Subject: CARLISLE ISSUE

November 17 Carlisle will no longer produce asbestos brake lining. Navistar is still using asbestos as a standard spec.

I need you to clarify with Navistar the need to either move to NAB or to release brake quantities so we can protect Navistar. If we were to be selected as standard supplier we need again to review quantities of asbestos to protect Navistar.

Would you please review this matter with Navistar Purchasing and Engineering at the highest level so they are aware of the issue.

Follow to conclusion.
