Dear Sir:

Attached are personnel sampling results for asbestos on Brown and Root employees working at the EA Plant. The personnel sampling includes measurement of the long-term or eight-hour time-weighted average (TWA) exposure. The results of short-term (ca. 15 minutes) ceiling measurements which are typically collected during specific work tasks may also be included.

We appreciate the cooperation of your employees for participating in this important endeavor. We encourage you to communicate these results to your personnel.

If you have any questions, please contact me at 476-7374.

Sincerely,

A handwritten signature in cursive script that reads "P.J. Snyder".

P.J. Snyder
