HOUSE PAINT

Dazzling white... year after year! That's how your home will look because Du Pont House Paint actually cleans itself... sheds dirt and dust with every heavy rain! Normally, this "self-cleaning" process starts within a few months. However, excessive mold or heavy shade or stains from rust, such as swimming pools, may interfere with or delay this process.

Treat your house to this long-lasting beauty. Specify "Self-cleaning" Du Pont House Paint in white or popular tones. Your Du Pont dealer or painter will be glad to tell you how the "Self-cleaning" process works in your area. And where the surface is new wood or badly weathered paint, start with a coat of Du Pont House Paint Primer. It assures maximum adhesion of the finish coat. For best results ask your Du Pont Paint dealer to recommend a reliable painting contractor.

Save the Surface and You Save All!

Fading no problem now!
