

1           A     That is such low exposure, they would not.

2           Q     All right.

3           A     What I am saying is the person with  
4     asbestosis is not meaningful in this context because  
5     what we are talking about is six cases of fibrosis of  
6     the lung among garage mechanics, and whether that six  
7     is higher or lower than we would expect, we don't  
8     know.

9                     We would have to do a study to determine how  
10    many pulmonary fibrosis we would expect to see in a  
11    group of garage mechanics.

12          Q     Well, the authors here say that these were  
13    six verified cases of asbestosis, correct?

14          A     That means they are verified fibrosis of the  
15    lung with exposure to asbestos.

16          Q     So are you telling us, sir, that in your  
17    opinion, these six verified cases of asbestosis among  
18    car repair workers are not cases of asbestosis?

19          A     They are fibrosis of the lung. May or may  
20    not be related to asbestos exposure.

21          Q     Well, you mentioned that you -- you
