

**BY THE MAKERS OF SUPER-SILVERTOP STEAM TRAPS**

**STEAM...  
CLEANER  
THAN A  
WHISTLE**

Clean steam means cheap steam and every engineer should consider the following uses of Hi-e-F Purifiers;

- (1) In boilers to keep steam clean, dry and hot . . . to stop carryover and permit boilers to be operated at higher capacities.
- (2) Ahead of turbines, reciprocating engines, regulating valves and other costly steam equipment which eliminates any possibility of damage by slugs, entrained moisture, and scale.
- (3) In exhaust steam applications to remove objectionable entrainment so the steam may be used profitably for heating, preheats or even returned to the boiler as condensate.

Hi-E Purifiers are the best buy in separating efficiency today. They involve a new two-stage centrifugal design proved far more effective than conventional separators in actual field tests. Every purifier carries a 99% entrainment removal guarantee. Despite their increase in separating efficiency they are easy to install and maintain. Without moving parts or filters, they never require cleaning or maintaining. Get the facts on how Hi-E Purifiers make steam cheaper. Mail coupon today!

chure. Purpose of equipment is reclaim-  
tion and repurification of oils, coolants,  
solvents and industrial waters for re-  
moval of solids, solubles and volatile  
contaminants on continuous automatic  
basis. Bulletin A-543. U. S. Hydramat  
Mach Corp. Syracuse 4, N. Y.

**43** Packaging water conditioning plant designed to chlorinate, coagulate, clarify, filter, neutralize, coagulate, soften raw water supplies described in 8-page, illustrated bulletin described in multi Co. New York 36, N. Y.

**44** Filters for liquid flows of 1-1000 gpm and pressures of 1-1000 psi featured in 12-page, 2-color booklet. Applications, photos and dimensional drawings, photos and factor chart and full page of hydraulic data included. Bulletin MK-0553, Conbraco Corp., Meriden, Conn.

**45** Automatic pH-control in boiler feedwater explained in bulletin of technical bulletin 55. This is a reprint of a paper delivered by T T Sheen, president of the company. Milton Roy Co., 1800 E Mermaid Lane, Philadelphia, Pa.

**46** Chlorine feeders — for sewage treatment and factors determining selection covered in technical information sheet No. 840-337. Builders: Providence, Inc., 345 Harris Ave., Providence, R. I.

## WELDING

**47** Welding—of nickel alloy steels and a study of various welding techniques discussed in 44-page booklet. Tables, graphs and illustrations. Bulletin A-22, International Nickel, New York 6, N. Y.

**48 Special report**—prepared for the Zinc Institute entitled *Cathodic Protection with Zinc Anodes* covers mass of engineering data and information concerning the types of applications suitable for zinc anodes and desirable anode forms and methods of application. American Zinc Institute, 60 E 42nd St, New York 17, N. Y.

**49 Low hydrogen electrodes covered**  
in 8-page, illustrated technical  
bulletin. Includes history of electrode  
effects and control of hydrogen, weld-  
ing procedures and applications. Bul-  
letin AR53-15, Alloy Rods Co, York, Pa.

**50** Fabrication of tubular materials treated in new reference table. Summary of Recommended Arc Welding Procedures for Various Steel & S&W Overlay Combinations. TDC-155, Babcock & Wilcox Co, Denver Falls, Pa.

**51** Welding hose construction, performance data, recommended uses, sizes, working pressures, etc. discussed in 3-page, 4-color release. Cross section and cutaway photos incl. Quaker Rubber Corp., Tacony and Comly St. Philadelphia 24, Pa.

**52** Arc-welding machines and various accessories for specific jobs covered in 44-page catalog. Photos of 20 models, full specs and electrical data included. Catalog 1240, Air Reduction Sales Co., 40 E 42 St., New York 17, N. Y.

**53** Electrode-selector chart presents information on mild-steel, low hydrogen-low alloy, low alloy-high alloy, hard-surfacing and stainless steel electrodes. Bulletin GEC-651E. Advantages of furnace and induction brazing presented in 12-page, 2-color, fully illustrated booklet. Bulletin GEA-651E. General Electric Co., Schenectady 3, N. Y.

### MISCELLANEOUS

**54** Drafting machines described in 20-page, 2-color booklet. Photos and data on various models including gravity compensated, track type, swing and detail machines. Charles Bruning Co. 4700 Montross Ave. Chi-

**55** Piping and pressure vessels featured in 48-page booklet. Includes 32 pages of tables covering standard data on piping and pressure vessel stress values. Taylor Forge & Pipe Works, Inc. Chicago 90, Ill.

# FACTS AT YOUR FINGERTIPS

● When to use Transparent Liquid Level Gage Sets. High pressure steam service. Adapters, valves, connections. Types available with recommendations.

● Metallurgical specifications. Cage glass and guard rods. Engineering service.

Penberthy's Catalog 35 is jam-packed with illustrated facts and specifications. It is your best guide to selecting the right liquid level gage sets at the most economical cost. In the complete Penberthy line, there are standard products for almost every application. Where your needs are special or unique, use the experience of almost 70 years to solve them. Take a tip from many thousands of satisfied users and write for your copy of Catalog 35.
