DOCUMENT DESCRIPTION: 1971 Letter to Chicago Commissioner of Environmental Control from TF Egan regarding Mono-Kote Type IV

bcc: J. N. Beveridge
R. S. Howe

175011

May 4, 1971

Mr. H. W. Poston, Commissioner
City of Chicago
Department of Environmental Control
320 N. Clark Street
Chicago, Illinois 60610

Dear Mr. Poston:

This is to certify that Mono-Kote Type IV, plaster (cementitious) spray fireproofing, as manufactured by Construction Products Division, W. R. Grace & Co., contains Gypsum, Vermiculite, Cellulose and Air Entraining Agents.

Examinations and analysis of this product have been made by Arthur D. Little, Inc., and classify chemical species and particle size. They attest that no asbestos fibers were observed in any samples examined.

The listed ingredients of Mono-Kote Type IV have a long history of use. In fact, both vermiculite and cellulose have been used in food processing and/or feed systems for animals and have been granted the necessary approvals of food and drug agencies. Should further data be necessary, including the A. D. Little report, please advise.

While this data is given freely at your request, it is requested that it be treated as confidential and proprietary.

Yours truly,

Thomas F. Egan, P.E.
Manager, Fireproofing Products

TFE/jac

Sworn to and subscribed before me,
