

Load (continued)
maximum, 452
radiation, 452
Louver fences, 227

M

Machinery,
as heat source, 150, 165
sound insulation of, 337
Magnesia insulation, 673
Manometer, 780, 794
Masonry materials, heat transmission through, 107
Mass, 794
Mb, 601, 794
Mbh, 601, 794
Mean radiant temperature, 705, 708
Mechanical,
draft towers, 230
equivalent of heat, 802
refrigeration, 35
ventilation, 79
warm air furnace systems, 427
air distribution, 431
design of, 434
register and grille locations, 431
Metabolism, 57, 77
Meters,
choice of, 696
condensation, 697
fluid, 696
Nicholls heat flow, 785
steam flow, 698
types of, 696
water, disc, 651
Methyl chloride, 40, 225
Metric units, 803
Micron, 307, 794
Mixture, air and water vapor, 12
Modulating control, 279
Moisture, 681
content,
of air, 76, 195, 221, 727
of hygroscopic materials, 728, 743
internal, gradient, 734
loss by human body, 76
from outside air, 165
produced by cattle, 95
regain, 727
Mol, 794
Monitor openings, 88
Monofluorotrichloromethane, 41
Motive power, 761
Motors, electric, 761
adjustable speed, 762
adjustable varying speed, 762
alternating current, 761
capacitor type, 764
classification of, 766
compound wound, 761
constant speed, 762
control equipment for, 769
automatic, 770
manual, 769
multispeed, 772
pilot, 770
single phase, 774
slip ring, 773
damper, 277
direct current, 761
control of, 771
as heat source, 150
induction,
automatic start, 768
repulsion start, 764
slip ring wound rotor, 768
squirrel cage, 765
polyphase, 765
selection of, 395
series wound, 761
shunt wound, 761
single phase, 764
special applications, 769

Motors, electric (continued)
split phase, 765
synchronous, 769
varying speed, 763
MRT, mean radiant temperature, 705, 708

N

Natural draft towers, 229
Natural ventilation, 79, 85
Nicholls heat flow meter, 785
Noise (see also Sound)
air outlet, 354
in buildings, 334, 337
control of, 334
through ducts, 342
through room wall surface, 341
with warm air systems, 430
kinds of, 336
level,
acceptable, 335
of compressors, 207
of fans, 325
of unit heaters, 245
measurement of, 334
through building construction, 337
Nozzle, 217
air spray, 189
oil atomizer, 507
water spray, 221

O

Odors, 73
of human origin, 55
concentration, 74
removed by outside air, 75
Oil, oils,
atomization of, 463
burner, burners,
air for combustion, 508
air supply for, 507, 509
automatic, 512
boilers, 445, 447, 511
carbon monoxide produced by, 508
for commercial use, 512
control of, 290, 511
design considerations, 510
for domestic hot water supply, 512
for domestic use, classification, 507
efficiency of combustion, 510
flame with, 507
furnace requirements, 428, 433, 508
ignition, 507
installation, 509
oil consumption, 510, 521, 528
operation, 507
Orsat test, 510
specifications, 491
calorific value of, 492
classifications, 491
as corrosion inhibitor, 643
cost of, 493
heated electrically, 722
ignition of, 492
preheating, 512
specifications, 491
One-pipe steam heating systems,
gravity air-vent, 545, 549, 579, 591
down-feed, 549
up-feed, 546
vapor, 550
Openings,
air inlet, 88
monitor, 88
for natural ventilation,
location of, 91
resistance offered to flow, 92
size of, 85
types of, 86

Orifice, orifices,
friction heads, 612
steam heating systems, 559, 573, 583, 591
Orsat test apparatus, 510, 784
Outlets (see also Registers, Grilles)
design and location of, 359
Oxygen, 642
Ozone, 83

P

Paint,
effect on radiators, 535
spray booths, 390
temperatures and humidities for processing, 735
Partial pressures, Dalton's law of, 1
Perspiration, 55, 58, 77, 79
Petterson-Palmquist apparatus, 783
Pilot thermostat, 282
Pipe, piping, 623
bare, heat loss from, 669
bends, 585, 630
capacities (see *Pipe, Sizes*)
coil radiators, 633
conduit, 689
connections, 586, 692, (see also *Connections*)
copper, 624
corrosion of, 642
dimensions of, 624, 669, (see also *Pipe, Sizes*)
down-feed systems, 548, 549, 550, 552
expansion of, 585, 627, 689
fittings, 632, (see also *Connections, Fittings*)
for water supply, 650
welding fittings, 638, 669
flanges, 639, 669
flexibility of, 627
friction,
of air in, 365
heads in, 607
gaskets, 634
hangers, 632
heat loss from, 517, 669
for hot water heating systems, 601, 619
insulation of, 669
joints, 585, 689
leader, 412
radiators, 533
scale in, 642
sizes,
for boiler runouts, 588, 688
for central fan systems, 593
for convactor connections, 592
dimensions, 624, 627
for district heating, 688
for domestic hot water, 656
effects of variation of, 611
elbow equivalents, 607
equivalent length of run, 575
friction head, 608
of orifices in unions, 612
for Hartford return connection, 588
for hot water heating systems, 605
forced circulation systems, 606
gravity circulation systems, 613
for indirect heating units, 595
for pipe coil connections, 593
for radiator connections, 590
return, capacity of, 578
steam, 572, 576, 577
underground, 687
tables, 577, 627
tees, 635
for underground steam, 687
for water supply, 649
weights, 624
steam, capacity of, 674
for steam heating systems, 545, 571
supports, 632
sweating, 681
systems, down-feed, 548, 549, 550, 552
systems, up-feed, 546, 549, 552, 555
tax, 453
tees, dimensions of, 635
Pipe (continued)
threads, 631, 633
tunnels, 691
types of, 623
underground,
insulation of, 683
steam, 687
for unit heaters, 245
up-feed systems, 546, 549, 552, 555
valves, 638
water supply, 645
weights of, 624
welding, 634
Pitot tube, 780
Plastering materials, heat transmission through, 111
Plenum,
chamber, 795
systems, automatic control of, 280
Plumbing fixtures, 645
Pneumatic control system, 278
Pollution of air, 295
Polyphase motors, 765
Ponds, cooling, 227
Pool, swimming, 666
Positive acting control, 278
Potassium permanganate, 228
Potentiometer, 795
Power, 795
conversion equations, 801
electric, 724
supply,
railway air conditioning, 406
Precipitators, dust, 302
Pressure, pressures,
absolute, 787
air,
in heating unit, 172
measurement of, 780
atmospheric, 777, 789
for atomization, 222
automatic control, 277
barometric, 467, 777
basic, 3
conversion equations, 801
drop, formula for, 688
dynamic, 791
gage, 777, 792
loss through ducts, 363
measurement of, 777
partial, Dalton's law of, 1
refrigerating plant, 255
of saturated vapor, 12
static, 182, 796
steam,
in direct heating, 688
drop, 548, 572, 577
initial, 572
in orifice systems, 559
saturated, 28
in sub-atmospheric systems, 558
total, 797
vapor, 31, 798
velocity, 798
water, 27, 649
Processing, 727
cooling systems, 198
industrial, temperatures and humidities for, 734
of textiles, 729
unit heaters, 246
Propeller fans, test code for, 320
Psychrometer, 795
slang, 782
Psychrometric,
chart, 25, 64, 65, 66, (back cover)
for dryer, 746
explanation, 25
tests, 63
Pump, pumps,
circulating, 603
condensation return, 562
heat, 50, 722
vacuum, 562
ratings of, 562
