Attachments: Pentagon June 16 2016 Webinar J Field.pdf

John/Katie,

See attached for the slides used in last Thursday's SERDP brief (mentioned in Paul's email below).

This might come into play for Paul's agenda item about definition and clarification of terms (e.g., "PFOA based" versus "containing PFOA").

v/r,
Dan

John/Katie,

FYSA on a meeting this Wednesday from 0930 to 1200. It's at Ft. Belvoir, but there is a call-in number on the attachment.

It would probably be beneficial if one or both of you could participate.

v/r,
Dan

Colleagues: See agenda with room, time, and call line. I added a discussion about definition and clarification of terms (e.g., "PFOA based" versus "containing PFOA").

Please distribute as necessary to any other attendees. Paul

Subject: AFFF Meeting Agenda for 22 June

Colleagues: See attached skeleton agenda for the 22 June AFFF meeting. Please add any items or specificity that you deem appropriate and get back to me by COB Friday. Thanks. Paul

Notes:

- There is a separate SERDP webinar today at 1300 to discuss Jennifer Field's research regarding PFCs in AFFF. Thus, we won't be covering this in any detail at the 22 June meeting. We can attach her briefing to the agenda if deemed valuable.
- At the time we wrote the ECGC memo, we were focused on legacy PFOS-based AFFF. We later learned of PFOA-based

AFFF still on the QPL. Overall objective is phased removal of all PFOS/PFOA based AFFF from supply system. We realize that the marketed "C6" (telomere) AFFF products still may contain traces of PFOA (efforts underway to determine how much).
