Dear 5.1.2e

Many thanks for your reply, and I completely understand.

I'm sure my client would appreciate a call in the coming week or two, it would be good to understand where you are with your work. And indeed what work the FPG is doing.

A question we discussed when we met on Teams, was whether the restriction dossier would be made available on the ECHA website shortly after you submit it (and before the conformity check is complete). As we said, this would greatly enhance the ability of stakeholders to gather (or generate) necessary data / evidence to submit during the consultation period. Do you have any news on whether this will happen?

Finally, you will receive an invitation to register for the 17 November event on Monday. We would be happy to see you, and any colleagues you would want to distribute this to.

Kind regards,

5.1.2e e

Subject: RE: Fluoropolymer Product Group - Event

5.1.2e,

Thank you very much for the invitation.

We welcome this initiative, as raising awareness is an important topic.

However, the timing of this event is a bit unfortunate. We will still be busy in December with finalizing our restriction proposal, so we'll be able to submit it in early January. In addition, I will not be able to present any new information as we cannot yet share any details on the exact content of our restriction proposal with stakeholders before the formal submission of our dossier. From that perspective, I doubt whether taking part in a panel discussion is useful, as we cannot go deep into substantive discussions. However, I would be happy to listen in and follow the discussions, if this is a possibility.

If it is still useful, we can have a short call early next week.

Met vriendelijke groet / Kind regards,

5.1.2e

Subject: Fluoropolymer Product Group - Event

Dear 5.1.2e,

We met on a call with the Fluoropolymers Product Group (FPG) a few weeks ago. Acumen is supporting FPG on their work for the PFAS REACH restriction.

My client, 5.1.2e mentioned FPG would be organising an event later in the year. This will be a 90 minute online panel discussion (with a moderator) and will look at fluoropolymers, their uses and how to regulate them.

I wondered if we might have a quick call to discuss this, we would like to invite RIVM to participate to the panel and hope you might consider the request.

Thank you and hope to speak soon.

Kind regards,

5.1.2e
