The W. G. Krummrich Plant plans to shut down their PCB incinerator by October. If your plant has any PCB's or PCB contaminated fluids that should be incinerated, make arrangements for them to be shipped soon enough to arrive at WGK before the end of August.

Contact Clifford R. Field of Central Order Processing at (314) 694-3334 for working out details.

Maurice + Earl:

Please note above.

It is my firm understanding that we returned all Terminal and the flushings to the Saugh incinerator years ago; and there is none on the premises. Please confirm. Or, if I'm wrong let's take action. Ernie 6/27
