Clayton, Missouri 63105

Dear Gary:

Thank you for your letter of September 25, 1978 regarding topics for the 1979 IHF Engineering Discussional. I have a few suggestions that I hope will be useful.

1) Engineering controls for industrial hygiene problems at mobile worksites to reduce airborne contaminant levels.

2) Engineering controls for environmental exposures to asbestos in office buildings.

Let me know if there are any details on these proposals that I can help you with.
