VCM Personnel Monitoring
Solvent Vinyl Resins

Dear Ken:

Attached are the results of personnel monitoring for VCM in your area for the week beginning March 10, 1975. Borderline or excessive levels for both Emergency Temporary and Permanent Standards are listed below:

EXCURSION SAMPLES

Bldg. 115	3-12-75	Sims, A. W. - Sampling Autoclaves	176.34 ppm **
		Sims, A. W. - Analyzing Autoclaves	119.37 ppm **

TIME-WEIGHTED AVERAGE SAMPLES

Bldg. 114	3-11-75	Remmers, G. H. - Distillation Oper.	1.83 ppm
Bldg. 115	3-11-75	Werner, S. H. - Autoclave Operator	20.7 ppm *
Bldg. 117	3-11-75	Jenkins, J. M. - Stripping Operator	1.77 ppm
	3-14-75	Rex, C. R. - Pipefitter	1.22 ppm
		Rios, B., Jr. - Laborer	1.86 ppm
		Roberson, R. W. - Electrician	2.43 ppm

The employee should be notified of his exposure levels above 50 ppm and of the corrective action being taken.

Please contact us if there are any questions.

Very truly yours,

UCC 091282

D. E. Deese
