Date of Work Request / By: 3/1/83 D. Kennedy

Reported By A.P. Barth

Approved By P. Colville *pc*

Status Complete

Subject: Beaverhead Mine - Development Holes D-1, E-1, F-1, G-1, H-1

Objective: Characterize ore quality

Results: Micro-pulverized samples from ore zones encountered in the holes listed above were analyzed by XRD and GEB. Samples with greater than 70% talc were analyzed for acid soluble composition (reported as %CaO), and samples with 70% or less talc were analyzed for total carbonate by LOI (1000°C). Data sheets with estimated mineralogy are attached.
