To: All Members of the Lead Health and Safety Committee

Re: Glucose-6-phosphate dehydrogenase and lead exposure

As was requested at our last committee meeting, we enclose for you the available material on the relationship of glucose-6-phosphate dehydrogenase and lead exposure. This information has been made available to us by Dr. Stoppe of the Haskell Laboratories.

In addition, there is a general article which appears in the September 1966 issue of Public Health Reports on page 797 entitled, "Glucose-6-Phosphate Dehydrogenase Deficiency in Project Head Start Children" by Sally Kelly and Rydia Almy.

Very truly yours,

Don U. Fowler
Project Manager
