

Curtis Refrigerating Machine Company

Division of Curtis Manufacturing Company

St. Louis, Missouri

* Double Tube Type

High efficiency, double tube counter flow condenser, multi-banked for low pressure drop.

Shell and Tube Type

Dual shell and tube condensers permitting series of parallel operation to suit every condition.

SOME FEATURES OF CURTIS UNITS

The Curtis "Centro-Ring Positive Pressure" oiling system assures proper lubrication without dependence on gear or plunger type oil pump. Only one simple moving part.

Timken tapered roller bearings.

Water jacketed heads and cylinders.

Each unit equipped with built-in oil separator with automatic return.

Balanced syphon bellows seal.

Efficient drop-forged, heat-treated crankshaft and connecting rod construction.

Stainless steel disc type suction and discharge valves.

Automatic water valves.

Extra large water-cooled condensers.

Compressors of proven "V" type radial design.

CURTIS builds a complete line of condensing units for every air conditioning and refrigeration requirement, up to 30 tons inclusive. Every Curtis unit reflects 83 years engineering, designing and manufacturing experience, over 43 years of this specializing in building of fine compressors.

CURTIS also builds dual compressor units in capacities above 20. hp., providing automatic capacity control for variable air conditioning loads.

There is a Curtis unit for every purpose—from fractional tonnage capacity up to 30 tons, for Freon or Methyl Chloride.

AIR CONDITIONING WITH
FRICK REFRIGERATION

Fourteen Stories of this Building at 28 East 40th Street, New York City, are Air Conditioned with Frick Freon-12 Refrigeration

Is the term applied to our service in supplying refrigerating equipment and engineering assistance for complete air conditioning jobs, which are handled by Frick Branches and Distributors—located in principal cities throughout the world.

Estimates cheerfully submitted. Get data on special Frick air conditioning systems arranged for automatic direct-expansion operation. Economical, safe, highly satisfactory: let us refer you to typical installations. Ask for Bulletins 504 and 512.

FRICK FREON-12 REFRIGERATION

Includes the most complete line of enclosed type Freon-12 compressors. Large capacity, ample gas passages, pressure lubrication from internal pump, patented FLEXO-SEAL at shaft. Coils, coolers, condensers and controls for Freon-12 systems. Bulletin 508.

15-Ton Freon-12 Unit for Air Conditioning Work

Frick Enclosed Freon-12 Compressor

Enclosed Type Ammonia Compressor

Low Pressure Compressor for Carbon Dioxide

Low Pressure Refrigerating Unit

AMMONIA REFRIGERATION

Machines in all capacities from 1/2 ton up. Combined units, vertical enclosed type compressors, horizontal machines: complete high and low sides. Widely used for air conditioning. Bulletins 102 to 138.

The Standard Carmel Company of Lancaster, Penna., has used Frick Ammonia Refrigeration for Air Conditioning Since 1910

CARBON DIOXIDE
REFRIGERATION

Six sizes of enclosed CO₂ compressors: smooth running, efficient and reliable machines; condensers, coolers, etc. Bulletins 118 and 124.

LOW PRESSURE REFRIGERATION

The World's Largest Air Conditioned Storage Room, at Vernon, Calif., is Cooled with Frick Refrigeration

Commercial units in more than 50 sizes and types, with motors of 1/4 to 30 hp. Charged with Freon-12 or methyl chloride. Air and water cooled condensers. Finned coils, fan and blower units, ice cube and beverage coolers, etc. Bulletins 97 and 98.
