Better move now.

Subject: Asbestos Shoe & Lining Assemblies for Navistar

The inventory of 1001042 asbestos lining for Navistar brake asemblies 807586 and 807587 will be exhausted by the end of November 1990 based on June 15 MRP. Once this lining is gone, we will not be able to supply these brake assemblies to Navistar unless they convert to a non-asbestos lining.

Please relay this information to the proper individuals so a suitable replacement can be engineered prior to the stock-out date.

If you have any questions, please call.

Navistar engineering has been contacted and is shocked they still had asbestos linings in use. The situation is pure oversight. They will issue a new Bill of Materials for the brakes immediately. Prepare to scrap the remaining assemblies, as it is highly unlikely they will allow an "exhaust" for the current part numbers.
