Kettering Laboratory of Applied Physiology
College of Medicine
Eden Avenue
Cincinnati 19, Ohio

Dear Dr. Kehoe:

Confirming our recent telephone conversation, a meeting to discuss an investigation of toxicity problems connected with handling methanol-water-tetraethyl lead solutions will be held in Cleveland on April 20, 1948. The following companies have promised to send representatives to this meeting:

Allied Oil Company, Inc.
E. I. Du Pont de Nemours & Company, Inc.
Ethyl Corporation
Shell Oil Company, Inc.
Standard Oil Company of Ohio

On the morning of April 20, it is our plan to offer the visitors an opportunity to look over our Vita-Meter laboratory work and also to make a tour through the Tapco plant where aircraft parts are produced. The morning's activities will be followed by lunch and the meeting at the same plant.

You and your associate may wish to observe our laboratory activities, call at the Standard Oil Company of Ohio to observe their fleet operation and also at the Yellow Cab garage where preparations are being made to use Vita-Meters. This could be done the morning of April 20th or on Monday, April 19th. We will make our arrangements to suit your convenience and will await your advice to make our plans. If we can be of any help on the problem of getting hotel accommodations or travel reservations, please feel free to request it of us.

With best regards,

Sincerely,

C. H. Van Hartesveldt
