

HENRY VOGT MACHINE CO.

10TH AND ORMSBY, LOUISVILLE, KY.

BRANCH OFFICES: NEW YORK, PHILADELPHIA, CHICAGO, DALLAS, CLEVELAND

Manufacturers of Water Tube and Horizontal Return Tubular Boilers, Oil Refinery Equipment, Absorption and Compression Ice and Refrigerating Machinery, Drop Forged Steel Valves and Fittings

VOGT WATER TUBE BOILERS:

Vogt Water Tube Boilers are of both the straight tube and the bent tube types. Both have been developed in accordance with the following principles of correct boiler design:

Vogt Class R Three-Drum Curved Tube Boiler

High velocity, unrestricted and positive water circulation.

Flexibility of operation at high efficiency.
Relief of expansion and contraction stresses.
Ease of inspection, cleaning and repair.
A.S.M.E. Boiler code construction.

Vogt Class M Four-Drum Curved Tube Boiler

Other Types:

Class S Box Header Straight Tube Type.
Class W Vertical Curved Tube (for Waste Heat).
Write for Bulletins.

TRADE-MARK

REFRIGERATING AND ICE MAKING SYSTEMS:

Vogt Absorption System: The HENRY VOGT MACHINE CO. has for fifty years manufactured the Vogt Absorption Refrigerating and Ice Making Machine. Exhaust steam is used as the source of power in the generator; steam that is ordinarily wasted is thus utilized and the cost of operation is reduced to a minimum.

Vogt Exhaust Steam Absorption System

Vogt Compression System: The Vogt Compression System ranges in size from 5 tons ice or, 12 tons daily refrigeration capacity to any required capacity. The power source of the compressor may be steam, direct connected or belted electric motor or oil engine.

For raw water ice making, either high pressure or low pressure air agitation equipment will be furnished. The condensers, brine coolers, coils, freezing tank and other equipment are similar to that used in the Vogt Absorption System.

Vogt Compression System

Vogt Refrigeration Engineering Service: The Vogt organization will gladly and freely lend its experience to the solution of refrigeration problems and aid in selecting the type of machine (absorption or compression) local conditions require.
