This action was based upon the following motion made by Mr. Baum

This claim coming on for hearing upon the Appeal of claimant filed June 10, 1959 from a finding and decision of the Administrator dated May 14, 1959, a pre-hearing conference having been held and upon consideration of the opinion of a qualified medical Specialist, requested by an order of this Board January 3, 1960 and other proof on file, the sole basis for instant claim being that of an Application for Occupational Change Award Due to Silicosis, filed December 26, 1958, it is the finding and decision of the Board that said Application, filed under the provisions of 4123.57 R.C., last paragraph of "D", is applicable only when an employee has contracted silicosis and benefits are only payable when medically advisable for the employee to change occupation to decrease substantially further exposure to silica dust and that said Application is denied for the reason claimant has contracted asbestosis or pneumoconiosis due to occupational exposure to asbestos and is not suffering from silicosis due to exposure to silica dust; therefore that any special findings or order written hereon supersedes any printed matter in conflict therewith.
