Hi Hayden,

Please reach out to NOAA.

Hi Enesta,

I hope your week is off to a great start! Hayden Field here again, journalist in NYC -- it's great to connect with you again, and thank you as always for your help over the last couple of years.

I'm currently working on a piece about Barney and Robert Swan, explorers and climate change activists, for a new publication. The two founded 2041, an organization that serves to educate the public about conservation (named for the year in which the moratorium on mining in Antarctica is to be re-negotiated).

I'd love to talk with someone at the EPA about why this issue is so important not just for Antarctica but for the world -- and the future of the environment as a whole. Would also love to discuss any other climate change research you deem important.

Would anyone be free to chat about this via a brief phone call anytime this or next week?

Let me know, and thanks so much!
