TO Zeb Bell

DATE August 26, 1975

FROM H. B. Lovejoy, M.D.

SUBJECT Medical Surveillance of
VDCM Workers

I have reviewed Dr. Romayne's recommendations concerning medical surveillance of VDCM workers and do concur with his recommendations.

I have a little hesitancy in recommending routine liver scans, as I mentioned previously, because of the cost (\$100 per person); but I recognize that this is a good way to diagnose certain liver diseases.

Since many of the organizations are left to the discrepancy of the medical administration of each organization, we can evaluate this at a later date.
