

December 11, 1973

BULLETIN NO.: A-73-02

SUBJECT: New Brake Lining Catalog and
O.E.M. to F.M.S.I. Interchange List

Enclosed are copies of new Abex publications as follows:

- (A) No. 173 Abex Brake Lining Catalog. Pages 2,3 and 4 of this new Catalog are devoted to an explanation of how to use the Catalog. Lining identification is extremely important in today's Heavy Duty Brake Lining Market, due to many axle options on the same type vehicle. A quick review of our Catalog Orientation Section will make block identification much easier. Your normal Catalog requirements are enroute.
- (B) Form 1073CS - O.E. to F.M.S.I. Interchange List. Don't miss sales in 1974 because you cannot interchange popular O.E. part numbers. Use our new O.E.M. to F.M.S.I. Interchange.

Additional copies of these new publications are available from your Abex Warehouse.
