Chicago Ill.

apparent

apparent

I have had a recent letter from
you enclosing a copy of your letter
in regard to the death of Mrs.
[redacted] and I am writing
to you to learn your opinion, and
the work as far as our part. Since it
is apparent that the inhalation of
Carbon Monoxide was a large factor
in the case, and since some of the
medical consultants ~~is~~ considered Ethyl
Gasoline as a cause of the Williams
condition, I am wondering if it would

KE 0022002

N 24393

matter and time give more weight to
the lay opinion in this case.

Honorable, ~~I would be glad to hear your~~

~~opinion~~ I am interested to

know what you consider most
helpful to do -

Very truly yours
