

Safe . . . when it's Red-Leaded

SAFE from rust . . . from destruction! And steel-work protected by pure red-lead paint requires a minimum of maintenance work. This paint provides sure protection against corrosion . . . safeguards the strength and life of steel structures . . . lasts for a remarkably long time.

Engineers and others who have studied paint for metal know that three coats of pure red-lead give lasting protection . . . provide a film unexcelled in rust-proofing qualities.

Fine, uniform, highly oxidized, there is no better red-lead

obtainable than Dutch Boy red-lead. It comes in two forms . . . paste and liquid. The liquid (ready for the brush) is supplied in six colors—natural orange-red, light and dark brown, light and dark green, and black. The paste comes in natural orange-red and can be shaded to dark colors.
