

Short company description for restriction proposal PFAS

Company name: TEDAG Dichtungstechnik und Industriebedarf AG

Address: Rosenstrasse 14, CH-8400 Winterthur

Employees: 15

For which industrial sectors does TEDAG Dichtungstechnik und Industriebedarf AG produce:

TEDAG Dichtungstechnik und Industriebedarf AG serves almost all industrial sectors. However, many of the products produced are for chemical, pharmaceutical and medical technology, for hydraulic and pneumatic applications for production machines, for food technology and for general mechanical engineering.

What kind of fluoropolymer products does TEDAG Dichtungstechnik und Industriebedarf AG produce?

TEDAG Dichtungstechnik und Industriebedarf AG produces mainly seals, guiding rings, membranes, couplings and valves made of fluoropolymers. However, many customer-specific parts are also produced.

How are fluoropolymers processed at TEDAG Dichtungstechnik und Industriebedarf AG:

Elastomers: processing of raw rubber into elastomer molded parts using compression molding, transfer molding and injection molding (FKM and FFKM).

PTFE: Pressing of PTFE powder into raw parts, subsequent sintering and mechanical processing. Common materials: Virgin PTFE and modified PTFE, but also many PTFE compounds (PTFE filled with organic and inorganic fillers).

Thermoplastics: mechanical processing of FEP and PVA
