M. H. DETRICK INSULATION PRODUCTS

As part of an effort to improve products to meet the needs of its customers, the M. H. Detrick Company Insulation Division engaged in an ongoing program of research and development. As a result of the effort to develop new products, as well as to improve the quality of existing products, product formulae were frequently changed. Accordingly, the recipe for products manufactured by Detrick was frequently changed. Therefore, the asbestos (and other material) content of certain products varied from time to time. The information provided below is based upon a review of records, conversations with former employees (some of whom are now deceased) and reflects the best information currently available to Detrick.

PRODUCT	DATES	ASBESTOS CONTENT*
Block Insulation	1939? - 1956?	4.65%

@R.C. Undercoat		None
@Debac		None

* Detrick conveyed its insulations division as a going concern in 1964. As part of the sale, Detrick conveyed its product formulae to the new owner. The employees who worked in the insulation division continued to work for the new owner. Detrick has no records of the percentages of asbestos actually contained in the products. The information provided is based upon percentages provided by the new owner. Detrick states on information and belief that the product formulae were changed by the new owners from time to time and the percentages of asbestos are those used by the new owner and not necessarily by Detrick.

** The denomination 0%(?) means that Detrick currently has no information that would indicate that a product contained asbestos.

*** Asbestolux was manufactured by Cape Building Products Limited, one of the Cape Asbestos Group of Companies (mines in South Africa), Cowley Bridge Works, Uxbridge, Middlesex. An Asbestolux brochure was found in Detrick's files. It is unknown, however, whether Detrick purchased or sold any of the product.

**** Commencing in 1955, Detrick manufactured these products in its Insulation Division plant. Prior to 1955, Detrick purchased these products.

@ Except as noted above, these products were not manufactured by Detrick
