INTER-OFFICE CORRESPONDENCE

TO	Dr. R. A. Kehoe	ADDRESS	Kettering Laboratory Cincinnati, Ohio
FROM	Mr. O. B. Lewis - Jones	ADDRESS	New York
SUBJECT	Lead Treated Gasoline in Cooking Equipment	DATE	January 27, 1943

Lowry Attached is a copy of a letter received from Mr. C. D. Lowery, Jr. of Universal Oil Products Company calling attention to a situation which seems to have developed in certain western Army posts and having to do with the use of lead treated gasoline in cooking equipment.

This would appear to be related to the army stove project upon which I worked during my period in Cincinnati and upon which the Kettering Laboratory issued a report some time ago. You will no doubt wish to answer Mr. Lowery.

O. B. LEWIS
