Subject: RE: EFCTC meeting request in the context of impact of PFAS restriction on F-gases

Dear 5.1.2e

Thank you for your response, we of course understand that you and your team are quite busy at this time.

EFCTC is following closely the restriction process and has already extensively contributed to both the 2020 and 2021 consultations with relevant information about F-gases, their uses, and the industry sector in general.

Aiming at contributing further, at the beginning of this year, we have contracted an independent consultant (Ricardo Energy & Environment) to conduct a socioeconomic assessment on the F-gases sector. The final report is expected for the fall, and we are currently looking into possible projects to collect additional information to be provided in the context of the 2023 ECHA public consultation.

For your convenience, please see attached the presentation that EFCTC shared during the FPP4EU Collaboration Platform event on 15 June with some more information about our work.

Should you have any questions about the ongoing and upcoming activities of EFCTC, please do not hesitate to contact me. In the meantime, I wish you a lovely summer break.

Kind regards,

5.1.2e

Dear 5.1.2e

Thank you for your request for a meeting. During the last two years, the five countries have put much effort in gathering information on the tonnages, emissions, functionality, alternatives and economic impacts of potential restrictions of PFASs. This information was received in two consultation rounds and in addition several studies by external consultants were performed. In the restriction dossier (including Annexes) the information will be presented and based on this one or more restriction options will be proposed. At this stage we are quite busy with the preparation of the restriction proposal and therefore, would refrain from having a meeting right now. Please also note that submission of the dossier to the European Chemicals Agency (ECHA) is foreseen in January 2023 and will be followed by a 6 months consultation period where you will have the possibility to comment on the proposal and provide relevant input. After the two scientific committees (RAC and SEAC) have formulated their opinions, the dossier will be handed over to the European Commission and a policy decision will be taken. More information on the restriction procedure can be found on ECHA's webpage: <https://echa.europa.eu/restriction-process>

Best regards,

5.1.2e

Betreff: EFCTC meeting request in the context of impact of PFAS restriction on F-gases

Dear 5.1.2e and Ms. 5.1.2e,

My name is 5.1.2e, and I am writing to you on behalf of the European FluoroCarbons Technical Committee (EFCTC), a sector group of Cefic, to propose a meeting concerning the REACH Restriction on PFAS and its relevance to F-gases.

EFCTC is currently working on activities aimed at the generation and collection of information on F-gases to be provided in the context of the restriction process, and we would welcome an opportunity to share with you and your team in more detail what is being done by the group, and to receive your feedback.

I would tentatively propose an online meeting in the coming weeks, depending on your availability.

Should you have any questions, please do not hesitate to reach out.

Thank you in advance.

I wish you a lovely weekend.

Kind regards,

5.1.2e
