FILE NAME: Montello (MNT)

DATE: 0000

DOC#: MNT026

DOCUMENT DESCRIPTION: Barry Castleman Notes on Montello

Montello — from Maney 1/11 6:46

Montello was exclusive seller of drilling muds for UCC to petroleum ind.

1972 memo says Super Visbestos "wet refined"

granular material less dusty than fine ground material (#2)

MSDS 772 - no info on health effects of dust

7/24/72 specifics of dustless asbestos for drilling muds needed

8/73 Technical Data (Montello doc.) refers to a report on asbestos health angle, emphasizes OSHA compliance with "crushed or new granular Super Visbestos"

5/25/76 Dresser att. runs article on perils of A asks for literature to relieve health concerns

3/12-14/75 Dust counts show UCC and Shell data with exposures up to 8.3 f/cc

10/8/80 Carbide memo notes Montello concern over liability (#2)

Montello "Univis and Super Visbestos" notes OSHA PEL is 2.0 f/cc

- OSHA requirements "should not apply" since exposures are below PEL ("can be safely used ... w/o exceeding OSHA PEL")
