GLATEX ASBESTOS CEMENT SIDING

When you compare Glatex with ordinary Asbestos Cement Siding, there's as much difference as between a common flower pot and a glazed piece of porcelain. Glatex retains its original freshness longer, repels water, defies fire and can be cleansed from ordinary surface grime by simply washing with soap and water. Glatex beauty is enhanced by a deeply indented wood grain effect. Glatex siding is 27" long which means less joints, faster application and tighter walls. It never needs paint and provides "life-long" service.

Apply dirty oil or grease

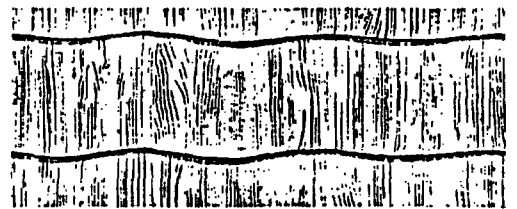

Wipes off without penetrating surface

Surface is restored—no stains remain

NO. 950 CLAPBOARD SIDING

Dimensions: 12" x 27" x 5/32"	Finish: Idealized Wood Grain

YOU AND U-S-G RESEARCH!

Today, in U-S-G Research Laboratories, new products are being developed for you. One notable contribution of this large research organization is GLATEX® Asbestos Cement Siding. Compare GLATEX with ordinary siding. You'll find there's as much difference as between a common

flower pot and a glazed piece of china. That's why GLATEX retains its original freshness longer, repels water, resists fire. Ordinary dirt can be removed by simply washing with soap and water. Look to U-S-G Research Laboratories for still newer developments in better building products.

in

COLORS

Better be ready—to fill your orders for time-proved GLATEX . . . now in three most-preferred, soft-hued colors. Never any need to paint; color lasts the lifetime of the house because it's fused under high temperatures into the ceramic surface. As always, GLATEX has the china-like glaze finish that washes like a dish.

GLATEX in colors (and popular Satin White) gives you an exceptional opportunity for extra profits in the re-siding market. Be ready when you're asked for GLATEX. For years it's been known as America's aristocrat of asbestos cement siding—now, with lifetime colors, it's heading for new heights in popularity!
