Multuri (Multiple Venturi) Gas Burner

Especially designed for HARD-TO-FIRE

• SCOTCH MARINE BOILERS • STEEL FIRE BOX BOILERS
HIGH FIRING RATES AT HIGH EFFICIENCY

A Premix Type Gas Burner, ideal for commercial and industrial size boilers and warm air furnaces. Gives maximum performance from hard-to-fire Scotch Marine and steel fire box boilers. Controlled flame characteristics make the burner a natural for units with extensive refractory surface. Suitable for any gas at 4 in. gas pressure or more. Permits high firing rates at high efficiency. Simple to install, adjust, and operate. Completely Factory Wired and Assembled. . .

Ready for Immediate Installation!

MULTURI BURNERS are available in standard units of 4 to 54 mixers. Capacities from 700,000 to 10,800,000 Btu/hr. Higher capacities can be furnished. *Write for detailed information or for a questionnaire listing all the data necessary for correct specifications and efficient installation.*

NEW! COMBINATION GAS-OIL BURNERS

362,000 to 4,300,000 Btu/hr.

2 5/10 to 30 Gallons of Oil

Completely Automatic Switch-over from 1 Fuel to Another. Write or phone for details.

SURFACE COMBUSTION CORPORATION, TOLEDO, OHIO

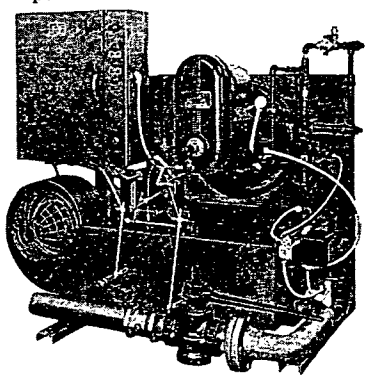

WEBSTER KINETIC*

Low Pressure Atmospheric Gas Burner with full venturi mixers and chrome steel alloy flame retention nozzles. Compact and easy to install, the assemblies are available in any desired size and shape.

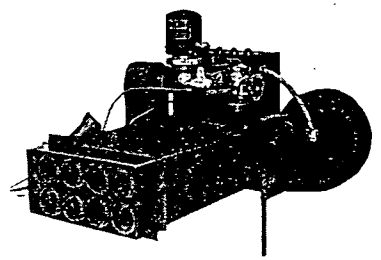

WEBSTER CYCLONETIC*

The Webster Cyclonetic* Dual Fuel Burner is designed to operate on either gas or light oil with only the flick of a switch necessary to change from one fuel to another. Employing 100 percent forced draft, the Cyclonetic* provides fully automatic operation on both fuels with complete programming and safety built in. Capacities from 675,000 to 7,000,000 Btu/hr.

WEBSTER ROTONETIC*

Dual Fuel Burner utilizing low pressure gas and any grade of commercial fuel oil under forced draft. Completely assembled, wired and tested at the factory; the units are available to 400 horsepower.

WEBSTER DYNETIC*

Forced Draft Gas Burner. A completely packaged unit available from 800,000 to 18,000,000 Btu/hr with low pressure gas.

WEBSTER ALSO MANUFACTURES: Series F600 and Series 650 Vertical Gas Burners for Heating and Power Boilers. Series 340 Gas Burners for Vertical Boilers. Series VI and Webster Rectilinear High Pressure Inspirators for Boilers, Kilns, Stills, Dryers, Etc. Series 200 and Series R Combination Gas and Oil Burners for Power Boilers.
