File

After looking at available brakes on the market and talking with Mr. Usrey at Chocolate Bayou, it was decided that we could fabricate our own brakes for the fans. The Bayou has both the disc and their shop built brake in service. It has been their experience that the "shop built" brake was more reliable and needed little or no maintenance. We will visit the Bayou the week of March 21st to examine their brake. A universal drawing will then be submitted to SHAC recommending this brake which can be fabricated in our shop.
