

DOES YOUR ROOF HAVE "WIND JITTERS"?

That's one sure sign of danger -- roofs that shiver and shake every time the wind blows. You don't look up then -- you don't see signs of trouble. But some neighbor may, later, when he finds loose shingles in his yard. You learn the sad news when you discover a discolored wall or ceiling -- then start to investigate ... after it's too late.

Why not check up today to find out if your roof has the "wind jitters?" A close inspection will reveal any danger spots that may be there, so you can give it the attention it should have. It may be that only a few repairs are needed. Or, you may need a new roof.

Certainly a new roof will change the whole appearance of your home. Our roofs add a rugged beauty you will like and that neighbors will admire. -- But that's not all. You will have greater safety from fire. Insurance companies actually give you a lower rate for a fire-resisting roof of U.S.G.* Asphalt Shingles.

In addition, you are assured of a durable, long-life roof that should end all worries at about wind and weather. Here's an investment in safety and added value for your home. The job can be done quickly and you can pay for it on easy monthly payments. Send the card below today. We pay the postage.

You Can Repair and Reroof Now

The government recognizes that needed roof repair and replacement protect the home front and improve valuable property, and approves any such expenditures made... without restriction. Make these repairs now, and avoid the fall rush.
