The Portland Co.
Engineering Dept.
Portland, Maine

Gentlemen:

We are interested in contracting the construction of a drum reconditioner. We have one of your older units in operation in our plant at present (Portland Order 7262, Serial No. 315, 5/16/60, by D. B. Bosworth). This unit is used for actual reconditioning.

The new system we desire must be automated more and will be used as an initial flush on new drums. We will need special hoses and materials of construction. The specifications for these we can furnish.

What we need from you is the name of a contact with whom we can meet to transfer ideas and arrange for further negotiations.

We shall appreciate a reply as soon as possible.

Sincerely,

James G. Bryant
