G. D. Ferrance - Waukegan

84-S Sheet

You have received a copy of Dr. Halstead's letter to me of May 24th with reference to the subject material.

I understand now that we have run about 1,000 lbs. of this material in 1/16", 1/32", and 1/8" thicknesses.

Will you, therefore, ask the proper people at Waukegan to pick up all orders on the factory for 84-S sheet and promise them immediately to the districts involved. It will have to be handled in this manner because, of course, we have no record of orders on the factory in this office, and it will be necessary that the matter be handled completely by Waukegan.

Will you also please advise this office as to whether or not we can now notify the districts that we are out of the woods in connection with this material.

For your information, we are being pressed daily for an answer, and I would appreciate prompt handling of the matter.

H. R. Foulson
