

4. ASEA acknowledges the receipt of the handling precautions for Monsanto's PCB-containing products enclosed in the letter from Monsanto dated 30th March 1972.
5. ASEA agrees to the request of Monsanto to pass on to ASEA's customers such knowledge of the possible dangers of PCB's as Monsanto shall bring to the attention of ASEA from time to time.

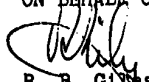

It is realised that our statement does not accord precisely with the undertakings which you sought from us but we feel it accords in principle with your request.

We share your concern that use of PCB-containing materials should be closely controlled to protect the environment and we can assure you of our continued co-operation in this matter.

Yours faithfully,
ASEA ELECTRIC (AUST.) PTY. LTD.

FRED F. RUEGG,
Managing Director.

ON BEHALF OF MONSANTO AUSTRALIA LIMITED

R. B. GIES
Marketing Manager, Chemicals.
