

3. Disposal of asbestos waste (Continued)

- On occasion, as determined by supervision, special containers other than dumpsters may be used to dispose of asbestos scrap providing it is properly identified, dampened down and covered or else bagged and tied (and properly labeled).
- Asbestos waste is not to be placed in dumpsters other than those marked for this specific purpose.
- All asbestos waste is to be disposed of in the solid waste fill area --- it is not to be burned with other waste.

4. Hygienic rules to be observed:

- Materials that are placed in the mouth, such as food, gum and tobacco should not be carried on the person or consumed in an area where asbestos dust is present.
- Work clothes, contaminated with asbestos dust, should be dusted off prior to coffee-break, lunch and quitting time (wear a respirator when doing this).
