Dear John:

Fillmont Landfill is in its final lift. We are perhaps 1½ years away from having another UCC owned landfill. We have some tentative plans, but these are being delayed by pending State and Federal legislation. For this reason, we should immediately take action to prolong the life of our inert dump site.

Please inform your involved personnel of the need for this action. Divert as much material as possible to the Kanawha County Landfill at Tyler Mountain.

Kanawha County Landfill can receive paper, cardboard, wood, construction and demolition rubble, and garbage - but absolutely - NO CHEMICALS. Anything relating to or contaminated with chemicals will violate our contract.

Fillmont should continue to receive our asbestos, inert plastics and bottom ash for cover.

With the cooperation of all parties I feel we can prolong the life of Fillmont until mid-1981.

Very truly yours,

E. O. Lewis
