

ETHYL GASOLINE CORPORATION

CHRYSLER BUILDING
135 EAST 42ND STREET

NEW YORK May 11, 1934

INTER-OFFICE
CORRESPONDENCE

Dr. R. A. Kehoe,

Dear Dr. Kehoe:

Attached hereto is a report made to the Gulf Refining Company at New Orleans by one of their people, which is self-explanatory.

After talking it over with Mr. Webb today, we thought it advisable to suggest to the Gulf people that one of your assistants be sent down to examine this case and make a report on same, but that your doctor would not represent himself as being from the Ethyl Gasoline Corporation but merely act in the capacity of a doctor sent by the Gulf Refining Company.

I understand the man is in the hospital and if he should pass away, it would probably be better to have had an examination and report on him rather than for the Gulf people to be sued after his death.

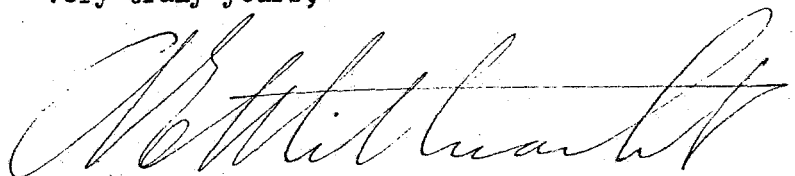

I have a wire from Gulf this afternoon advising they like this suggestion and would like to have it carried out. They do not, however, tell me whom your doctor should communicate with on the case before making his examination and I have wired them back asking for this information.

I don't know whether I will receive it in time to put into a postscript to this letter but, if not, will wire you the first thing on Monday morning.

Of course we have no liability but wish to cooperate with the Gulf people. I don't think they have any idea that the tetraethyl lead content in Q-treated gasoline had anything to do with this man's illness.

If you do not approve this course of action, I think you had better get me on the 'phone Monday morning.

Very truly yours,

C:C
