Subject: RE: Follow-up I Heat decarbonisation Action plan

Dear Anne Katherina,

Thank you very much for your email!

You will find enclosed our recent contribution to the Heat Pump Action Plan consultation, which aligns with the conversation we had during the meeting.

Large heat pumps are instrumental to harvest clean and local heat sources distributed via district heating and cooling networks (DHC): solar thermal and geothermal energy, waste heat from industry and tertiary sectors, lowering and upgrading to the required temperature level for the use. [They are getting increasing traction in our industry!](#)

However, heat pumps are not isolated units: they are part of an **energy ecosystem with an underlying infrastructure (electricity or heat networks), and a diversity of supply sources. Supporting the sustainable growth of this ecosystem is therefore essential to scale up large heat-pumps in Europe.** It includes the financing and de-risking of efficient heating and cooling networks, as well as the uptake of renewable and clean heat sources.

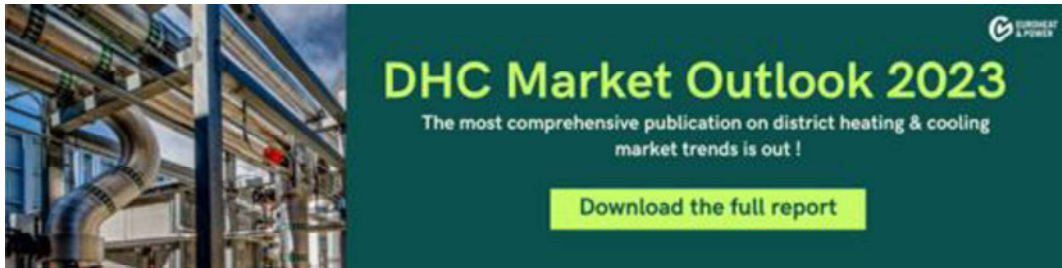

We remain at your entire disposal to discuss this in more details.

In the meantime, wishing the whole team a wonderful weekend!
Best regards,

[REDACTED]

Objet : RE: Follow-up I Heat decarbonisation Action plan

Dear [redacted],

Thank you very much for your message and for presenting the “EU Action plan for heat decarbonisation” to us!

Europe needs decisive actions in the heating and cooling sector and the action plan is affirmative and inspiring in this regard.

Happy to stay in touch!

Kind regards,

Anne

Anne Katherina Weidenbach
Cabinet of Ms Kadri SIMSON
Commissioner for Energy

European Commission

Subject: Follow-up I Heat decarbonisation Action plan

Dear Commissioner Simson,
Dear members of the cabinet and team,

On behalf of [Euroheat & power](#) and the 10 organisations represented yesterday, I would like to sincerely thank you for your time and the valuable exchanges we had.

Please find attached the presentation made during the meeting, as well as the proposed “**EU Action plan for heat decarbonisation**” developed by the coalition.

We welcome your suggestion to insert concrete proposals on de-risking instruments within the Heat-Pump action plan, and we will come back to Anne-Katherina very soon with feedback.
We look forward to pursuing this exchange and wish you all a great week!

Best regards,

[REDACTED]
