In re: All Asbestos Litigation Filed by The Simmons Firm, Circuit Court, Third Judicial District, Madison Cty., IL; 8/28/03

K. T & J INDUSTRIES - KANSAS CITY, MO

T & J Industries, a manufacturer of large off-highway equipment, has built and sold its first shuttle wagon to the U.S. Post Office. There were a total of 249 trucks sold and T & J will be building 20 per month beginning in mid-September. Order for 249 units was lost due to our refusal to sell service parts prior to doing business with an OEM.

Although we lost this order, our 12F4 & 23321 with brakes, will be the standard components on the domestic trucks built by this O.E.M.

L. VERSATILE - WINNEPEG, CANADA

Reviewed axle pricing with purchasing personnel and reviewed potential cost savings proposals. Versatile presently buys 10% of their 23K requirements from an Italian manufacturer. Two Japanese companies are discussing axles as well. If proposal is accepted will secure our position at Versatile.

M. EUCLID, INC. - CLEVELAND, OH

Sale of 65 off-highway dump trucks to Egypt complete with resulting purchase order for 65 model 3910 carriers issued to Axle/Brake Division.

N. MERCEDES BENZ - CLEVELAND, OH
Mr. John Bohn, Chief Drive Train Engineer

While Mercedes seems interested in the MTT program, program requirements were discussed with John and available Eaton drawings and layout prints were left with him.

O. AMERICAN LAFRANCE, INC.- Elmira, NY

The OE is really looking for a second source. Our pricing program was very timely and opportune, and resulted in Eaton being speced into a 125 chassis bid for the city of Los Angeles, and we will also be speced into the New York City rebid.

VII. MILITARY

A. H.E.M.T.T.

Current speculation that total H.E.M.T.T. contract will run for another 15 to 16 years with a total of 16,000 units, including options, being purchased.
