To: Ron Martin

Subject: Geon 86503 Contamination Corrective Action

Considering the contamination problem with Geon 86503 and the fact that the last audit of our compliance with FDA Good Manufacturing Practices (GMP's) was in 1987, I would like to schedule a site visit for the Louisville facility in the near future. Please call me so we can make arrangements.

In order to assist you in your efforts, I am enclosing copies of GMP's guidelines and the report from the last site visit.
