

1 Q Are you aware of any recommendations as to
2 the use of asbestos products that OCF made, that
3 Owens-Corning Fiberglas made?

4 A I don't know that they made any
5 recommendations.

6 Q Okay.

7 Now, you talked about eight or nine, I think
8 I counted eight or nine articles that we discussed in
9 the literature from the period of 1930 up until around
10 1970?

11 A Probably.

12 Q Is that fairly accurate?

13 You would agree with me that before 1965
14 there were probably about five to six or 6 to 700
15 articles; isn't that correct?

16 A I am sure there were.

17 Q And you would agree with me that those
18 articles were published in the medical and scientific
19 literature because that is the kind of articles that
20 you reviewed, correct?

21 A That is correct.
