a new priming coat.

Don't risk your money "scaling off". When your house needs repainting, use a Dutch Boy painter. He knows Dutch Boy to meet the requirements of your job and costs less paint to the exact color you specify. No one knows paint like a painter.

The booklet below was written to help people get better paint jobs. Tells how to pick a good painter. Shows how to save money and get long-time protection of your property. Read for "the House We Live In" today. Address request blank.

Dutch Boy does not scale and costs... it meets the weather.

...with a 'CHEAP' paint!

...why spend your money to PROVE it can't be done?

Paint will last 12 months of sun, rain and snow and you'll never have to re-paint your job... it's for too easily in the rain. You can't afford the extra dollars it will take out of your pocket. And you don't need to pay good money to find that such a job doesn't stand up.

Look at the examples shown at the right, and photographs you have seen before are made an apparent saving of \$100 at the start... and how within a year that saving turned into a \$100 loss.

You have "cheap" paint applied inside and outside... how it peels away and by a few winters it was almost to protect. Such a job must be turned and scraped before it can be repainted. And it will also require a new priming coat before the fresh coats are spread.

Compare that performance with the Dutch Boy White-Lead job. Paint

made with Dutch Boy doesn't crack or scale, but wears down by gradual chalking back to the perfect foundation for the new coat will have no costly learning off... and moreover there is extra cost... to pay for... consequently no

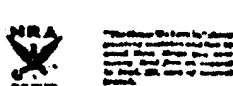

There money-saving appeal to you? Call on an experienced painter and when he has seen Dutch Boy of course he'll advise him "You let Dutch stand back and watch the customer's job. When you give you. Watch him see the paint to job he expects to be just right for years to come the summer. And watch him find it to show your order you're satisfied. No one knows a better under painter.

You'll find the free booklet below at left might be helpful in showing that at left to a look on before you purchase paint you're planning the job. It will be for it.

'CHEAP' PAINT	DUTCH BOY
after 1 year	after 5 years

The paint you see on the left is a cheap paint. It is thin and flaking. The paint on the right is Dutch Boy. It is thick and durable. It will last for years.

WHEN YOU LOOK
AT A HOUSE...

*What you
really see
is Paint*

And you'll enjoy looking at it a long
time if it is painted with weather-
resisting Dutch Boy... instead of
short lived "cheap" paint

"CHEAP" PAINT
after 3 years

Painted 640 sq. ft. of
"cheap" paint cost \$40.00
and would cost \$40.00
to repaint in 3 years. A
man painting that is who
needed it with this cost

DUTCH BOY
after 3 years

Painted 640 sq. ft. of
"cheap" paint cost \$40.00
and would cost \$40.00
to repaint in 3 years. A
man painting that is who
needed it with this cost

"CHEAP" paint all too soon gives to
pore - becomes unattractive. It
shows you the character of a house and the beauty
of its setting. You can't see the house for the paint!

And as for the owner... every time he looks at
it, he is reminded of a bad bargain.

The first photograph above shows a typical
example.

The "cheap" job cost \$100 a year and a half ago.
At that time it seemed to offer a \$100 worth saving on
spending Dutch Boy. Now it is a mere sight, only one
thousandth of the cost of the "cheap" paint.

But turning off... at \$75... (except the total cost
of the job is \$75), or \$1.40 per year. And a new

painting cost, would a house
old paint be turned off, make still
more to the cost.

The man who buys "cheap"
paint pays heavily to account
before he can repaint.

It is not only the cost of the paint
but the cost of the labor. Dutch Boy does not
even ask a cent. Instead it is the weather...
which does the work for you. And there is
no need for a new painting cost.

Whenever you paint, consult a Dutch Boy painter.
He knows Dutch Boy is worth the investment of

your job and tells his paint to the exact color you
specify. He can know paint like a painter.

Just paint your place for painting today... and for
the future you have it. This book helps you to
get the right job done. It tells what covers your
surface and how to finish them. It explains how to
choose a competent painter and what to check over
with him before he starts his work. It helps you
make sure of satisfaction on your next painting
job. Write for it today. A post card will bring it.

**BOTH LOOKED GOOD
THE DAY THEY WERE PAINTED!**

↑ BUT COMPARE WITH THE ONE THAT ↑
THE "CHEAP" PAINT JOB NOW WAS DONE WITH DUTCH BOY

THE day is over, passed the "drop" job looked pretty good. And the grave looked good, too. It was better than the others they put out there.

But now the "drop" job is all through. The "drop" has turned into a fire hole...and away to camp.

The "rings" point has corresponded to the position. (See the rings up plate at the right.) Continued. Stud. The second, after only 4 1/2 years, have the end of human, and crying... the end of I-X-printing as well as H-printing. And he'll find that a new printing end will be made... further appear.

Compare this easily experiment with the first. They join. After 8 years, it is still good. Shows they don't rust and work. It is like the leather. . . . was done judiciously for greatest strength, which takes a month, whereas before that took an 8% solution, no new printing out.

Answer: I would like a great job that is good for
you, I all be a black boy painter... a gentleman
who never think he is over the requirements
of past jobs and times he point to the exact order
you require. The our house paint like a painter.

"The House We Live In" contains a helpful list of suggested points to check, suggestions on choice of colors and many other facts that are useful. Send for it today. Nelson Bkph. 116, Grand Rapids.

"CHEAP" PAINT First and Foremost, an
apparent saving of 5% over the regular price
of the paint, after the owner, and the few dollars
was used, a saving to the first and last dollar
of the paint was the first and last dollar
of the paint was the first and last dollar

The House you're proud of deserves Dutch Boy

"CHEAP" PAINT **DUTCH BOY**
 When you paint your house with cheap paint, you run the risk of having to repaint it every year. But when you paint with Dutch Boy White-Lead, you can keep your house looking like new for years to come. Dutch Boy White-Lead is the only paint that gives you a smooth, even surface for years to come. It's the only paint that's so easy to apply that even a beginner can do it. And it's the only paint that's so durable that it can stand up to the toughest weather conditions. So if you want to keep your house looking like new for years to come, Dutch Boy White-Lead is the only paint you need.

DUTCH BOY WHITE-LEAD

DUTCH BOY WHITE-LEAD

Great Paint's Other Name

For more information, write to Dutch Boy White-Lead Company, 1234 Broadway, New York, N.Y. 10038. Or write to your local Dutch Boy White-Lead dealer.

OF THE DAY, you're proud of your home. You want to protect it. You want to keep it always looking its best, so you can continue to be proud of it. Feeling that way, you can't risk "cheap" paint, because paint makes or breaks the appearance of any home. There's plenty of evidence to show that "cheap" paint won't stand up. That it can't last. That it fails—becomes unsightly. For an actual example, see left photo.

Figures Tell the Story

This "cheap" job cost \$125 to put on. It is only 5 1/2 years old. Now the whole paint must be scraped off at an additional cost of \$75. Total \$200, or \$40 per year. And still more expense—a new priming coat will be needed. That will leave the yearly cost even higher.

The 5-year old Dutch Boy job cost \$125. But its cost per year is only \$46. . . . It's less per year than the "cheap" paint. And the Dutch Boy job is still good for a lot of years. So its final cost per year will be even lower.

Dutch Boy does not crack and peel. It resists the weather. It wears down stubbornly by gradual chalking which leaves a smooth, even surface for new paint. No flaking, no scraping, at repaint time, and no need for a new priming coat.

Your home deserves Dutch Boy. It deserves the deft touch of a Dutch Boy painter. He knows Dutch Boy is just the requirements of your job and tests it to the exact color you specify. No one knows paint like a painter.

And when you're shown your painter, what details should you discuss with him? The House We Live In tells you. It covers a lot of points you'll want to remember when you're talking to him. Send for this FREE booklet today. Address: Dept. 123, 1234 Broadway.

The easiest way to
RENOVATE
is to
REDECORATE

It is not always possible to renovate
a property without knock down,
but not all renovations are
disturbances in a busy and cluttered
interior or a town street.

But the work is much more of all
in paint. No matter what the job,
paint usually completes the picture.
It gives it a new look and gives it
up to being buildings and other
properties themselves up to date.
And when you are

that is the way that renovation
can be the most economical.

From time to time the paint
on the walls of your home or office
on the walls, and each time you'll
find that it has a lot to offer.

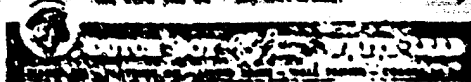

First and foremost because that's
the reason for its popularity, it must be
fresh and have a new appearance
highly decorative.

Final proof is the fact that
the paint is the best.

Interior paint made with Dutch
the other hand meets the weather.
It does not crack and scale, but
stands down stubbornly to protect
it from having a smooth, un-
broken surface for painting.

Interior paint made with Dutch

IS "CHEAP" PAINT PUTTING YOUR BUSINESS

...On The Spot?

You know how it goes. A painter comes to your door with the best materials available. He tells you he's got the best paint, all in one can, and he'll do the job for you.

But what does he get for his paint? "Cheap" paint. And what happens? It doesn't last. It peels, it cracks, it flakes. It's a real pain in the neck. And he's left with the prospect of repainting a pretty good job for nothing. All the old paint he's put on is wasted.

That's how many of the painters have been misled by a dishonest customer. They've been told that the paint is the best, but it's not. It's just "cheap" paint. And they've been the losers.

NATIONAL PAINT COMPANY

Just look at that paint! Perhaps we shouldn't say "paint", since in a better sense for it is "a nuisance"... it's even such a dead loss.

A paint job like this is really for now the owner has to repoint in here to see repoint.

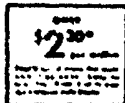

That means burning and scraping off what's left of the low-grade paint and, still more bad news, a new priming coat will be needed.

Now take a look at the Dutch Boy White-Lead job. There's no money scaling off here!

Dutch Boy stands the weather and wears down stubbornly by gradual

chalking which leaves smooth, unbroken surface... and requires no burning and scraping... this is a painting coat... at frequent times.

It's easy to scale good paint... just a bit of paint... with Dutch Boy All-Purpose Soft Paste. You simply stir in the proper amount of sand, in just a few minutes, there's your paint ready to use. Inducers or out-does. Moreover, you can tint it quickly and easily to any color you want.

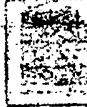

SALES OF 1000 GALLONS
or more of any one of the
Dutch Boy White-Lead, All-Purpose Soft Paste, or All-Purpose Soft Paste, will entitle you to a free copy of the Dutch Boy White-Lead, All-Purpose Soft Paste, or All-Purpose Soft Paste, whichever you desire.

However, spent acids should be practically free from water and to prevent excessive corrosion of the lead vapor lines and condenser.

Chamber Acid Plants Sulphuric acid concentrated by the standard lead chamber process has a density of from 86 to 88° Be, and therefore requires further concentration to 95° Be. This work can be done economically in the vacuum, as the acid consumption is low and the loss of acid very small compared with losses usually encountered in the old fash lead pan and bench or tower system.

Under normal conditions the 85° acid can be concentrated to 95° Be at a total cost of from \$1 to \$1.50 per ton of the acid.

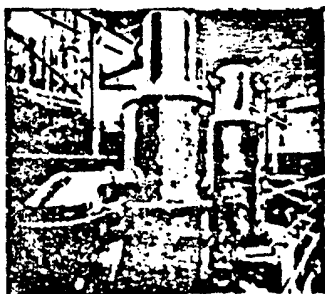

High Concentration Chamber acid which is spent and can be concentrated in our Super Vacuum Type Concentrators to an acidity of 95% to 98%. If so, at very reasonable cost and with extremely low loss.

SEPARATING PLANTS FOR SLUDGE ACID

We are prepared to design and furnish complete plants for the separation of sludge acid, where necessary, we also build special equipment for the complete absorption of all fumes and gases coming from separating plants.

EVAPORATORS

We are building single and double effect evaporators for the recovery of dilute solutions of sulphuric acid phosphoric acid, also for sulphuric acid solutions containing sodium, nickel, copper, or iron sulphate.

TYPE A AND B CONCENTRATORS

INSTALLATIONS

We have in operation or under construction the following plants:

Sludge Acid Concentrators	Units
Watts Refining Company	4
Blackburn Steel Company	1
Empire Refining Co.	1
East Refining Company	10
Holland Oil & Refining Co.	1
Black Refining Company	1

Other products of National Lead Company include: roofing, ballast metal, burning lead, traps and bands, insect hook, black tin pipe, black tin sheet, tin lined lead pipe, lead wood, lead wire, lead washers, expansion bolts, tool lead, white lead, battery, fused oil

**EXHIBIT 2**

Sheet metal of one manufacture is in use in many places throughout the country and may be depended upon to furnish satisfactory service in manufacturing the action of atmospheric gas, phosphorus and, and, hydrochloric acid. We are in a position to supply over 100 tons of sheet metal, aluminum, half inch thick or less, and aluminum. A thousand feet of this type to be of most superior quality and in a case is a matter of determining the service conditions. In this connection, the delivery of our line of steel is always available. Supply get in touch with our metal office.

ANTHROPAL SPEET

Antimonial sheet lead is lead alloyed with various percentages of antimony to resist harshness and other desired properties. It possesses a high degree of malleability. Its strength tends to vary more than of chemical lead, its tensile strength is higher, and it does have a longer service life.

The case appears somewhat different from any I have seen before. It is a small, dark, rectangular box, about 6 inches long by 3 inches wide.

CHEMICAL ANALYSIS

... is indicated by the fact that the present question, as

CL. V'LCHOOF ENKAT

This is a standard lead sheet constructed inside with antimonial lead supporting bars. The special exposure to prevent buckling, stretching and warbling. Supplied in any thickness from 1/16" up and on any size sheet and exceeding 24" in width by 36" in length.

TELU...JA LEAD SHEET

This is a new type of food with almost no fat and no cholesterol and plant sterols make it so much so that it is superior to other types in its ability to outperform and outperform some, usually strongly, cholesterol of fat, hence and a reduction of fat to resistance. It can be easily mixed and turned together like ordinary food. Supplied in a wide variety of this kind and about size.

LEAD FIVE

We make continuous, thorough and in Western tradition, this high quality materials are used and not just will be found to be of perfect all the time, those interesting careers might just find something to agree up to 12" under the surface and the surface will then be more or less a regular looking paper over a (technical) one.

GENERAL

We are always glad to deliver our short brief lectures
 first and the audience considers them as their points in
 view the situation.

For each new case of polio, we have a patient, a family, a doctor, a hospital, a community, a country, a world. It is not just the disease, it is the people who are affected by it. It is not just the virus, it is the people who are affected by it. It is not just the disease, it is the people who are affected by it.

NATIONAL LEAD COMPANY

Lined Products Division
111 BROADWAY, NEW YORK, N. Y.

PRODUCTS

"United" Chemical Lead Lined:
Pipe, Fittings, Valves, Tanks, Tank Connections
"United" Hard Lead:
And Pumps, Fittings, Valves, Plug Checks, Bells
"United" Tin Lined:
All the above products can be furnished Black, Tin Lined

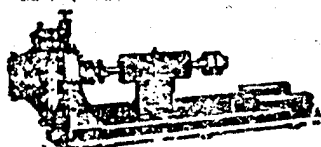

SERVICE

Actual service records are on file testifying to the satisfactory results secured from installations of "United" Lined Products.

Our Engineering Department is prepared to offer its services to anyone having and solving problems to solve. If the points on chemical resistance lines will be pleased to offer suggestions as to what is the most economical and satisfactory use of "United" Lined Products.

"UNITED" HARD LEAD CENTRIFUGAL ACID PUMPS

"United" Hard Lead Pumps are used for pumping acids, alkalis, caustics, etc. They have no parts in contact with the liquid being pumped and require little maintenance.

"UNITED" HARD LEAD CENTRIFUGAL ACID PUMP

Self-priming with long service life. It is supplied in capacities from 1/2 to 100 G.P.M. The pump is equipped with a heavy cast iron frame, a cast iron base and a cast iron cover. The pump is made of hard lead with the exception of the cast iron base and cover which are made of steel.

"UNITED" TUBULAR CHEMICAL LEAD LINED STEEL PIPE AND FLANGED FITTINGS

"United" Tubular Chemical Lead Lined Steel Pipe and Flanged Fittings are used for conveying acids, alkalis, caustics, etc. They are made of steel with a lining of hard lead.

"UNITED" TUBULAR CHEMICAL LEAD LINED STEEL PIPE AND FLANGED FITTINGS are made up with the hard lead lining on the inside of the steel pipe and flange. The lining is made of hard lead and is applied by the hot lead process.

"UNITED" HARD LEAD LEMON TIN LINED ACID VALVES

"UNITED" HARD LEAD LEMON TIN LINED ACID VALVE

"United" Hard Lead Valves are heavily lined throughout with hard lead and are used for controlling the flow of acids, alkalis, caustics, etc. They are made of steel with a lining of hard lead.

"United" Hard Lead Valves are made in all standard sizes and are available in both the standard and special valve end connections.

"United" Hard Lead Valves are always in stock and are ready for immediate shipment.

"United" Hard Lead Valves are used for controlling the flow of acids, alkalis, caustics, etc. They are made of steel with a lining of hard lead.

"United" Hard Lead Valves are made up with the hard lead lining on the inside of the steel valve body and flange.

"United" Hard Lead Valves are used for controlling the flow of acids, alkalis, caustics, etc. They are made of steel with a lining of hard lead.

"UNITED" HARD LEAD "CHEM. VAPOR" FLANGED ACID VALVES

"United" Hard Lead "Chem. Vapor" Flanged Acid Valves are used for controlling the flow of acids, alkalis, caustics, etc. They are made of steel with a lining of hard lead.

"United" Hard Lead "Chem. Vapor" Flanged Acid Valves are made in all standard sizes and are available in both the standard and special valve end connections.

SERVICE AND CONFIRMATION

SERVICE AND COOPERATION
 Rental and purchase estimates are available and specifications for any proposed apparatus will be gladly furnished to those who are considering the above equipment.

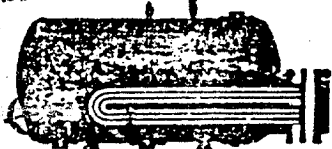

General information on the site and its use can be obtained by visiting the website www.fishbase.org. They provide the additional information on our products and can be used to help you in your research.

NATIONAL HOT WATER HEATERS

"We make hot water heating units of two types, instantaneous and storage. Both types have their advantages and the installation depends upon the local water demand. For either system we have sizes.

[illegible]

1 STA 1 NEWS FROM THE WATER HEATER

[illegible]

STOLEE BILLY; WIFE, ANNA; MARIETTA, GEORGIA

HEATHS

FEED WATER HEATERS

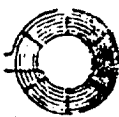

National Fuel Water Heater are made up of a cast iron, which means the steel shell containing one or more heat exchangers for heating the water is pressed through the steel, allowing heat to transfer between the water and the shell.

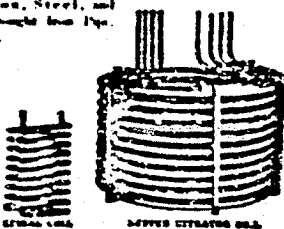

There is also one more in-
teresting point for the stu-
dent to note. The first water has a much
larger range of density than the second
sample. It is almost 1.0000000000
and 1.0000000000.

FACILITIES FOR COILS AND REELS

All "National" coils are continuous, uniform, complete or with fittings, mass produced, standard. Steel coils have electrolytic nickel plates and all Brass and Copper tubes have electrolytic plates. The National Pipe Plant can be prepared in standard sizes, specifications and standards covering coils and fittings for the particular requirements of plant and will supply complete set of pipe and specifications. National fabricates steel pipe of cast or rolled, Malleable, Chrome Nickel, Chromalloy, Aluminum, Aluminum Brass, Copper, Monelmetal, Inconel, Steel, and wrought iron pipe.

NATIONAL LEAD COMPANY

Lined Products Division

SELLING AGENTS FOR THE FREDWELL CONSTRUCTION CO., PHILADELPHIA
111 BROADWAY, NEW YORK, N. Y.

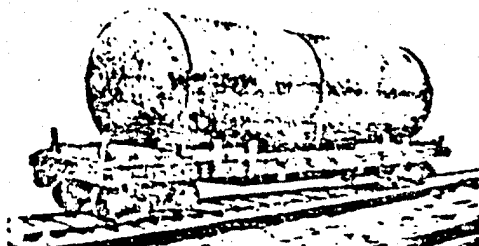

PRODUCTS

Homogeneous Lead Lined Vacuum Apparatus, Evaporators, Tanks, Steam Jacketed Kettles, Acid Eggs, Digesters, Autoclaves, Agitators, Pressure Still, Treater Drums and Tank Cars. Homogeneous Lead Covered Heating or Cooling Coils; also Agitating Apparatus of any design.

ADVANTAGES OF PROCESS

The chemical lead lining or covering is an impervious thickness and impervious bonded to the base metal which may be steel, iron, copper or brass, forming a thickness and impervious protective surface.

A strip of steel covered with chemical lead by this process can be mechanically treated in the same way

ONE OF OUR TREATER DRUMS FOR 10 FEET IN DIAMETER BY 10 FEET LONG. DRUMS ARE LINED WITH LEAD BY THE FREDWELL CONSTRUCTION CO. PHILADELPHIA. DRUMS ARE LINED WITH LEAD BY THE FREDWELL CONSTRUCTION CO. PHILADELPHIA. DRUMS ARE LINED WITH LEAD BY THE FREDWELL CONSTRUCTION CO. PHILADELPHIA.

with the slightest friction action between the lead and the steel.

The process of lining the surface of lead on the surface of steel, iron, copper or brass, forming a thickness and impervious protective surface.

The improved method of application is a lead that will not wear away under conditions of shock, vibration or pressure.

The chemical lead lining is not affected by the temperature, neither is the thickness of the lining, even in the heat.

All homogeneous lead equipment is delivered in the most substantial condition. In this connection, the service of our engineering staff is at your disposal either for consultation, chemical examination, tests, or other special work.

NATIONAL LEAD COMPANY

Acid Recovery Department
111 BROADWAY, NEW YORK, N. Y.

PRODUCTS

Concentrating Plants for
Sludge Acid
Spent Acid
Chamber Acid
Separating Plants for
Sludge Acid
Evaporators for
Weak Solutions of Sulphuric and Phosphoric Acid

PROCESS

The National Mammé Vacuum Process, patented with United States Letters Patent, has been adapted for a large number of industrial uses for the concentration of spent sludge acid, by chemical plants for the recovery of spent acids, and for chemical plants for the concentration of weak chamber acid.

The salient feature of this process is that the work is carried on under high vacuum with indirect application of heat. The use of vacuum has very decided advantages, as it eliminates all fumes and odors, materially decreases fuel losses and reduces fuel consumption by lowering the boiling point of the acid in the distillation column.

In this process, sludge acid can be concentrated from 10 to 50% H₂SO₄ with a minimum of steam consumption of 100 lbs. per ton of acid. The use of vacuum of such high vacuum greatly facilitates the distillation of the acid. The concentration is a lower strength of acid. It does not require the installation of a special vacuum house, and the work can be accomplished with a steam pressure of 45 lbs.

Evaporators can be equipped with one electric heat insulating blanket which ensures perfect control of operation at all times.

APPLICATION OF PROCESS

Oil Refineries The work acid coming from the separators at a refinery of from 25 to 40% H₂SO₄ is concentrated by our process to 50, 60, or 70% H₂SO₄. When necessary the partially concentrated acid can be further concentrated with our process to 70% H₂SO₄ for which has been reported by the decomposition of sulphuric acid, and then further concentrated to 70% H₂SO₄.

The 70% H₂SO₄ can be used for further concentration for the treating of light oils and pressure distillation, or it can be removed from the bottom and used for higher density acid than used for treating, kerosene and lubricating oils.

In instances requiring this acid for the treatment of the oil, the 70% H₂SO₄ can be used for the absorption of SO₂ produced in a contact plant.

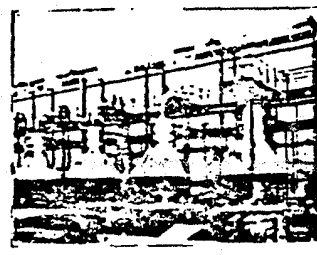

Under normal conditions the total cost of concentrating from 30 to 40% H₂SO₄ to 50% H₂SO₄ will cost from \$1.50 to \$2.00 per ton of treated acid, and the concentration to 70% H₂SO₄ will cost from \$2.50 to \$3.00 per ton.

Operating costs depend on the size of the plant and the figures given are exclusive of overhead and depreciation.

Chemical Plants Many chemical factories use large quantities of sulphuric acid in the manufacture of their products, and this acid can be recovered and concentrated economically by the National Mammé Vacuum Process to any desired density up to 70% H₂SO₄.

LEAD...for lasting quality in pipe, roofs, or paint

The enduring character of lead, its ability to defy corrosion, has made it a favored metal for many purposes including water pipes, tank linings and roofs.

Lasting quality is also an outstanding characteristic of white-lead and red-lead, two paint pigments derived from lead.

White-lead paint is widely used for the protection of buildings outside and the decoration of those interiors, while red-lead is the accepted paint for structural iron and steel.

National Lead Company make white-lead and red-lead of the highest quality, under the well-known Dutch Boy brand.

In addition, we are a dependable source of supply for many other lead products... sheet lead, lead pipe and fittings, ballpoint metal, solder, etc.

A
FAMOUS
BOY

from PERTH AMBOY

One of the best-known characters in the United States is the winsome little Dutch Boy. From one end of the country to the other, grown-ups and children alike are familiar with his captivating smile, his blue-overalled figure, his upturned paint brush suggesting "get busy and paint."

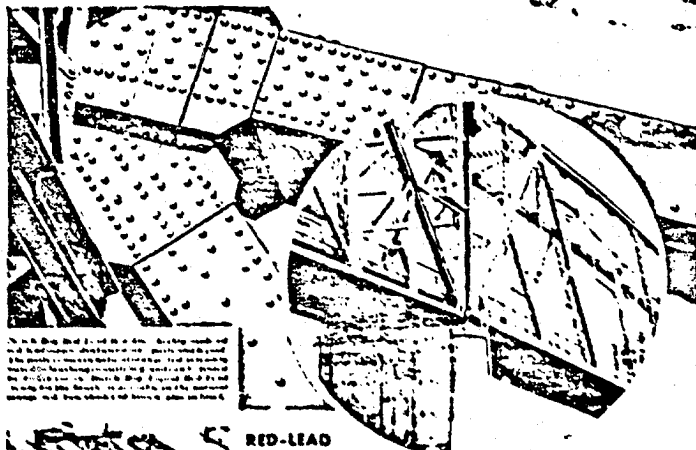

He's a fellow townsmen of yours—this prominent little personality. For here in Perth Amboy he has a plant where he manufactures, among other things, the pure white-lead which he advertises.

This white-lead—think of it—White-Lead—is "Don't Paint's Other Name." When you paint, too! No, not simply because it will be helping you to do so. Mainly, because it produces a paint job that does not crack and scale—there's no getting away from it.

With the Red-Lead paint, the hull of the ship is protected from corrosion and the paint is easy to apply. The paint is also resistant to the action of the sea water and the sun's rays.

RED-LEAD
BEST FOR

METAL PAINTING

...SAUCER TEST

convinces Louisiana Highway Official

The Louisiana Highway Official, Mr. P. A. Broussard, has been convinced by the results of the "SAUCER TEST" that Red-Lead is the best metal paint for use on the hull of ships. The test was conducted by the Louisiana Highway Official, Mr. P. A. Broussard, and the results were as follows: Red-Lead was found to be the best metal paint for use on the hull of ships. It was found to be resistant to the action of the sea water and the sun's rays. It was also found to be easy to apply and to last for a long time.

...RED-LEAD SURFACES
...still in satisfactory condition!

THESE are the Pennsylvania Sugar Company's painted char house steel.

In a letter dated November 2nd, 1921, the Pennsylvania Sugar Company writes: "We have not used the 'Dutch Boy' Red-Lead paint for over ten years, and we have never had any trouble with it."

"The paint was painted on the char house steel, using two coats of red lead and paint, and it has held out for a 'hell-breaking' test. In 1919 we painted the paint on the steel, while the steel was still in the factory condition."

After all of this, before buying the 'Dutch Boy' Red-Lead paint, we

are sure to get a good price for our paint and steel, and we are sure to get a good price for our paint and steel.

The 'Dutch Boy' Red-Lead paint is the best paint we have ever used. It is the best paint we have ever used, and it is the best paint we have ever used.

In a long series of tests, we have found that the 'Dutch Boy' Red-Lead paint is the best paint we have ever used.

But don't take our word for it. Go to the steel of others. Put red lead on the steel, and see the results. You will find that the 'Dutch Boy' Red-Lead paint is the best paint we have ever used.

WHERE SIGNALS SAFETY....

"Sincer Test" proves RED-LEAD is paint to use for protecting metal...

At every corner of iron and steel, ship hulls, highway bridges, gas tanks, railway equipment. What is the best paint for guarding all these metal surfaces?

The engineer after another declares: "Pure and lead!" The question of them: "It is not a mere word, it is the 'Sincer Test'." I am not.

This test is a simple, practical way to demonstrate which paint gives metal structure the most durable and economical protection.

The "Sincer Test" has come to you from... just what you need at right, includes metal surface and sample of Dutch Boy Red Lead to test against any other paint you wish. Choose your own conditions. Test under sun, heat, cold, moisture, sand, fumes, salt air, water.

In a long series of tests conducted by a leading southern railroad, the "Sincer Test" proved that pure red

had indicated other paints tested as superior by 4 to 1.

But don't take our word for it or the word of others. Put red lead to the test yourself. Send for the KIT and see the results with your own eyes... how pure red lead gives long time protection and saves money.

Send for the Sincer Test Kit today. It will show you the results of the test with your own eyes... how pure red lead gives long time protection and saves money.

TWO U. S. R. A. LEAGUE RECORDS in Succession...

For the second consecutive year, U. S. Ammunition
has registered a new record in the U. S. R. A. League
Tournament.

In 1932 the Springfield (Mass.) Revolver Club
Team set up a mark so stout as when they returned
for scores that totaled 1,157 x 1,150. And in 1933 the Greenough (Conn.)
Revolver Club Team, captained by Jay Rivers, stretched this record by
seven points when they established a team score of 1,164 x 1,150.

These record-making teams both chose the same ammunition—
U. S. No. 2 S. & W. Special—but for the same reasons—for accuracy, for uni-
formity, for dependability.

Jay Rivers, captain of the winning
1933 Greenough Revolver Club team, set
high gun with a score of 234 x 230.

CONSISTENCY

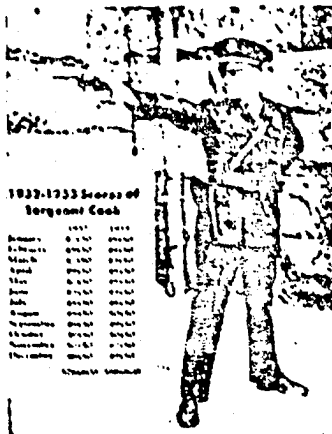

You have two new names
and here they are

1928-1933 Scores of
Captain Campbell

1928	1000
1929	1000
1930	1000
1931	1000
1932	1000
1933	1000

Capt. F. F. Campbell
Senior Police Department, Ford State,
military school, 11/10/33

1928-1933 Scores of
Sergeant Cook

1928	1000
1929	1000
1930	1000
1931	1000
1932	1000
1933	1000

Sgt. Lawrence Cook
Senior Police Department, Ford State,
military school, 11/10/33

At the end of a one-year period, in which
to many deer regular monthly shoots were
held, the scores of Captain F. F. Campbell and
Sergeant Lawrence Cook of the Throver
(K. and L.) were exactly four
times apart . . . and the next
one-year score of both shooters
was 72 points short of a "gross"

the 1933-34 season, which was the same
year of shooting, of these team scores and to the
dependability and uniformity of the ammuni-
tion which they both used . . . U. S. No. 5 & W
Special Mid-Range Sharp Shoulder Co. and gen.

NLI 104422

Reported from the U.S.A. in November, June, 1966

... the .22 Cartridge you want is here!

WINNER you want the highest degree of accuracy, the utmost in speed, or a balanced combination of the two... the .22 Cartridge you want is here! ... the .22 Cartridge you want is here!

L. P. 22 R. R. 22

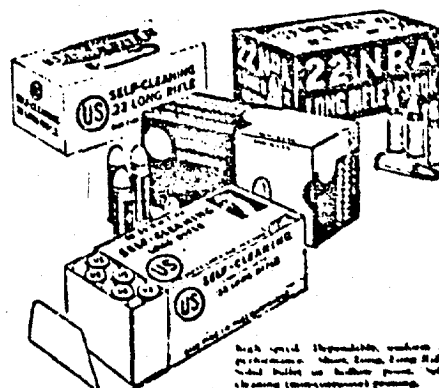

For the shooter in accuracy in all ranges up to 200 yards. A small bore cartridge which is known the world over. The L. P. 22 R. R. 22 is a cartridge of a long standing of important shooting events, being both French powder, solid lead bullet. (15.000 grains for small game)

Copper Lead Speedster

For the shooter in speed. 25% faster than ordinary .22's, in a copper-coated bullet on smoking black case. Short, long and long life, as well as 22 caliber. Solid bullet or hollow point. Loaded and or an hollow point. Self-cleaning (non-corrosive) priming.

U. S. Copperheads

For the shooter who primarily interested in long-range accuracy or in top speed, but who doesn't want lower-than-ordinary accuracy and power. A dependable, good-looking, all-around .22 copper-coated bullet. Short, long and long

Side, as well as 22 Wadsworth and 22 Winchester. Solid bullet or hollow point. Self-cleaning (non-corrosive) priming.

U. S. Self-Cleaning 22's

For the shooter who wants the same thing as the Copperheads but who prefers a lead bullet instead of a copper-coated bullet. Good accuracy. Reasonably

high speed. Dependable, uniform in performance. Short, long and long life. Solid bullet or hollow point. Self-cleaning (non-corrosive) priming.

So there you are, shooter. Select the U. S. small bore cartridge that best meets your particular requirements. And remember: No one else can give you a cartridge from the makers according to the specific purpose for which it was designed. All types have the common denominator of U. S. quality that is called "Dependability."

US SHOOTERS WIN at CAMP RITCHIE

Pennsylvania State Police Outstanding in Eastern Small Bore Tournament, June 30-July 4. Two Gratioty of the Delaware and Hudson Railroad Police Also Looms High in Scoring.

With Pennsylvania State Police shot team members topped in at with best place in the Police Pistol Team Match at Camp Ritchie, a 24 point lead for the White Team of this tournament performing aggregation finished 4th among the ten teams.

And then, as though to make their claim as to right shooting honors among police teams in the big day tournament, four individual shooters among the Pennsylvania finished 3rd.

4th, 5th and 6th, in the individual Police Pistol Match. Another 1st shooter who garnered fourth during the tournament is two Gratioty of the Delaware and Hudson Railroad Police. He tied for best place in the 50 shot Free Pistol Match, but it was not enough.

They move the ratings from an important show have demonstrated the well known uniform and dependability of ammunition that bears the U.S. symbol of quality.

Esto NUNCA sucede
si usted pinta su
casa con Blanco Plomo Dutch Boy

Con el Dutch Boy se

evitan los Agrietamientos y Descascos

AS personas que se quejan de que sus pinturas se agrietan y se descascan, no saben lo que se necesita para la protección que necesitan. Así, las pinturas resultan muy buenas para cuando hay que pintar de nuevo, a fin de que la nueva pintura, cuando buena, se adhiera a la que se pinta.

No es así. Cuando se pinta una vez que se pinta se

usa siempre el Blanco Plomo DUTCH BOY. Entonces, podrá usted estar seguro de que la pintura permanecerá lisa y sin agrietarse. Las pinturas hechas con Blanco Plomo DUTCH BOY son elásticas. Se dilatan con el calor y se contraen con el frío, con la misma venalidad de agrietarse. En la misma pintura que se adapta perfectamente al clima de Puerto

Rico. Cuando vaya usted a pintar de nuevo, no tendrá que raspar ni quemar. Las pinturas DUTCH BOY se adhieren por su gran capacidad elástica y por la facilidad con que se preparan. En diez minutos podrá usted preparar siete galones. Además, usted puede preparar la pintura según la superficie, ya sea interior o exterior.

Después de esto...
NO MAS AGRIETAMIENTO
ni DESCASCARE si usa Ud.
el Blanco Plomo Dutch Boy

"HORA podrá usted pintar su casa con una pintura que le permenece lisa y sin agrietarse una pintura que nunca se agrieta ni descascara.

Con el Blanco Plomo DUTCH BOY se hacen pin-

turas elásticas. La única clase de pintura que se adapta bien al clima de Puerto Rico. El Blanco Plomo DUTCH BOY se dilata con el calor y se contrae con el frío sin que la pintura se agriete.

Esta elasticidad permite que

la pintura dure mucho tiempo y evita la necesidad de raspar y quemar cada dos años que pintas de nuevo. Por lo tanto, las pinturas se han con Blanco Plomo DUTCH BOY son las más económicas. Se destaca también por su gran poder emulsionante y la facilidad con que se prepara. En diez minutos se raspa a 2 calones. Además las pinturas se hacen con Blanco Plomo DUTCH BOY se adaptan a cualquier clase de superficie, ya sea interior o exterior.

Escriba usted esto...
usando Blanco Plomo Dutch Boy

Así obtendrá una
pintura que nunca

CUARTEA
ni se
DESPRENDE

CON frecuencia usted verá
muevas de pinturas que se
desprenden como en el gra-
feto. Es posible que esto le
haya visto usted en su pa-
sado.
Al principio la pintura sin
falta lucía muy bien. Pero
después de unos meses cu-
ando a agitarse y a des-
prenderse.
De ahora en adelante no ten-
drá usted que preocuparse de
ver una pintura Blanco Plomo
DUTCH BOY usted podrá
pintar su casa con una pin-
tura que es extraordinaria-
mente elástica—una pintura
que se contrae—una pin-
tura que nunca se la misma
cosa de agrietamiento o des-
prenderse.
Las pinturas hechas con

Blanco Plomo DUTCH BOY
permanecen lisas y no se
caen—la superficie esta-
rá siempre en condiciones pa-
ra pintarse de nuevo. Esta
pintura le ahorrará dinero
porque dura mucho tiempo y,
cuando sea necesario pintar
de nuevo, no habrá necesidad
de raspar ni quitar.

La pintura DUTCH BOY es
infalible por su gran capaci-
dad de adherencia y por la so-
lidad con que se propaga.
Solamente se requieren diez
minutos para preparar tres
galones. Se puede preparar
cualquier superficie que se
pinta a pintar, ya sea interior o
exterior.
