

IN THE CIRCUIT COURT
FOR THE TENTH JUDICIAL CIRCUIT
JEFFERSON COUNTY, ALABAMA

CLARENCE ERVIN ALVERSON,
et al.,

Plaintiffs,

vs.

WILLIAM H. BEASLEY, et al.,

Defendants.

Civil Action No. CV96-00700-TAW

INTRODUCTION

Lac d'Amiante du Quebec, Ltee (LAQ) responds to these discovery requests only on behalf of itself and not on behalf of its parent or subsidiaries, which are distinct and separate corporate entities.

LAQ states at the outset of answering the within discovery requests that it does not now and never has manufactured any asbestos-containing products. During the relevant time period and otherwise, LAQ mined, milled and sold raw chrysotile fiber only.

In answering any of the within discovery requests which speak in terms of "products containing asbestos fibers" and/or "asbestos products," this defendant is in no way admitting its raw asbestos fiber is a "product" within the meaning of any particular legal theory, including but not limited to Restatement (Second) of Torts § 402A. In fact, LAQ denies that raw chrysotile fiber is an "asbestos product."

Unless otherwise indicated, the answers to the within discovery requests are being made in regard to LAQ's North American business operations during the time period of the operation of the Capco Ragland plant (referred to hereinafter as the "relevant time period") and in accordance with applicable American and Canadian statutes and judicial decisions.

A. General Requests

1. Identify each person who has supplied information used to respond to any discovery requests set forth herein.

As answers to this set of interrogatories have been compiled over a period of several years, it is quite impossible to list the name of each and every person who has supplied information used to respond to the discovery requests set forth herein. However, in an effort to respond to this question, information contained within certain answers to certain questions in this set of interrogatories was likely to have been secured directly or indirectly from former LAQ employees, including, but not limited to:

**Clement Bernier;
Yvonnick Bolduc;
Edward Farrell;
Roland Gagnon;
Andre Gauthier, (deceased);
Michael Messel;
Lionel Piuze, (deceased); and
Gaston Verreault**

2. Identify each person who has participated in the preparation of your responses and/or objections to any discovery request set forth herein.

Please see answer to A1. In addition, counsel retained to represent Lac d'Amiante du Quebec, Ltee (LAQ) has assisted in the preparation of these responses.

3. Identify each person signing these discovery requests on your behalf.

Carmen D. Gonzalez, Assistant Secretary of Lac d'Amiante du Quebec, Ltee;

LAQ's response to the requests to produce and requests for admissions are being signed by persons retained as legal counsel for LAQ, according to the Alabama Rules of Court.

4. Identify each person who has knowledge or information (a) which concerns the subject of this lawsuit and/or (b) which is responsive to any discovery request herein.

As this litigation is in its early stages and discovery is ongoing, LAQ has yet to learn the identity of many individuals who have knowledge which concerns the subject of this lawsuit or is responsive to any discovery request. However, LAQ believes that the following persons may have knowledge or information concerning the subject of this lawsuit or is responsive to the discovery requests. LAQ reserves the right to amend or supplement this list as discovery develops:

5. Identify and produce each and every Document and/or Object requested in any discovery request set forth herein, identified in response to any such discovery request, or which bears on the responses to any such discovery request, together with all Documents and Objects evidencing, referring, or relating in any way thereto.

See documents provided by LAQ in response to specific discovery requests.

B. Defendant's Identify and Affiliates

1. State your correct legal name, and each name you have used to conduct business.

Lac d'Amiante du Quebec, Ltee. Prior to 1978, LAQ's corporate name was Lake Asbestos of Quebec, Ltd. LAQ has not done business under any other name.

2. Admit or deny that Lake Asbestos of Quebec, Ltd. was incorporated in Delaware in 1952.

Admitted.

3. Admit or deny that in 1978, Lake Asbestos of Quebec, Ltd. changed its name to Lac d'Amiante du Quebec, Limitee.

Admitted.

4. Admit or deny that Lake Asbestos of Quebec, Ltd. and Lac d'Amiante du Quebec, Limitee are one and the same.

Admitted only that Lake Asbestos of Quebec, Ltd. is an English translation of the current French corporate name, otherwise denied. See also responses to B.1 and B.5.

5. Describe your structure and organization, including, without limitation: (a) the date, place, and nature of each organization (*i.e.*, as a corporation, limited partnership, general partnership, or other entity) and (b) whether, and, if so, when and for what reason, your legal status has ever lapsed or been terminated.

Lake Asbestos of Quebec, Ltd. was incorporated on September 17, 1952 in the state of Delaware. Lake Asbestos of Quebec, Ltd. changed its name to Lac d'Amiante du Quebec, Ltee in 1978. LAQ's corporate status has never lapsed or terminated.

6. Describe each merger or other consolidation relating to your organization, including, without limitation: (a) the identity of each entity which was a party to any such merger or other consolidation and (b) the date, place, and nature of any such merger or other consolidation.

None.

7. Identify and describe each of your predecessors, including, without limitation: (a) the date, place, and nature of organization of each such entity (*i.e.*, as a corporation, limited partnership, general partnership, or other entity); (b) whether, and if so, when and for what reasons, each such entity's legal status has ever lapsed or been terminated; and (c) the products, functions, and services each such entity provides or provided.

None. LAQ was a new corporation that assumed neither the rights, assets nor liabilities of any predecessor corporation, partnership or other business entity.

8. Identify and describe each of your successors, including, without limitation: (a) the date, place, and nature of organization of each such entity (*i.e.*, as a corporation, limited partnership, general partnership, or other entity); (b) whether, and, if so, when and for what reason, each such entity's legal status has ever lapsed or been terminated; and (c) the products, functions, and services each such entity provides or provided.

None.

9. Identify and describe each of your subsidiaries and divisions, including, without limitation: (a) the date, place and nature of organization of each such entity (*i.e.*, as a corporation, limited partnership, general partnership, or other entity); (b) whether, and, if so, when and for what reason, each such entity's legal status has ever lapsed or been terminated; and (c) the production, functions, and services each such entity provides or provided.

LAQ has never had a subsidiary which mined, milled, processed, sold or distributed raw asbestos fiber, or manufactured, sold or distributed any asbestos-containing products. LAQ currently has two wholly-owned subsidiaries. The first is Lake Asbestos of Quebec, Limited ("Lake"). Lake was incorporated in the state of Delaware on January 16, 1978, to preserve and protect the corporate name Lake Asbestos of Quebec.

In 1986, a wholly-owned subsidiary, Lac d'Amiante du Canada, Ltee ("LAC") was created, to which LAQ sold all of its mining assets in exchange for stock. LAC was one of four limited partners in a Quebec limited partnership the English translation of which is LAB and company limited. In August 1989, LAQ sold all of its shares of LAC capital stock to an unrelated Quebec numbered company, 2733-2915 Quebec, Inc.

In 1989, the second wholly-owned LAQ subsidiary, LAQ Canada, Ltd., was created to own and operate various Canadian mining properties and exploration prospects.

At one time, LAQ had a National Mines division, which mined chrysotile asbestos fiber. This division was created in October of 1973 when LAQ purchased certain assets of National Asbestos Mines, Ltd. The operation of the National Mines division ceased in October, 1984. The assets that comprised the division were sold to LAC in 1986.

10. Identify and describe each of your parents and holding companies, including, without limitation: (a) the date, place, and nature of organization of each such entity (*i.e.*, as a corporation, limited partnership, general partnership, or other entity); (b) whether, and, if so, when and for what reason, each such entity's legal status has ever lapsed or been terminated; and (c) the products, functions, and services each such entity provides or provided.

LAQ is a wholly-owned subsidiary of ASARCO Incorporated. ASARCO was incorporated in the state of New Jersey in 1899 as the American Smelting and Refining

Company. Its name was changed to ASARCO Incorporated on April 22, 1975. ASARCO primarily has been in the business of mining, smelting and refining non-ferrous metals, including, but not limited to, copper, lead and zinc. ASARCO's legal status has never lapsed or been terminated.

11. Identify and describe each of your affiliates and other related entities, including, without limitation: (a) the date, place, and nature of organization of each such entity (*i.e.*, as a corporation, limited partnership, general partnership, or other entity); (b) whether, and if so, when and for what reason, each such entity's legal status has ever lapsed or been terminated; and (c) the products, functions, and services each such entity provides or provided.

LAQ is a wholly-owned subsidiary of ASARCO Incorporated. ASARCO Incorporated is a publicly-held corporation, and, as such, publishes a list of its subsidiaries in its annual 10-K statement filed with Securities and Exchange Commission. Most of the subsidiaries set forth on that list, over 120 domestic and foreign companies, could be considered "affiliates" of LAQ, as that term is sometimes used.

12. Identify and describe each entity for whose actions you have assumed liability or been adjudged liable as a successor-in-interest at any time.

None. LAQ assumed neither the rights, assets nor liabilities of any predecessor corporation, partnership or other business entity.

13. Identify and describe each entity who or which has assumed liability or been adjudged liable as a successor-in-interest for your actions at any time.

None.

14. For each business entity which you have ever acquired and which engaged in any Asbestos-Related Business, describe in detail: (a) the nature of the interest you acquired; (b) the manner in which the interest was acquired (stock, purchase, asset purchase, merger, liquidation, or sale, etc.); (c) the date the interest was acquired; (d) the former name, address, and telephone number of the entity acquired; (e) the current name and designation within your organizational structure for the entity; (f) the date of any subsequent disposition of all or any part of the Asbestos-Related Business of the entity; and (g) the name, address and telephone number of the purchaser or other acquirer of such Asbestos-Related Business.

In October of 1973, LAQ acquired certain assets of National Asbestos Mines, Ltd. in an assets only purchase. In this connection, LAQ in particular, did not purchase the National Gypsum name or the "Gold Bond" trademark or the rights to use them. Beginning in October 1973, LAQ mined chrysotile asbestos fiber from the property sometimes referred to as the "National Mine," which it operated as the National Mines Division of LAQ. In October 1984, LAQ ceased the operation of the National Mines Division. Among the assets which LAQ sold to LAC in 1986 were the assets which had

comprised the National Mines Division. In 1989, LAQ sold all of its stock in LAC to 2733-2915 Quebec, Inc.

15. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to: (a) your structure and organization; (b) each merger and/or other consolidation relating to your organization; (c) your predecessors; (d) your successors; (e) your subsidiaries and divisions; (f) your parents and holding companies; (g) your affiliates and other related entities; (h) each entity for whose actions you have assumed liability and/or been adjudged liable at any time; (i) each entity which has assumed liability and/or been adjudged liable for your actions at any time; and (j) each entity which you have ever acquired and which engaged in any Asbestos-Related Business.

See documents regarding LAQ's structure and organization produced in response to this discovery request.

C. Defendant's Business and Trade Associations

1. Identify and describe each relationship you may now have or have in the past had with any entity described in the Complaint, including, without limitation: (a) the exact nature of the relationship and (b) the dates on which the relationship began and terminated.

Defendant LAQ had a business relationship with the Capco Pipe Company, Inc. ("Capco") plant in Ragland, Alabama from 1964 to 1982. LAQ was a supplier to Capco Ragland during that period of raw chrysotile asbestos fiber which was delivered FOB Province of Quebec, Canada.

2. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to each relationship you may now have or have in the past had with any entity described in the Complaint.

See invoices and other documents regarding LAQ's supply of chrysotile asbestos fiber to the Capco plant at Ragland, AL.

3. Identify and describe each Asbestos Organization to which you are now or ever have been related as a member or otherwise.

LAQ belonged to the following such organizations:

A. Quebec Asbestos Mining Association (QAMA) of Montreal, Province of Quebec, Canada;

B. Asbestos Textile Institute and the Asbestos Textile Institute, Inc. (hereinafter collectively referred to as ATI) in Washington, D.C. (as an associate member only);

C. Asbestos Information Association of North America (AIA/NA), of Washington, D.C.;

D. Institute of Occupational and Environmental Health (IOEH), Montreal, Province of Quebec, Canada;

By reason of its membership in QAMA, LAQ was represented in the Conseil de Patronat, Quebec Professional Chambre of Commerce, Canadian Shippers Council, Canadian Exporters Association, Canadian Industrial Traffic League, American Society of Testing Materials, Chambre Syndicate de L'Amiante of Paris, France, Japanese Asbestos Association, Asbestos Information Committee of London, Asbestosis Research Council and Asbestos International Association.

LAQ did not at any time belong to the Air Hygiene Foundation, the Asbestos Cement Producers Association (including without limitation, the Health and Safety Council thereof), the Asbestos Information Centre (London), the Fluid Sealing Association (formerly the Mechanical Packing Association), The Magnesia Insulation Manufacturers Association, the National Safety Council, the Saranac Laboratory of the Trudeau Institute, the Sprayed Mineral Fiber Manufacturers Association, the Swedish Asbestos Information Group, National Insulation Manufacturers Association, Thermal Insulation Manufacturers Association, Industrial Health Foundation, Industrial Hygiene Foundation, Iron and Steel Institute or Refractories Institute.

4. For each Asbestos Organization to which you are now or ever have been related as a member or otherwise, describe: (a) the exact nature of your relationship to the Asbestos Organization; (b) the dates on which the relationship began and terminated; and (c) your representation on each subcommittee or council thereof.

LAQ first became a member of the Quebec Asbestos Mining Association (QAMA) in 1959, and remained a member of that organization through the period of operation of the Capco Ragland plant. LAQ was also a member of the IOEH from its formation in 1966 through the period of operation of the Capco Ragland plant. LAQ was an associate non-voting member of the Asbestos Textile Institute and the Asbestos Textile Institute, Inc. (hereinafter collectively referred to as ATI) between 1959 and 1981. As LAQ was only an associate member of ATI, it held no officer positions and was precluded from voting on policy-making decisions. LAQ was a member of the Asbestos Information Association of North America (AIA/NA) from 1981 through the period of operation of the Capco Ragland plant.

See minutes of meetings of the QAMA, ATI, and AIA/NA produced by LAQ, for information on the committees on which LAQ employees sat.

5. For each Asbestos Organization to which you are now or ever have been related as a member or otherwise, describe each meeting you attended, including, without limitation: (a) the date, time and place of each such meeting; (b) the identities of each person who attended the

meeting; (c) each Document created, discussed, or otherwise used in connection with the meeting and (d) each matter discussed during the meeting.

LAQ has constructed as complete a list as possible, which might or might not be complete, of meetings which its employees attended, through the end of operation of the Capco Ragland plant, of asbestos-related trade associations or other asbestos-related organizations of which it was a member or associate member. That list is as follows:

QAMA MEETINGS

Minutes Of A Special Meeting Of The Quebec Asbestos Mining Association

Date: Monday, March 21, 1960

Place: British Colonial Hotel, Nassau

Attendees:

H.M. Ball
R.D. Bradford
J.W. Brown
C.B. Burnett
L.C. Campbell
D.T. Colton

R. Williams
I. Sabourin
W.H. Soutar

72nd Meeting Of The Quebec Asbestos Mining Association

Date: Monday, January 9, 1961

Place: Chateau Frontenac, Quebec

Attendees:

K.V. Lindell
E.A. Boadway
R.S. Coleman
W.J. Johnson
M.J. Messel
P.A. Meyer
A.L. Penhale
G.W. Smith
I.C. Campbell
J.O. Eby
R. Gagnon
F.P. Hodgson
J.R.M. Hutcheson
W.A. Janitch
A.S. Johnson, Jr.
L.O. Montpetit
M. Pharo
G. Robinson
F.P. Smith
H.A. Smith
J.P. Wiser
I. Sabourin
W.H. Soutar

73rd Meeting Of The Quebec Asbestos Mining Association

Date: Monday, March 6, 1961

Place: St. George's Club, Sherbrooke, P.Q.

Attendees:

K.V. Lindell
R.S. Coleman
W.J. Johnson
M.J. Messel
A.L. Penhale
G.W. Smith
I.C. Campbell
J.O. Eby
F.P. Hodgson
J.R.M. Hutcheson
G.F. Jenkins

**A.S. Johnson, Jr.
L.O. Montpetit
M. Pharo
G. Robinson
H.A. Smith
I. Sabourin
W.H. Soutar**

74th Meeting Of The Quebec Asbestos Mining Association

**Date: Monday, May 1, 1961
Place: St. George Club, Sherbrooke, P.Q.
Attendees:**

**K.V. Lindell
E.A. Boadway
W.J. Johnson
M.J. Messel
A.L. Penhale
G.W. Smith
I.C. Campbell
J.O. Eby
F.P. Hodgson
J.R. Hutcheson
G.F. Jenkins
A.S. Johnson, Jr.
L.O. Montpetit
M.C. Pharo
G. Robinson
H.A. Smith
I. Sabourin
W.H. Soutar**

21st Meeting of the Technical and Research Committee of the Quebec Asbestos Mining Association

**Date: November 14, 1961
Place: Thetford Mines, Quebec
Attendees:**
**G.F. Jenkins
G.F. Brink**

**R.A. Bromley-Moore
H.A. Smith
R. Dodds-Hebron
J.R. Hutcheson
V.C. Lindsay
W.P. Archer
F.P. Hodgson
M.C. Pharo
G.W. Riley
L.C. Piuze
J.K. Quigley
L.O. Montpetit
J.J. Paré**

77th Meeting Of The Quebec Asbestos Mining Association

Date: Monday, January 8, 1962

Place: St. George's Club, Sherbrooke, P.Q.

Attendees:

**K.V. Lindell
R.S. Coleman
W.J. Johnson
M.J. Messel
P.A. Meyer
A.L. Penhale
G.W. Smith
L.C. Campbell
J.O. Eby
F.P. Hodgson
J.R. Hutcheson
W.A. Janitch
G.F. Jenkins
A.S. Johnson, Jr.
R.J. Merrill
L.O. Montpetit
W.W. Oughtred
M.C. Pharo
G. Robinson
F.P. Smith
H.A. Smith
J.P. Wiser
I. Sabourin
W.H. Soutar**

22nd Meeting of the Technical and Research Committee of the Quebec Asbestos Mining Association

Date: January 16, 1962

Place: Thetford Mines, Quebec

Attendees:

G.F. Jenkins
G.F. Brink
R.A. Bramley-Moore
H.A. Smith
R. Dodds-Hebron
W.P. Archer
V.C. Lindsay
R.J. Merrill
J.J. Sztuke
F.P. Hodgson
D.O. Poirier
M.C. Pharo
G.W. Riley
J.P. Wiser
J.K. Quigley
L.O. Montpetit
J.J. Paré

78th Meeting Of The Quebec Asbestos Mining Association

Date: March 5, 1962

Place: St. George's Club, Sherbrooke, P.Q.

Attendees:

K.V. Lindell
R.S. Coleman
W.J. Johnson
M.J. Messel
A.L. Penhale
G.W. Smith
I.C. Campbell
A.B. Cummins
J.O. Eby
F.P. Hodgson
J.R. Hutcheson
A.S. Johnson, Jr.
R.J. Merrill

**L.O. Montpetit
G. Robinson
F.P. Smith
I. Sabourin
W.H. Soutar**

Special Meeting of the Quebec Asbestos Mining Association

Date: Friday, March 23, 1962

Place: Seigniory Club, Montebello, P.Q.

Attendees:

**R.M. Bateman
E.A. Boadway
R.D. Bradford
C.B. Brown
I.C. Campbell
R.S. Coleman
D.T. Colton
A.B. Cummins
J.O. Eby
A.W. Gibb
R. Hackney
N.W. Hendry
F.P. Hodgson
G.F. Jenkins
A.S. Johnson, Jr.
W.J. Johnson
K.V. Lindell
J.A. Main
J.A. Marcotte
M.J. Messel
P.A. Meyer
L.O. Montpetit
A.L. Penhale
F.P. Smith
G.W. Smith
H.A. Smith
I. Sabourin
W.H. Soutar**

79th Meeting Of The Quebec Asbestos Mining Association

Date: Monday, May 7, 1962

Place: The Chateau Frontenac, Quebec, P.Q.

Attendees:

R.S. Coleman
E.A. Boadway
W.J. Johnson
M.J. Messel
P.A. Meyer
A.L. Penhale
I.C. Campbell
J.O. Eby
R. Gagnon
F.P. Hodgson
J.R. Hutcheson
L.O. Montpetit
W.W. Oughtred
G. Robinson
F.P. Smith
H.A. Smith
I. Sabourin
W.H. Soutar

80th Meeting Of The Quebec Asbestos Mining Association

Date: Monday, July 9, 1962

Place: St. George's Club, Sherbrooke, P.Q.

Attendees:

K.V. Lindell
E.A. Boadway
W.J. Johnson
M.J. Messel
A.L. Penhale
G.W. Smith
A.B. Cummins
R. Gagnon
F.P. Hodgson
J.R. Hutcheson
G.F. Jenkins
A.S. Johnson, Jr.
M.C. Pharo
G. Robinson

**F.P. Smith
H.A. Smith
I. Sabourin
W.H. Soutar**

81st Meeting Of The Quebec Asbestos Mining Association

Date: Monday, September 10, 1962

Place: St. George's Club, Sherbrooke, P.Q.

Attendees:

**K.V. Lindell
R.S. Coleman
W.J. Johnson
M.J. Messel

P.A. Filteau**

48th Meeting of the Technical Committee of the QAMA

**Date: July 5, 1966
Place: Thetford Mines, Quebec
Attendees:**

**R.J. Dodds-Hebron
G.F.A. Brink
J. Giansanto
W.P. Archer
V.C. Lindsay
A.A. Winer
J.C. Blais
J.P. Wiser
R. Gale
P.A. Filteau
M. Cossette
W.B.R. Callan
M.C. Pharo
J.P. Wronski
J.R. Hutcheson
Dr. R.J. Merrill
J.J. Sztuke
W.W. Woodrooffe
D.O. Poirier
R. Lefebvre
L.C. Piuze
G. Verreault
G.R. Munger
F. Bolduc
J. De Grandpré
L.O. Montpetit**

**H.P. Cook
J.G. Foy
W.H. Foster**

Meeting of the Uniform Classification & Grading Committee of the QAMA

Date: July 20, 1966

Place: Asbestos Corporation Operations Office Conference Room

Attendees:

**G.F.A. Brink
W.H. Foster
R.J. Dodds-Hebron
J. Eby
Dr. R.J. Merrill
J.P. Wiser
R. Gale**

Special Meeting of the Quebec Asbestos Mining Association

Date: August 3-6, 1966

Place: Jasper Park Lodge, Jasper, Alberta

Attendees:

**A.L. Penhale
W.W. Oughtred
M.P. Carson
I.C. Campbell
W.H. Foster
G.W. Smith
F.P. Smith
R. Dodds-Hebron
D.T. Colton
R. Hackney
H.M. Ball
K.V. Lindell
J.O. Eby
N.W. Hendry
J.R.M. Hutcheson
R.J. Merrill
A.H. Bangenstose
J.A. Main
R.D. Bradford
M.J. Messel**

**Lionel Piuze
John Brown
J.W. Duncan
R.S. Coleman
P.A. Meyer
G.G. Gabrielson
J. Christian
Jack Berry
Dr. George W. Wright
W.C. Wansbrough
L.J. Patterson
L.C. Langlois
I. Sabourin
P.A. Filteau**

97th Meeting Of The Quebec Asbestos Mining Association

**Date: Monday, May 30, 1966
Place: Chateau Frontenac, Quebec City, P.Q.
Attendees:**

**M.J. Messel
J.O. Eby
R.S. Coleman
K.V. Lindell
P.A. Meyer
W.W. Oughtred
Geo. W. Smith
I.C. Campbell
R.D. Delinger
R. Dodds-Hebron
W.H. Foster
J.R.M. Hutcheson
R.J. Merrill
A.L. Penhale
D. Poirier
P.H. Riordon
G. Scowcroft
F.P. Smith
G. Robinson
I. Sabourin
P.A. Filteau**

Special Meeting Of The Quebec Asbestos Mining Association

Date: Thursday, August 4, 1966
Place: Jasper Park Lodge, Jasper, Alberta
Attendees:

M.J. Messel
J.O. Eby
R.S. Coleman
K.V. Lindell
J.A. Main
P.A. Meyer
W.W. Oughtred
Geo. W. Smith
H.M. Ball
Jack Berry
R.D. Bradford
J.W. Brown
I.C. Campbell
M.P. Carson
J. Christian
D.T. Colton
R. Dodds-Hebron
J.W. Duncan
W.H. Foster
G.G. Gabrielson
R. Hackney
N.W. Hendry
J.R.M. Hutcheson
R.J. Merrill
A.L. Penhale
L. Piuze
F.P. Smith
W.C. Wansbrough
L. Sabourin
P.A. Filteau

Special Meeting Of The Quebec Asbestos Mining Association

Date: Friday, August 5, 1966
Place: Jasper Park Lodge, Jasper, Alberta
Attendees:

M.J. Messel
J.O. Eby
R.S. Coleman

**K.V. Lindell
J.A. Main
P.A. Meyer
W.W. Oughtred
Geo. W. Smith
H.M. Ball
Dr. John Beattie
Jack Berry
R.D. Bradford
J.W. Brown
I.C. Campbell
M.P. Carson
J. Christian
D.T. Colton
R. Dodds-Hebron
J.W. Duncan
W.H. Foster
G.G. Gabrielson
R. Hackney
N.W. Hendry
J.R.M. Hutcheson
R.J. Merrill
A.L. Penhale
L. Piuze
F.P. Smith
W.C. Wansbrough
Dr. Geo. Wright
I. Sabourin
P.A. Filteau**

49th Meeting of the Technical Committee of the QAMA

**Date: September 13, 1966
Place: Thetford Mines, Quebec
Attendees:**

**R.J. Dodds-Hebron
G.F.A. Brink
W.B.R. Collan
E.J. Day
G.A. Piché
J.J. Sztuke
J.C. Blais
R. Lefebvre
R. Gale**

**M. Cossette
G.J. Foy**

Meeting of the Uniform Classification & Grading Committee of the QAMA

Date: September 20, 1966
Place: Conference Room Asbestos Corporation Operations Office
Attendees:

**C.F.A. Brink
W.H. Foster
R.J. Dodds-Hebron
J. Eby
J.R.M. Hutcheson
Dr. R.J. Merrill
J.C. Blais
R. Gale
N.P. Cook
J.P. Wiser**

98th Meeting Of The Quebec Asbestos Mining Association

Date: Monday, September 26, 1966
Place: Chateau Frontenac, Quebec City, P.Q.
Attendees:

**M.J. Messel
R.S. Coleman
K.V. Lindell
J.A. Main
P.A. Meyer
W.W. Oughtred
I.C. Campbell
R. Dodds-Hebron
W.H. Foster
J.R.M. Hutcheson
A.L. Penhale
L. Piuze
D. Poirier
M. Prus
P.H. Riordon
G. Robinson
I. Sabourin
P.A. Filteau**

Meeting of the Uniform Classification & Grading Committee of the QAMA

Date: September 26, 1966

Place: Quebec

Attendees:

K.V. Lindell
J.R. Hutcheson
W.W. Oughtred
G.F. Brink
L.C. Campbell
P.H. Riordon
W.H. Foster
M.J. Messel
L.C. Piuze

J.A. Main
M. Prus
R. Dodds-Hebron
P.A. Meyer
P.A. Filteau

Meeting of the Uniform Classification & Grading Committee of the QAMA

Date: November 16, 1966

Place:

Attendees:

G.F. Brink
J.O. Eby
R.J. Merrill
D. Poirier
J.P. Wiser
N.P. Cook
R.S. Coleman
R. Dodds-Hebron

99th Meeting Of The Quebec Asbestos Mining Association

Date: Monday, December 12, 1966

Place: Chateau Frontenac, Quebec City, P.Q.

Attendees:

M.J. Messel

**J.O. Eby
R.S. Coleman
K.V. Lindell
P.A. Meyer
R.J. Merrill
W.W. Oughtred
F.P. Smith
F. Bolduc
I.C. Campbell
R. Dodds-Hebron
W.H. Foster
J. Gauthier
J.R.M. Hutcheson
A.L. Penhale
H.S. Jobbins
D. Poirier
P.H. Riordon
G. Robinson
I. Sabourin
P.A. Filteau**

100th Meeting Of The Quebec Asbestos Mining Association

**Date: Thursday, February 2, 1967
Place: Barbados Hilton, Barbados, W.I.
Attendees:**

**M.J. Messel
W.W. Oughtred
K.V. Lindell
R.J. Merrill
P.A. Meyer
F.P. Smith
R.D. Bradford
I.C. Campbell
M.P. Carson
R. Dodds-Hebron
J.W. Duncan
J.O. Eby
A.R. Fisher
W.H. Foster
G.G. Gabrielson
R.P. Gagnon
R. Hackney
N.W. Hendry**

**J.R.M. Hutcheson
A.L. Penhale
D. Poutiatine
P.H. Riordon
G. Robinson
I. Sabourin
P.A. Filteau**

101st Meeting Of The Quebec Asbestos Mining Association

**Date: Monday, April 10, 1967
Place: Chateau Frontenac, Quebec City, Quebec
Attendees:**

**W.W. Oughtred
K.V. Lindell
J.A. Main
R.J. Merrill
P.A. Meyer
F.P. Smith
F. Bolduc
I.C. Campbell
R. Dodds-Hebron
W.H. Foster
J.R.M. Hutcheson
A.L. Penhale
L. Piuze
D. Poirier
M. Prus
P.H. Riordon
G. Robinson
I. Sabourin
P.A. Filteau**

102nd Meeting Of The Quebec Asbestos Mining Association

**Date: Monday, May 29, 1967
Place: Chateau Frontenac, Quebec City, Quebec
Attendees:**

**M.J. Messel
R.S. Coleman
K.V. Lindell**

**R.J. Merrill
P.A. Meyer
F.P. Smith
F. Bolduc
I.C. Campbell
Yvan Couture
R. Dodds-Hebron
J.O. Eby
W.H. Foster
J.R.M. Hutcheson
D. Poirier
P.H. Riordon
Geo. Robinson
I. Sabourin
P.A. Filteau**

Special Meeting Of The Quebec Asbestos Mining Association

**Date: Thursday, August 10, 1967
Place: Manoir Richelieu, Murray Bay, Quebec
Attendees:**

**M.J. Messel
W.W. Oughtred
R.S. Coleman
K.V. Lindell
J.A. Main
R.J. Merrill
P.A. Meyer
F.P. Smith
R.D. Bradford
I.C. Campbell
M.P. Carson
D.T. Colton
Y. Couture
R. Dodds-Hebron
J.W. Duncan
J.O. Eby
W.H. Foster
R.P. Gagnon
N.W. Hendry
L.G. Langlois
Dr. P. Pelnar
L. Piuze
D. Poirier**

**P.H. Riordon
G.C. Scowcroft
Dr. G.W. Wright
G. Robinson
I. Sabourin
P.A. Filteau**

Special Meeting Of The Quebec Asbestos Mining Association

Date: August 9, 1967

Place: Manoir Richelieu, Murray Bay, Quebec

Attendees:

**M.J. Messel
W.W. Oughtred
R.S. Coleman
K.V. Lindell
J.A. Main
R.J. Merrill
P.A. Meyer
F.P. Smith
R.D. Bradford
L.C. Campbell
M.P. Carson
D.T. Colton
Y. Couture
R. Dodds-Hebron
J.W. Duncan
J.O. Eby
W.H. Foster
R.P. Gagnon
N.W. Hendry

Dr. G.W. Wright
G. Robinson
I. Sabourin
P.A. Filteau**

Meeting of the Uniform, Classification & Grading Committee of the QAMA

Date: November 7, 1967

Attendees:

**R. Merrill
J. Eby
L. Montpetit
R. Lefebvre
V. Lindsay
D. Poirier
W.H. Foster**

103rd Meeting of the Quebec Asbestos Mining Association

Date: Monday, November 13, 1967

Place: Chateau Champlain, Montreal, Quebec

Attendees:

M.J. Messel
R.S. Coleman
K.V. Lindell
R.J. Merrill
P.A. Meyer
W.W. Oughtred
F.P. Smith
F. Bolduc
I.C. Campbell
M.P. Carson
R. Dodds-Hebron
J.O. Eby
W.H. Foster
J.R.M. Hutcheson
D. Poirier
L. Piuze
M. Prus
P.H. Riordon
G. Robinson
I. Sabourin
P.A. Filteau

104th Meeting Of The Quebec Asbestos Mining Association

Date: Monday, January 15, 1968

Place: Chateau Frontenac, Quebec

Attendees:

M.J. Messel
R.S. Coleman
K.V. Lindell
J.A. Main
R.J. Merrill
P.A. Meyer
W.W. Oughtred
F.P. Smith
F. Bolduc
J.O. Eby
J.R.M. Hutcheson

**D. Poirier
Geo. Robinson
L. Sabourin
P.A. Filteau**

Meeting of the Uniform, Classification & Grading Committee of the QAMA

Date: March 7, 1968

Place:

Attendees:

**R. Merrill
V. Lindsay
L. Montpetit
J.P. Wiser
J.C. Blais
R. Dodds-Hebron
R. Gale
W.H. Foster**

Special Meeting of the Quebec Asbestos Mining Association

Date: March 21, 1968

Place: QAMA

Attendees:

**W.W. Oughtred
K.V. Lindell
R.S. Coleman
J.A. Main
R.J. Merrill
M.J. Messel
P.A. Meyer
F.P. Smith
L. Sabourin**

104th Meeting And The 1968 Annual Meeting Of The Quebec Asbestos Mining Association

Date: Monday, January 15, 1968

Place: Chateau Frontenac, Quebec

Attendees:

M.J. Messel

**R.S. Coleman
K.V. Lindell
J.A. Main
R.J. Merrill
P.A. Meyer
W.W. Oughtred
F.P. Smith
F. Bolduc
J.O. Eby

P.A. Filteau**

Special Winter Meeting - Legislation & Taxation Committee Report of the QAMA

**Date: March 27-30, 1968
Place: Grand Bahama Hotel & Country Club**

Special Meeting of the Quebec Asbestos Mining Association

**Date: Thursday, March 28 and 29, 1968
Place: Grand Bahama Hotel & Country Club, G.B.
Attendees:**

**W.W. Oughtred
K.V. Lindell
J.A. Main
R.J. Merrill
M.J. Messel
P.A. Meyer
F.P. Smith
A.H. Bagenstose
R.D. Bradford
C.B. Burnett
I.C. Campbell
M.P. Carson
D.T. Colton
Y. Couture
R. Dodds-Hebron
J.W. Duncan**

J.O. Eby
A.R. Fisher
W.H. Foster
G.G. Gabrielson
R.P. Gagnon
N.W. Hendry
J.R.M. Hutcheson
J.A.D. Marcotte
R.N. Moore
A.L. Penhale
L. Piuze
D. Poutiatine
G.W. Smith
G. Robinson
I. Sabourin
P.A. Filteau

105th Meeting Of The Quebec Asbestos Mining Association

Date: Friday, May 31, 1968
Place: Bonaventure Hotel, Montreal, Quebec
Attendees:

W.W. Oughtred
K.V. Lindell
R.S. Coleman
R.J. Merrill
M.J. Messel
P.A. Meyer
F.P. Smith
F. Bolduc
I.C. Campbell
Y. Couture
R. Dodds-Hebron
J.O. Eby
W.H. Foster

L. Sabourin
P.A. Filteau**

114th Meeting Of The Quebec Asbestos Mining Association

**Date: Monday, July 27, 1970
Place: Chateau Frontenac, Quebec
Attendees:**

**R.J. Merrill
M.C. Carpenter
W.W. Oughtred
F.P. Smith
I.C. Campbell
R. Dodds-Hebron
J.O. Eby
W.H. Foster
R.P. Gagnon
A.R. Hooker
D. Poirier
L.C. Piuze
Geo. Robinson
Philippe Casgrain
L. Sabourin
P.A. Filteau**

Minutes of Joint Meeting of the Quebec Asbestos Mining Association and the Quebec Asbestos Mining Association Taxation Committees

**Date: September 4, 1970
Place: Chateau Frontenac, Quebec City**

P.A. Filteau

114th Meeting of the Quebec Asbestos Mining Association

Date: Monday, July 27, 1970

Place: Chateau Frontenac, Quebec

Attendees:

**R.J. Merrill
M.C. Carpenter
W.W. Oughtred
F.P. Smith
I.C. Campbell
R. Dodds-Hebron
J.O. Eby
W.H. Foster

A.R. Hooker
G. Robinson
P.A. Filteau
P. Casgrain
L.C. Campbell
J.O. Eby
W.H. Foster
R.P. Gagnon
K. Jackson
L.C. Piuze
D. Poirier
L. Sabourin

Meeting of the Board of Directors of The Quebec Asbestos Mining Association

Date: January 11, 1971
Time: 12:25 p.m.
Place: Mount Royal Hotel, Quebec Suite, Montreal, Quebec
Attendees:

W.W. Oughtred
F.P. Smith
J.R.M. Hutcheson
R.J. Merrill
A.R. Hooker
M.J. Messel
R.S. Coleman
P.A. Filteau

Philippe Casgrain

Special General Meeting Of The Quebec Asbestos Mining Association

Date: Friday, March 19, 1971

Place: Pierre Marques Hotel, Acapulco, Mexico

Attendees:

W.W. Oughtred
F.P. Smith
J.R.M. Hutcheson
R.J. Merrill
M.C. Carpenter
M.J. Messel
R.S. Coleman
Ph. Casgrain
P.A. Filteau
L.C. Campbell
J.O. Eby
W.H. Foster
R.P. Gagnon
K.V. Lindell
A.H. Bagenstose
M.P. Carson
D.T. Colton
Y. Couture
J.E. DesMarais
N.W. Hendry
R.L. Hennebach
J.B. Jobe
L.C. Piuze
D. Poutiatine
W.J.W. Smith

D. Poutiatine
W.J.W. Smith
P. Steen
W.L. Stribling
W.L. VanDerbeek

Joint Meeting of the Asbestos Information Committee/United Kingdom, Asbestos Information Association/North America and Quebec Asbestos Mining Association

Date: January 24, 1974
Place: Montreal, Canada
Attendees:

C.M. Fenton
D.W. Hills
M.F. Howe
J.H. Marsh
R.H. Mereness
M.J. Messel
I.C. Campbell
R. Michon
Dr. P.V. Pelnar
P.A. Filteau

130th Meeting Of The Directors Of The Quebec Asbestos Mining Association

Date: January 28, 1974
Place: Engineers' Club, Montreal

Attendees:

M.J. Messel
W.W. Oughtred
M. Dorais
J.R.M. Hutcheson
M. Prus
G.A. McCammon
P.A. Filteau
J.O. Eby
R.P. Gagnon
I.C. Campbell
L.C. Piuze
K.V. Lindell

131st Meeting Of The Directors of the Quebec Asbestos Mining Association

Date: Thursday, April 4, 1974

Place: Mijas Hotel, Mijas, Spain

Attendees:

W.W. Oughtred
M. Dorais
J.R.M. Hutcheson
M. Prus
M.J. Messel
P. Casgrain
Dr. M. Lesage
P.A. Filteau
J.O. Eby
R.P. Gagnon
I.C. Campbell
L.C. Piuze
K.V. Lindell
A.H. Bagenstose
N.W. Hendry
R.L. Hennebach
A.S. Johnson
D. Poutiatine
W.J.W. Smith
W.L. Stribling
W.L. VanDerbeek
J.S. Autry

132nd Meeting Of The Directors of the Quebec Asbestos Mining Association

Date: June 10, 1974

Place: Engineers' Club, Montreal

Attendees:

W.W. Oughtred
M. Dorais
J.R.M. Hutcheson
M. Prus
G.A. McCammon
Dr. M. Lesage
P.A. Filteau
W.H. Foster
D.L. Monroe
R.P. Gagnon
I.C. Campbell
L.C. Piuze
K.V. Lindell
R.B. Gresham
K.S. Jackson
W.J.W. Smith

133rd Meeting Of The Directors of the Quebec Asbestos Mining Association

Date: August 16, 1974

Place: ACL Foremen's Club, Thetford Mines, Quebec

Attendees:

W.W. Oughtred
M. Dorais
M. Prus
M.J. Messel
G.A. McCammon
P. Casgrain
Dr. M. Lesage
P.A. Filteau
W.H. Foster
D.L. Monroe
R.B. Gresham
R.P. Gagnon
I.C. Campbell
L.C. Piuze

**K.V. Lindell
K.S. Jackson
Jean Dupéré**

134th Meeting Of The Directors of the Quebec Asbestos Mining Association

Date: Thursday and Friday, October 3-4, 1974

Place: Casa Blanca Inn, Scottsdale, Arizona

Attendees:

**W.W. Oughtred
M. Dorais
J.R.M. Hutcheson
M. Prus
M.J. Messel
P. Casgrain
M. Lesage
P.A. Filteau
R.B. Gresham
R.P. Gagnon
L.C. Piuze
K.V. Lindell
A.H. Bagenstose
N.W. Hendry
R.L. Hennebach
D. Poutiatine
W.J.W. Smith
W.L. Stribling
W.L. VanDerbeek
Dr. G.W. Wright**

138th Meeting Of The Directors of the Quebec Asbestos Mining Association

Date: April 3, 1975

Place: Engineers' Club, Montreal

Attendees:

**M. Dorais
J.R.M. Hutcheson
M. Prus
M.J. Messel
W.W. Oughtred**

**P. Casgrain
Dr. M. Lesage
G.A. McGammon
P.A. Filteau
W.H. Foster
R.B. Gresham
R.P. Gagnon
L.C. Campbell
L.C. Piuze
M.P. Carson
K.S. Jackson
W.J.W. Smith**

139th Meeting Of The Directors Of The Quebec Asbestos Mining Association

Date: May 6, 1975

Place: Four Seasons Sheraton Hotel, Toronto, Ontario

Attendees:

**M. Dorais
R.B. Gresham
M. Prus
M.J. Messel
M.P. Carson
L.C. Piuze
P. Casgrain
P.A. Filteau**

142nd Meeting Of The Directors Of the Quebec Asbestos Mining Association

Date: October 2 and 3, 1975

Place: Southampton Princess Hotel, Southampton, Bermuda

Attendees:

**M. Dorais
J.R.M. Hutcheson
M. Prus
M.J. Messel
W.W. Oughtred
P. Casgrain
Dr. M. Lesage
P.A. Filteau
R.B. Gresham
R.P. Gagnon
L.C. Piuze**

**A.H. Bagenstose
J.D. Christian
J.O. Eby
W. Graeser
M. Harris
N.W. Hendry
R.L. Hennebach
D. Poutiatine
W.J.W. Smith
W.L. Stribling**

Meeting of the Traffic Committee and Materials Handling Committee of the Quebec Asbestos Mining Association

Date: November 7, 1975

Place: Le Provence Motel

Attendees:

**L. Delaney
Glen Thomas
Ray Hutchinson
G. St. Pierre
R. McDougall
J.M. Leblond
J. Giansante
J. Turcot
D. Maxwell
C.R. Therrien
R.P. Gagnon
Len C. Webster
Jean Theriault
G. Patel
A.W.G. Gibb**

145th Meeting Of The Directors Of The Quebec Asbestos Mining Association

Date: Wednesday, January 14, 1976

Place: Engineers Club, Montreal

Attendees:

**M. Dorais
J.R.M. Hutcheson
M. Prus
M.J. Messel**

**W.W. Oughtred
G.A. McCammon
Dr. M. Lesage
P. Casgrain
P.A. Filteau
W.H. Foster
G.F.A. Brink
R.B. Gresham
R.P. Gagnon
K.S. Jackson**

148th Meeting Of The Directors Of The Quebec Asbestos Mining Association

**Date: Tuesday, August 24, 1976
Place: ACL Foremen's Club, Thetford Mines
Attendees:**

**J.R.M. Hutcheson
M.J. Messel
W.W. Oughtred
M. Dorais
M. Prus
G.A. McCammon
Dr. M. Lesage
P. Casgrain
P.A. Filteau
W.H. Foster
R.B. Gresham
R.P. Gagnon
L.C. Piuze
M.P. Carson
G. Burke
K.S. Jackson**

149th Meeting Of The Directors of the Quebec Asbestos Mining Association

**Date: October 8 and 9, 1976
Place: Dolder Grand Hotel, Zurich, Switzerland
Attendees:**

**J.R.M. Hutcheson
M.J. Messel
W.W. Oughtred
M. Dorais
M. Prus**

**G.A. McGammon
P. Casgrain
Dr. M. Lesage
P.A. Filteau
R.B. Gresham
R.P. Gagnon
L.C. Piuze
A.H. Bagenstose
Sir R. Bateman
M.P. Carson
W. Graeser
M. Harris
N.W. Hendry
Dr. P. Kotin
Dr. R. Lambert
Dr. W. Paul
W.L. Stribling
Dr. G.W. Wright**

151st Meeting Of The Directors Of The Quebec Asbestos Mining Association

Date: Monday, January 24, 1977

Place: Engineers Club, Montreal

Attendees:

**J.R.M. Hutcheson
M.J. Messel
M.E. Taschereau
M. Dorais
M. Prus
G.A. McGammon
P. Casgrain
Dr. M. Lesage
P.A. Filteau
W.H. Foster
G.F.A. Brink
R.B. Gresham
R.P. Gagnon

K.S. Jackson**

154th Meeting Of The Directors of the Quebec Asbestos Mining Association

Date: August 29, 1977
Place: Iroquois Club, Asbestos, Quebec
Attendees:

M.J. Messel
M.E. Taschereau
M. Dorais
J.R.M. Hutcheson
M. Prus
G.A. McCammon
Y. Turcot
P. Casgrain
Dr. M. Lesage
P.A. Filteau
R.P. Gagnon
L.C. Piuze
R.B. Gresham
K.S. Jackson

154th Meeting Of The Directors of the Quebec Asbestos Mining Association

Date: August 29, 1977
Place: Iroquois Club, Asbestos, Quebec
Attendees:

M.J. Messel
M.E. Taschereau
M. Dorais
J.R.M. Hutcheson
M. Prus
G.A. McCammon
Y. Turcot
P. Casgrain
Dr. M. Lesage
P.A. Filteau
R.P. Gagnon
L.C. Piuze
R.B. Gresham
K.S. Jackson

156th Meeting Of The Directors of The Quebec Asbestos Mining Association

Date: December 4, 1977

Place: Chateau Frontenac, Quebec City

Attendees:

M.J. Messel
M. Dorais
M. Prus
R.B. Gresham
G.A. McCammon
Dr. M. Lesage
P. Casgrain
Y. Turcot
P.A. Filteau
R.P. Gagnon
L.C. Piuze
K.S. Jackson

157th Meeting Of The Directors of the Quebec Asbestos Mining Association

Date: December 28, 1977

Place: Office of the Association in Montreal

Attendees:

M.J. Messel
M. Dorais
M. Prus
J.R.M. Hutcheson
G.A. McCammon
P. Casgrain
P.A. Filteau
R.P. Gagnon
W. Webster
Jean Dupéré

159th Meeting Of The Directors Of The Quebec Asbestos Mining Association

Date: January 24, 1978

Place: Office of Bell Asbestos Mines, Limited in Thetford Mines, Quebec

Attendees:

**M.J. Messel
M. Dorais
M. Prus
J.R.M. Hutcheson
Dr. M. Lesage
P. Casgrain
Y. Turcot
P.A. Filteau
E.J. Day
A.B. Gresham
R.P. Gagnon
K.S. Jackson
W. Bonneville
R.W. King**

160th Meeting Of The Directors Of The Quebec Asbestos Mining Association

**Date: March 9, 1978
Place: Engineers Club, Montreal
Attendees:**

**M.J. Messel
M. Dorais
M. Prus
J.R.M. Hutcheson
Dr. M. Lesage
P. Casgrain
Y. Turcot
R.W. King
P.A. Filteau**

163rd Meeting Of The Directors Of the Association

**Date: August 10, 1978
Place: Des Mines D'Amiante Bell Ltee, Thetford Mines
Attendees:**

**M.J. Messel
M. Dorais
M. Prus
R.B. Gresham
P. Casgrain
Dr. M. Lesage**

**Y. Turcot
R.W. King
P.A. Filteau
K.S. Jackson
E.J. Day
W.H. Bonneville
R.P. Gagnon
L.C. Piuze**

164th Meeting Of The Directors of the Quebec Asbestos Mining Association

**Date: October 11 and 12, 1978
Place: Elbow Beach Club, Bermuda**

166th Meeting Of The Directors Of The Quebec Asbestos Mining Association

**Date: January 25, 1979
Place: Office of the Association in Montreal, P.Q.
Attendees:**

**M.J. Messel
M. Dorais
J.R.M. Hutcheson
M. Prus
Dr. M. Lesage
Y. Turcot
P. Casgrain
R.W. King
P.A. Filteau
K.S. Jackson
E.J. Day
R.B. Gresham
W.H. Bonneville

LAQ employees generally did not attend meetings of the following: Conseil de Patronat, Quebec Professional Chamber of Commerce, Canadian Shippers Council, Canadian Exporters Association, Canadian Industrial Traffic League, American Society of Testing Materials, Chambre Syndicate de L'Amiante of Paris, France, Japanese Asbestos Association, Asbestos Information Committee of London, Asbestosis Research Council and Asbestos International Association. LAQ was only represented in these organizations by reason of its membership in the QAMA.

The subject matter of the discussions which took place during meetings attended by LAQ employees are reflected in the minutes of the meetings which are being produced by LAQ as part of its responses to these discovery requests. See response to discovery request C6.

6. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to your membership in each Asbestos Organization to which you are now or ever have been related, including, without limitation: (a) membership applications, certificates, and other such records; (b) publications and reports of the association or organization or any subsidiary thereof; (c) minutes of meetings of the association or organization or any subsidiary thereof; (d) Communications by and between you and the Asbestos Organization, any subsidiary thereof, and/or their personnel; and (e) Communications by and between you and any other member of the Asbestos Organization.

Although LAQ was a member (or associate member), either directly or indirectly, of a number of asbestos-related trade associations or other asbestos-related organizations through the period of the operation of the Capco Ragland plant (see responses to discovery requests C1 through C5), many documents generated by or relating to those organizations

were not sent to LAQ in the regular course of business at or about the time of their creation. However, LAQ's counsel has obtained, through the course of the defense of asbestos-related litigation, various such documents. Such documents to, from or generated by these associations are included in LAQ's production of documents in response to these discovery requests.

D. Defendant's Employees

1. Describe the structure and organization of, and identify each of your employees who has ever worked in, each internal department responsible for any one or more of the following: (a) designing and/or developing Raw Asbestos and/or Asbestos-Containing Products; (b) testing Raw Asbestos and/or Asbestos-Containing Products for user and or consumer risk and/or safety; (c) improving Raw Asbestos and/or Asbestos-Containing Products; (d) replacing Raw Asbestos and/or Asbestos-Containing Products; (e) performing medical examinations and/or evaluations of other employees who worked with Raw Asbestos and/or Asbestos-Containing Products; (f) industrial hygiene; (g) employee safety; (h) marketing, advertising, and sales; (i) worker's compensation loss control; and (j) liaison with other manufacturers and/or distributors of Raw Asbestos and/or Asbestos-containing Products.

(a) LAQ has never manufactured, sold or distributed asbestos containing products. As LAQ was an asbestos mining company, its employees were involved in the mining, milling, and sale of raw chrysotile asbestos fiber. After July 1986, LAQ's employees were engaged in white collar employments. Based on this and since asbestos fiber is a naturally occurring mineral substance, the design or development information sought by this question, as it is understood by LAQ, would not exist.

(b) LAQ has never manufactured or sold asbestos containing products and thus did not conduct tests to determine potential health hazards posed by the use of such products. LAQ did have a laboratory. The primary purpose for this laboratory was to ensure quality control for LAQ fiber. Lionel Piuze and, later Andre Gauthier were ultimately responsible for the laboratory as Vice Presidents of Operations. With respect to its raw asbestos fiber, which was sold not to the general public but to knowledgeable and sophisticated manufacturing concerns aware of both the potential health hazards from excessive exposures to asbestos and of the industrial hygiene and safety measures to substantially reduce or eliminate such health risks, LAQ did not conduct risk and/or safety tests on its own, but did help fund health studies through its affiliation with certain asbestos-related associations.

(c) As chrysotile asbestos fiber is a naturally occurring mineral substance, this question, as it is understood by LAQ, is not applicable.

(d) LAQ never manufactured, designed or sold asbestos-containing products, and therefore had no department responsible for replacing such products. Likewise, LAQ had no department responsible for replacing chrysotile asbestos. However, LAQ did cease the mining and sale of chrysotile fiber on or about June 30, 1986.

(e) LAQ did not have a department or employ physicians responsible for performing medical examinations on workers exposed to raw asbestos fiber or asbestos-containing products. Nor did LAQ hire its own medical director. However, LAQ regularly consulted with local physicians, including Doctors Clement Fortier, Claude Fortin, Richard Lambert, Paul Cartier and Jacques Dussault concerning asbestos health issues and the medical condition of its employees.

In addition, LAQ employees were required to take a physical examination upon their being hired. In addition, they were provided yearly physical examinations by physicians of the Thetford Industrial Clinic. Pursuant to an agreement with the Thetford Industrial Clinic, reached in 1958 when LAQ opened its mill in Black Lake, the Clinic monitored the general health of LAQ's asbestos mine and mill workers, with particular attention paid to whether workers showed any evidence of asbestos-related disease.

(f) and (g) LAQ did not have employees whose sole duty was industrial hygiene. LAQ did have employees who were responsible for industrial hygiene and safety matters. Lionel Piuze, former Vice President of Operations, was in charge of safety and industrial hygiene for most of the relevant time period. His immediate successor was Andre Gauthier. George Birnie also had responsibilities concerning the safety of LAQ employees.

(h) LAQ had no marketing or advertising departments. During the relevant time period, such activities fell within the responsibilities of LAQ's Vice President, Sales, Roland P. Gagnon.

(i) LAQ had no department exclusively charged with workers' compensation loss control. However, this function would have been within the responsibilities of the personnel department, which was headed by LAQ's Director of Personnel and Industrial Relations, Yvonnick Bolduc.

(j) LAQ did not have any department or employee specifically assigned to act as liaison with other miners and distributors of raw asbestos fiber.

2. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to your internal departments responsible for any one or more of the following: (a) designing and/or developing Raw Asbestos and/or Asbestos-containing Products; (b) testing Raw Asbestos and/or Asbestos-Containing Products for user and/or consumer risk and/or safety; (c) improving Raw Asbestos and/or Asbestos-Containing Products; (d) replacing Raw Asbestos and/or Asbestos-containing Products; (e) performing medical examinations and/or evaluations of other employees who worked with Raw Asbestos and/or Asbestos-Containing Products; (f) industrial hygiene; (g) employee safety; (h) marketing, advertising, and sales; (I) worker's compensation loss control; and (j) liaison with other manufacturers and/or distributors of Raw Asbestos and/or Asbestos-Containing Products.

See documents produced by LAQ in response to this discovery request.

3. Identify and describe each of your employees who is now or has ever been your designated representative to any standing committee formed by industry representatives to review and/or propose standards for Raw Asbestos and/or Asbestos-Containing Products adopted by the U.S. Department of Commerce.

Not applicable. LAQ's employees were not on any committee formed by industry representatives to review or propose standards for Raw Asbestos and/or Asbestos-Containing Products adopted by the U.S. Department of Commerce.

4. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to your membership in and representation on any standing committee formed by industry representatives to review and/or propose standards for Raw Asbestos and/or Asbestos-Containing Products adopted by the U.S. Department of Commerce.

Not applicable. See response to D3.

5. Identify each of your employees who has been exposed to asbestos fiber dust in his or her employment, who has worked for you ten years or longer, and who has any Asbestos-Related Disease.

The interrogatory calls for expert medical opinions which are outside the knowledge of LAQ. To LAQ's knowledge, none of its current employees has any asbestos-related disease.

With respect to the former employees, Sylvaine Cordier, G. Theriault and Simone Provencher followed 350 LAQ long-term employees who, prior to employment with LAQ, had no previous asbestos exposure. In 1984, their research was published in the British Journal of Industrial Medicine. The authors reported the results of their study of radiographic changes in this group of LAQ employees, reporting detailed results on 331 miners and 19 office workers. The miners had cumulative exposures that ranged from 7 fibers per cubic centimeter x years (fiber years) to 300 fiber years. Their exposures lasted for an average period of 20 years and had started between 10 and 27 years before.

Readers experienced in the reading of x-rays to diagnose pneumoconiosis individually read radiographs according to the ILO U/C 1980 classification. The films were provided in random order and the readers were unaware of the individuals' occupations or exposure to asbestos.

The authors did not conclude that any of the subjects suffered from asbestos-related disease. They merely reported the results of an x-ray study, which in and of itself is insufficient to diagnose asbestos-related disease. In fact, the prevalence of x-ray findings was virtually identical among exposed and unexposed subjects.

Of LAQ's miners, "2.1% showed a small opacity score of 1/0 or more and 2.7% showed pleural changes. No linear relationship could be established between small opacity score and any index of exposure to asbestos. Pleural changes were related to age. A referent group of office workers within the same mining industry showed a prevalence of 2.1% (1/48) for small irregular opacities 1/0 or more, and for pleural changes."

6. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to the health of any of your employees identified in response to the preceding discovery request.

See Cordier, S., Theriault, G., Provencher, S. "Radiographic Changes in a Group of Chrysotile Miners and Millers Exposed to Low Dust Concentrations," *British Journal of Industrial Medicine* 1984:41:384-388, produced by LAQ in response to this discovery request.

7. Identify and describe each of your employees who has ever testified on your behalf, either in deposition or in trial, in litigation involving an Asbestos-Related Disease, and describe for each such employee the primary subject matter of his or her testimony.

The following LAQ employees have testified either at deposition or at trial in litigation involving alleged asbestos-related diseases:

Yvonnick Bolduc, former LAQ Director of Personnel and Industrial Relations.

Deposition testimony taken on August 19, 1980 in Montreal, Canada in Austin v. J-M, et al., USDC, District of New Jersey, Civil Action No. 75-754.

Michael J. Messel, former President of LAQ.

Deposition testimony taken on August 18 and 19, 1980, in Montreal, Canada in Austin v. J-M, et al., USDC, District of New Jersey, Civil Action No. 75-754.

Deposition testimony taken on January 15, 1987 in Montreal, Canada in In Re: J-M Plantworkers, Superior Court of New Jersey, Law Division, Middlesex County, Docket No. L-37243-79.

Deposition testimony taken on September 28 and 29, 1993 in Montreal, Canada in In Re Asbestos, Circuit Court of Kanawha County West Virginia, Civil Action No. 92-C-8888.

Lionel C. Piuze, former Vice President of Operations.

Deposition testimony taken on November 21, 1980 in Montreal, Canada in Austin v. J-M, et al., USDC, District of New Jersey, Civil Action No. 75-754.

Edward A. Farrell, former Manager and Director of Sales.

Deposition testimony taken on November 7, 1980 in Morristown, New Jersey in Austin v. J-M, et al., USDC, District of New Jersey, Civil Action No. 75-754.

Deposition testimony taken on September 17, 1986 in Woodbridge, NJ in In Re: J-M Plantworkers, Superior Court of New Jersey, Law Division, Middlesex County, Docket No. L-37243-79.

Deposition testimony taken on December 1, 1993 in Jupiter, Florida in In Re Asbestos, Circuit Court of Kanawha County West Virginia, Civil Action No. 92-C-8888.

Roland P. Gagnon, former LAQ Senior Vice President and Vice President of Sales.

Trial testimony taken on May 17, 1990 in Maguire v. Celotex Corporation, et al., Superior Court of New Jersey, Law Division, Camden County, Docket No. L-72027-83.

Andre Gauthier, former LAQ Senior Vice-President of Operations.

Deposition testimony taken on September 8, 1976 in Montreal, Canada in Austin v. J-M, et al., USDC, District of New Jersey, Civil Action No. 75-754.

For the subject matter of the above referenced deposition and trial testimony, see the transcripts produced by LAQ in response to these discovery requests.

8. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to the testimony of any employee identified in response to the preceding discovery request.

See transcripts of all referenced testimony as produced by LAQ in response to this discovery request.

E. Raw Asbestos in General

1. Admit or deny that you milled and/or distributed Raw Asbestos.

LAQ admits that it milled and sold chrysotile asbestos.

2. Separately admit or deny that the Raw Asbestos you milled and/or distributed consisted of or included each of the following types of asbestos: (a) chrysotile; (b) amosite; (c) crocidolite; (d) tremolite; (e) actinolite; and/or (f) anthophyllite.

- (a) admitted;
- (b) denied;
- (c) denied;
- (d) denied;

(e) denied.

3. Admit or deny that the Raw Asbestos you milled and/or distributed was contaminated with amphibole asbestos fibers.

Denied.

4. Admit or deny that Raw Asbestos was milled and/or distributed on your behalf.

LAQ denies that any raw asbestos was milled and/or distributed on its behalf to either Capco or the Capco facility in Ragland, Alabama. All sales of raw asbestos to Capco or the Capco facility in Ragland, Alabama, were made by LAQ and were delivered by LAQ f.o.b. Black Lake, Quebec.

5. Separately admit or deny that the Raw Asbestos milled and/or distributed on your behalf consisted of or included each of the following types of asbestos: (a) chrysotile; (b) amosite; (c) crocidolite; (d) actinolite; and/or (f) anthophyllite.

(a) denied;

(b) denied;

(c) denied;

(d) denied;

(e) denied;

(f) denied.

See responses to E2 and E4.

6. Admit or deny that the Raw Asbestos milled and/or distributed on your behalf was contaminated with amphibole asbestos fibers.

Denied. See responses to E3, E4, and E5.

7. For each form of Raw Asbestos which you milled and/or distributed, and/or which was milled and/or distributed on your behalf, identify and produce all Documents and Objects evidencing, referring, or relating in any way to the Raw Asbestos, including, without limitation: (a) material cards; (b) process specifications; (c) purchase specifications; (d) photographs and drawings; (e) packages and containers; (f) labels; (g) industrial products index; and (g) samples.

LAQ will provide for inspection, testing and/or copying, documents and other items responsive to this request including Material Safety Data Sheets, bags, labels, fiber samples and documents relating to the type, nature and composition of LAQ asbestos. See also documents produced in response to discovery request C6.

8. Identify and describe each and every form of Raw Asbestos which you ever milled and/or distributed, and/or which was milled and/or distributed on your behalf and state for each

such form of Raw Asbestos: (a) the date such activity began; (b) the period or periods during which such activity took place; (c) the date on which such activity was terminated; (d) the reason why such activity was terminated; (e) the geographical area in which such activity took place; (f) your division, subsidiary, and/or other unit involved; (g) the site or sites at which such activity took place; (h) the specific type of Raw Asbestos (*i.e.*, chrysotile, amosite, crocidolite, tremolite, actinolite, or anthophyllite); (i) the trade or brand name of each such form of Raw Asbestos; (j) the size, capacity, dates used, and a description of each container and/or package in which each such form of Raw Asbestos was shipped; and (k) the dates used and a description of each logo, trademark, writing, impression, and/or other identifying marks which appeared on the package for each such form of Raw Asbestos, and whether the word "asbestos" was used thereon.

During the period following LAQ's incorporation in September 1952 and prior to July 1958, small quantities of raw chrysotile asbestos fiber were mined and sold by LAQ on a limited basis, this resulting from an exploratory and pilot program which preceded commercial operations. In July of 1958, with the opening of its mill in Black Lake, Province of Quebec, Canada, LAQ began to commercially mine, mill and sell its raw chrysotile asbestos fiber. In 1986, LAQ formed a wholly-owned subsidiary, Lac d'Amiante du Canada, Ltee (LAC), and sold to LAC, in exchange for all its capital stock, all of LAQ's asbestos mining and milling operations. From that point onward, LAQ did not participate in the mining, milling, processing, sale, and/or distribution of asbestos fiber. LAQ ceased mining, milling and selling raw asbestos fiber on or about June 30, 1986.

Black Lake is located in the Townships of Ireland and Coleraine, County of Megantic, Quebec, and encompasses an area of 469.59 acres. This region has a latitude of 41°, longitude of 74° and is elevated 750 feet above sea level.

In October 1973, LAQ acquired certain assets of National Asbestos Mines, Ltd. and began mining raw chrysotile asbestos fiber from what many persons in the area called the "National Mine." The National Mine was located in the Thetford Mines region of Quebec, Canada. LAQ's mining operation at the National Mine was sometimes referred to by LAQ as its National Mines Division. Active mining ceased at this location in October 1984.

The trade name of the chrysotile asbestos mined and milled by LAQ was "Lake Asbestos" until 1978, at which time the trade name was changed to "LAQ Asbestos."

LAQ's raw asbestos fiber was shipped to its customers in various types of bags. Heavy paper bags were used throughout LAQ's period of operations. Jute bags were used from 1958 to 1966. Jute bags lined with paper were used from 1966 until 1970. Polyethylene bags were used from 1962 to 1986. The use of woven polyethylene bags began in November 1969 and continued until 1986. Some shipments were palletized and unitized with a plastic wrapping.

Printing on the bags generally stated: "Lake Asbestos, Product of Lake Asbestos of Quebec, Ltd., Black Lake, Quebec, Canada". The bags also indicated the fiber type - e.g. "6D3", "4T4", "7D5", etc. After LAQ's name change in 1978, revisions were made to

reflect the new corporate name and brand of the fiber, i.e. "LAQ" rather than "Lake". The word "Asbestos" was always printed on all bags of LAQ fiber.

9. For each such form of Raw Asbestos you milled and/or distributed which was sold and/or distributed to CAPCO and/or to the Plant, describe: (a) the specific type of Raw Asbestos (i.e., chrysotile, amosite, crocidolite, tremolite, actinolite, or anthophyllite); (b) the brand and trade names of the Raw Asbestos; (c) the date of each shipment to CAPCO; (d) the date of each shipment to the Plant; (e) the quantity of each shipment to CAPCO; (f) the quantity of each shipment to the Plant; (g) the packaging of the Raw Asbestos; and (h) warnings and/or instructions included with the Raw Asbestos.

See answers to Interrogatories C1, C2, and E8. LAQ sold only raw chrysotile asbestos fiber. All fiber shipped by LAQ to Capco's Ragland plant was packaged in polyethylene bags, with the exception of several shipments made in 1964, 1965, 1967 and 1968. Shipments of chrysotile fiber on December 16, 21 and 31, 1964 and November 17 and 24, 1965, were made in pressure packed paper bags. Shipments of chrysotile fiber on December 21 and 31, 1964, July 11, 1967 and March 29, 1968 were made in pressure packed jute bags.

LAQ placed warnings concerning the potential health hazards of asbestos on its bags of raw asbestos fiber from March of 1970 until it ceased asbestos mining operations in June of 1986. LAQ also began distributing pamphlets regarding potential asbestos-related health issues to its customers in 1978, with each customer receiving enough pamphlets so that every one of its workers could receive his or her own original pamphlet.

The warning labels initiated in March 1970 stated:

CAUTION

**THIS BAG CONTAINS CHRYSOTILE ASBESTOS FIBER
PERSONS EXPOSED TO THIS MATERIAL SHOULD
USE ADEQUATE PROTECTIVE DEVICES AS INHALATION
OF THIS MATERIAL OVER LONG PERIODS MAY BE HARMFUL**

The warning was revised as of September 1972 to conform to new OSHA requirements and stated:

CAUTION

**CONTAINS ASBESTOS FIBER
AVOID CREATING DUST
BREATHING ASBESTOS DUST MAY CAUSE
SERIOUS BODILY HARM**

The warning was further revised as of June 1, 1977, to read as follows:

DANGER

**CONTAINS ASBESTOS FIBERS
AVOID CREATING DUST
ASBESTOSIS, LUNG CANCER AND OTHER FATAL
DISEASES MAY BE CAUSED BY INHALATION OF
ASBESTOS
SMOKING GREATLY INCREASES LUNG CANCER RISK**

Additionally, beginning in 1977, the following handling instructions were placed on bags of LAQ fiber:

**HANDLING INSTRUCTIONS: DO NOT SMOKE. ALWAYS
OPERATE AND MAINTAIN VENTILATION AND OTHER CONTROL
EQUIPMENT. WEAR APPROVED RESPIRATORS AS
INSTRUCTED. VACUUM LOOSE FIBRE OR WET BEFORE CLEAN UP.
DISCARD WASTE FIBRE IN SEALED BAGS. USE VACUUM
EQUIPMENT TO REMOVE DUST FROM CLOTHES. REPAIR
DAMAGED BAGS IMMEDIATELY.**

Moreover, beginning in 1972, LAQ provided information on the proper handling of its asbestos on Material Safety Data Sheets which were required by OSHA. The data sheets also included information relating to the disposal of asbestos, the proper clean up of asbestos, and other related issues. The following are excerpts from LAQ data sheets regarding the use of fiber:

"8 hour time weighted average 5 fibers/ml greater than 5 microns in length - concentrations above 5 fibers/ml not to exceed 10 fibers/ml at any time." "5 fibres per cc over 5 microns long on a 8Hr. time weighted average." "Potential Carcinogen. Governmental regulations has set 2.0 fibres per cc over 5 microns long on an 8 hour time weighted average." "Sufficient to keep dust count below 2.0 fibres per cc over 5 microns on an 8 hour time weighted average." "2.0 fibres per cc over 5 microns long on a 8Hr. time weighted average." "2 fibres longer than 5 microns per cubic centimeter." "Control with mechanical dust collection equip. to within TLV."

"Place waste in closed containers. Dispose of waste in closed containers. Avoid breathing excessive dust." "Discard waste fibre in sealed, properly labeled bags; dispose of in accordance with applicable EPA regulations." "Care should be taken to avoid asbestos dust to become airborne. Remove spillage and clean storage area by aspiration. Do not smoke. Always operate and maintain ventilation and other equipment. Wear approved respirators as instructed. Vacuum loose fibre or wet before clean up. Discard waste fibre in sealed bags. Use vacuum equipment to remove dust from clothes. Repair damaged bags

immediately." "Spillage should be cleaned up by aspiration, avoid sweeping or other methods causing asbestos to become airborne." "Use plastic bag for transportation. Dispose of waste in earth filled dump." "Maintain good housekeeping practices. Vacuum clean waste and place in closed containers. See caution label on bag." "Wet properly and place in a dustproof container or use a vacuum for aspiration. Bury under earth." "Avoid creating dust - use vacuum to remove spills."

"A clean-up procedure (i.e. vacuuming or wetting) which minimizes exposure is required. Place all material in closed containers with approved labels. If the possibility of dust exposure exists, wear NIOSH/MSHA approved respiratory protection." "Dispose of material in accordance with all Federal, state and local air pollution, water pollution and solid waste regulations. Recommend disposal in an EPA approved hazardous waste landfill." "Local exhaust ventilation, material wetting and/or respiratory protection is required for all sawing, grinding, cutting, bulk handling, spraying, demolition, removal or other activities where dust exposure may occur." "Avoid inhalation or ingestion of dust. Do not smoke. Practice good housekeeping and personal hygiene procedures. Avoid asbestos dust becoming airborne and remove spillage by vacuuming loose fiber or wetting before clean-up. Do not dry sweep. Repair damaged vacuum bags immediately. Place all material in closed containers properly labeled."

"Non Flammable." "Vacuum clean spillage - repair broken bags - if sweeping is necessary, wet down spillage - use approved respiratory equipment when required." "Wear approved respirators as instructed. Vacuum loose fibre or wet before clean up. Do not sweep or cause asbestos to become airborne. Repair damaged bags immediately." "Use respirators approved by NIOSH." "Wear NIOSH/MSHA approved self-contained breathing apparatus and protective clothing." "Use approved respirator when working in dusty condition." Use "NIOSH/MSHA [respiratory protection] approved for toxic dusts or asbestos." "Protective clothing is required if exposures exceed the OSHA ceiling limit or significant contact occurs. Remove all work clothing before leaving plant premises."

"Prolonged continuous exposure to asbestos dust may cause impairment to the respiratory system." "Long term exposure to high concentrations of asbestos fiber may cause pulmonary disease." "Asbestosis, lung cancer and other fatal diseases may be caused by inhalation of asbestos. Smoking greatly increases lung cancer risk." "Danger - Contains asbestos fibres - Avoid creating dust - Asbestosis, lung cancer and other fatal diseases may be caused by inhalation of asbestos. Smoking greatly increases lung cancer risk." "Care should be taken to avoid asbestos dust becoming airborne, remove spillage and clean storage area by aspiration." "Avoid breathing excessive dust when handling, dumping and mixing. See caution label on bag." "Inhalation of excessive asbestos dust can have detrimental effects on health." "Lung cancer." "Chronic inhalation of asbestos may cause symptoms of variable cough, dyspnea, chest pains, weakness and decreased chest expansion. Later findings may include asbestosis - a diffuse but non-uniform fibrosis of the lungs; and respiratory cancer."

With respect to the dates and quantities of LAQ chrysotile asbestos shipments to the Capco Ragland, Alabama Plant, see the attached invoices and other documents evidencing LAQ sales to this facility. By year, based on a detailed review of the available LAQ invoices, LAQ sold the following amounts of asbestos to the Capco Ragland, Alabama plant.

**LAQ SALES TO CAPCO PIPE COMPANY, INC.
RAGLAND, ALABAMA PLANT**

1964	1,000	short tons
1965	1,350	short tons
1966	2,350	short tons
1967	2,776	short tons
1968	4,694	short tons
1969	4,032	short tons
1970	2,688	short tons
1971	4,706	short tons

10. For each form of Raw Asbestos which you milled and/or distributed, and/or which was manufactured and/or distributed on your behalf, describe your decision, if any, to cease the mining, milling, processing, compounding, refining, and/or distribution of the Raw Asbestos.

In 1986, LAQ formed a wholly-owned subsidiary, Lac d'Amiante du Canada, Ltee (LAC), and sold to LAC, in exchange for stock, all of LAQ's asbestos mining and milling operations. (These actions were taken for tax, accounting and other reasons in order to allow LAC (and not LAQ) to join as one of four limited partners a new Quebec limited partnership that through its general partner would mine and sell asbestos from several different mining properties to customers around the world.) From that point onward, LAQ did not participate in the mining, milling, processing, sale, and/or distribution of asbestos fiber.

11. Identify each grade of Raw Asbestos distributed in North America including, without limitation: (a) its alphabetical and/or numerical designation; (b) its physical and chemical characteristics; (c) its function and intended purpose; (d) its asbestos composition (by volume,

weight, and type); (e) when you milled it; and (f) the industries and entities to which you distributed it.

During the period following LAQ's incorporation in September 1952 and prior to July 1958, LAQ mined and sold small quantities of raw asbestos fiber on a limited basis, the result of an exploratory and pilot program which preceded commercial operations. In July of 1958, with the opening of its mill, LAQ began to commercially mine, mill and sell its raw asbestos fiber. LAQ ceased mining, milling and selling raw asbestos fiber on or about June 30, 1986.

LAQ's raw asbestos fiber is chrysotile asbestos. LAQ's raw asbestos fiber was not altered except that it was separated from the host rock and milled for the purpose of separating grades of fiber. Milled chrysotile is a somewhat fluffy material of a generally white-gray color. Chrysotile asbestos is a hydrous magnesium silicate. A typical raw asbestos fiber included the following:

MgO	40.6%
SiO ₂	39.8%
Al ₂ O ₃	0.7%
FeO	1.3%
Fe ₂ O ₃	2.3%
CO ₂	0.5%
CaO	1.0%
H ₂ O	13.8%

LAQ sold chrysotile fiber only to sophisticated manufacturing companies which used the chrysotile in their manufacturing processes. LAQ's Black Lake chrysotile fiber was darker than that of many of LAQ's competitors, and was therefore rejected for use in many color-sensitive finished products. In addition, the general length, strength and superior filtration characteristics of LAQ's Black Lake chrysotile fiber made it particularly suitable for the production of asbestos cement pipe.

LAQ mined, milled and sold the following grades of raw chrysotile fiber between September 1952 and June 30, 1986: 3F3, 3F4, 3K, 3K-EXP, 3K2, 3K3, 3K4, 3R, 3R2, 3R3, 3REXP, 3R4, 3T, 3T1, 3T3, 3T4, 3Z, 3Z3, 3Z4, 362, 4A3, 4A4, 4B2, 4B3, 4BEX, 4BX, 4D2, 4D2X, 4D3, 4D4, 4D4G, 4K4G, 4D-110, 4K, 4K3, 4K4, 4K5, 4K-500, 4M4, 4T, 4T1, 4T2, 4T3, 4T35, 4T3-R5, 4T3-76, 4T4, 4T4B, 4T4G, 4T5, 4T5EX, 4T-100, 4T-110, 4Z3, 4Z4, 5-100, 5D, 5D3, 5D3EX, 5D4, 5D4G, 5D5, 5DEX, 5D5EX, 5K, 5K3, 5K4, 5K4-1, 5K4BL, 5K5, 5M3, 5M4, 5R, 5R1, 5R2, 5R3, 5R4, 5R4-B, 5R4-1, 5R4-BL, 5R5, 5R5EX, 5T, 5Z3, 5Z4, 5Z5, 6D, 6D1, 6D2, 6D3, 6D4, 6D4B, 6D4BL, 6D4C, 6D4EX, 6D4S, 6D4SP, 6D46, 6D5, 6D5EX, 6F3, 6F4, 777, 7D, 7D1, 7D2, 7D3, 7D4, 7D4EX, 7D4-BL, 7D5, 7F2, 7F4, 7F5, 7H2, 7H3, 7H4, 7K2, 7K3, 7K4, 7M1, 7M2, 7M2C, 7M3, 7M4, 7M5, 7MS-1, 7MX, 7R2, 7R3, 7R4, 7R5, 7R5-3, 7R6, 7RF3, 7RS-1, 7RS-2, 7RS-11, 7T2, 7T4, 7T5, 7T6, 7T7, 7TS-1, 7TS-5, 7TS-30, 7TS-31, 8S, 17R3, 17R4, 17T1, 17T2, 17T3, 17T4, 17TS-1 and 17TS5.

12. For each form of Raw Asbestos which you milled and/or distributed, and/or which was manufactured and/or distributed on your behalf, describe your decision, if any, to cease the mining, milling, processing, compounding, refining, and/or distribution of the Raw Asbestos.

See LAQ's responses to discovery requests E8 and E10.

13. For each form of Raw Asbestos which you milled and/or distributed, and/or which was milled and/or distributed on your behalf, identify and produce all Documents and Objects evidencing, referring, or relating in any way to your decision, if any, to cease the milling and/or distribution of the Raw Asbestos.

Not applicable. See LAQ's responses to discovery requests E8, E10, and E12.

14. Admit or deny that you milled and/or distributed Raw Asbestos which was sold and/or distributed to CAPCO.

Admitted.

15. Separately admit or deny that the Raw Asbestos you milled and/or distributed which was sold and/or distributed to CAPCO consisted of or included each of the following types of asbestos: (a) chrysotile; (b) amosite; (c) crocidolite; (d) tremolite; (e) actinolite; and/or (f) anthophyllite.

- (a) admitted;
- (b) denied;
- (c) denied;
- (d) denied;
- (e) denied;
- (f) denied.

16. Admit or deny that the Raw Asbestos you milled and/or distributed which was sold and/or distributed to CAPCO was contaminated with amphibole asbestos fibers.

Denied.

17. Admit or deny that you milled and/or distributed Raw Asbestos which was used at the Plant.

LAQ admits that it milled and sold chrysotile asbestos which was used at the Capco Ragland plant.

18. Separately admit or deny that the Raw Asbestos you milled and/or distributed which was used at the Plant consisted of or included each of the following types of asbestos: (a) chrysotile; (b) amosite; (c) tremolite; (e) actinolite; and/or (f) anthophyllite.

- (a) admitted;
- (b) denied;
- (c) denied;
- (d) denied;
- (e) denied;
- (f) denied.

19. Admit or deny that the Raw Asbestos you milled and/or distributed which was used at the Plant was contaminated with amphibole asbestos fibers.

Denied.

20. Identify and produce all Document and Objects evidencing, referring, or relating in any way to the operation of any factory, warehouse, and/or other facility at which any Raw Asbestos was milled or from which any Raw Asbestos was distributed.

See documents provided by LAQ in response to this discovery request.

F. Development and Testing of Raw Asbestos.

1. For each form of Raw Asbestos which you milled and/or distributed, and/or which was milled and /or distributed on your behalf, identify and describe the testing, if any, performed by you and or on your behalf, including, without limitation, tests performed to determine the hazards of exposure to the Raw Asbestos.

LAQ performed numerous standard test procedures for evaluation of raw asbestos fiber including tests in some or all of the following categories: sampling, fiber length, bulk and density, viscosity, air permeability, filtration or freeness, oil absorption, rock and fiber spicules, color, moisture, detection of foreign materials, potential index, asbestos cement fiber, tensile strength and magnetic rating. Testing was an integral part of providing customers with exactly the right fiber for their individual needs. Testing was designed to achieve the following objectives: greater uniformity of fiber length and length distribution, closer control of degree of fiberization, closer control of material of the fine particle size in the longer grades, and closer control of filtration rates. Implementing this program necessitated the addition of many different types of equipment and the employment of technicians whose only responsibility was to see that LAQ's fiber met the established specifications. Tests were made not only before shipment of fiber but also at various points in the milling process so that the required uniformity could be achieved.

Fiber sampling is the procedure for producing a representative sample from a larger amount of asbestos. Typically, a ten pound sample would be rolled in such a manner that rock and spicules accumulate on the bottom of the fiber pile. The sample is shaped into a cone and quartered. One quarter of the sample is then coned and quartered repeatedly until the desired sample size is produced. Samples are subjected to further testing.

Tests for fiber length include the Quebec Standard Screen, the Bauer-McNett, the Ro-Tap Sieve Analysis, the Suter-Webb Length Distribution test and the Dust Content-Dry Test. Details concerning each test follows.

The Quebec Standard Screen Test measures fiber length by using a machine consisting of four or five nesting boxes which are superimposed one above the other. The bottoms of the top boxes are made to specification from brass screening material. Sixteen ounces of asbestos are placed on the uppermost tray which is then covered and tightly clamped. The machine is set to make exactly 600 revolutions. The asbestos which remains in each box is weighed. The results are reported as the weight of asbestos retained in each box, expressed in ounces. The total is always sixteen, and one-tenth ounce is the smallest fraction reported. LAQ had an asbestos grade classification which followed and amplified the Canadian Standard.

The Bauer-McNett Fiber Classifier is able to make an accurate determination of length distribution and fines content of milled asbestos fiber. The classifier is composed of four or five tanks arranged in a cascade pattern so that the effluent from the first tank flows by gravity into each of the lower tanks. The overflow from the bottom tank discharges into a drain. Each tank is divided into two equal sections by a removable screen. The larger section of each tank is provided with means for mechanical agitation of the water-asbestos dispersion passing through it. At the bottom of each tank, is a drain hole with pipe connected to a filter-holding drain cup. Each tank is fitted with a screen of different mesh, the coarsest mesh in the first tank and the finest mesh in the last tank. A weighted filter paper is positioned in each drain cup. Drain holes are stoppered, the tanks are filled with water, the agitators are started and the flow of water is adjusted to obtain a steady flow from tank to tank and from the last tank to the drain. At the end of a run, each tank is drained through its own filter cup and the screen and tank interior are thoroughly rinsed, insuring that all fiber adhering to them is deposited on the filter paper for that tank. The filter papers with their individual sample fractions are removed, dried and weighed. The percentage of the original sample remaining in each tank and the percentage passing through the last tank is calculated. The mesh of the screens used and the percentage of the sample retained in each tank serves as a precise measure of the grade of asbestos fiber being tested.

The Ro-Tap machine is a mechanical sieve shaker with automatic timer. There are Tyler sieves for each of the different asbestos fiber grades. A 50 gram sample is used for fiber grades of 3, 4 and 5 and a 100 gram sample is used for fiber grades 6, 7 and floats. The sample is placed in the top sieve of the nest of sieves with the smallest screen at the bottom and the largest on top. The nest is covered, shaken and tapped for a prescribed period of time. The amount of material retained on each screen is then weighed to 0.1 gram. The percent of material by weight retained on each sieve and pan is reported.

The Suter-Webb Length Distribution test is appropriate for grade three fiber only. The fiber sample is prepared according to precise directions. The sample is aligned and

combed with special equipment which includes forceps, leather tipped tweezers, a velvet cover plate and special combs. The results are reported as fiber length distribution and average fiber length. The length distribution of the fibers is obtained by calculating the weight percent of fiber in each length fraction. The average length of the sample is equal to the sum of the average length of a fraction times the weight of that fraction divided by the total sample weight.

For the dust content-dry test, a fiber sample of prescribed weight is placed between two screens that are clamped so that they can be rotated 180 degrees. Air jets are directed on the screen for a prescribed number of minutes. The fiber remaining on the screens is weighed. The results are reported as percent weight loss as - 100 mesh dust.

There are three types of bulk and density testing as follows: (1) wet bulk density (2) dry bulk density and (3) wet cake weight. Wet bulk density testing for fiber grades 4 & 5 is carried out by placing 500 ml. of water at 77 degrees Fahrenheit into a 500 milliliter graduate cylinder. The cylinder is inverted a prescribed number of times according to the grade of fiber being tested. The report includes the volume in milliliters to which the fiber has settled at the end of 1, 2, 3, 4, and 5 minutes for grade four fiber and 5 and 60 minutes for grade five fiber. Wet bulk density testing for fiber grades 6, 7 and floats is carried out by placing 990 milliliters of water at 77 degrees Fahrenheit into a 1000 milliliter graduate cylinder. Fifty grams of asbestos fiber is added to the cylinder that is then filled to the brim with water. The cylinder is inverted twenty times. Then, a technician reads the water-fiber line after 1, 2, 4 and 8 hours. The volume in milliliters to which the fiber has settled at the end of 8 hours is reported. Two tests are done for each fiber type and the reports averaged.

For Dry bulk density testing, 100 grams of fiber are lightly hand rubbed to eliminate wads or lumps. The fiber is transferred to a folded paper and poured gently into a 100 milliliter graduate cylinder without tapping or tamping. The volume is reported in milliliters occupied by the 100 grams of fiber and/or in pounds per cubic foot.

After the wet bulk density test has been completed, the wet cake weight test is done. A tin cylinder four inches in diameter and 4-8 inches long is fitted on one end with a 35 mesh wire disk. The fiber-water mixture from the wet bulk density test is poured into the can and allowed to drain until the dripping stops. The weight of the drained fiber is reported in grams.

One type of viscosity test is performed with a MacMichael Viscosimeter, Texaco Altair Oil SAE-30 oil, a ½ gallon can and a portable electric cake mixer. The mixing procedure is similar to mixing cake dough, i.e., adding liquid in small increments to prevent the formation of lumps. After all the oil has been added, the mixture is allowed to stand for ½ hour. Then, a reading is taken on the viscosimeter. The cup of the viscosimeter is filled to the top with the oil and fiber mixture. The mixture is worked with a spatula to release air bubbles. Viscosity is measured at 77 degrees Fahrenheit with a 22 gauge wire equipped with a one centimeter in diameter cylindrical plunger. The viscosimeter is set at 20 r.p.m.

and a reading is taken after 10 seconds of rotation. The viscosity report is the average of three readings.

A viscosity test may also be performed with a Clarvov consistometer, asphalt cutback slate dust and asbestos fiber. A standard mix is prepared which requires some judgment as to the amount of asbestos fiber. The mix is heated to 77 degrees Fahrenheit. A consistency reading is taken with a brass rod loaded with 150 grams of mix. The time required for the rod to penetrate four inches is recorded. A standard penetration of 5.0 to 6.0 seconds is required. If the time is not 5.0 to 6.0 seconds a new batch with more or less fiber must be made and tested.

One type of air permeability test is performed with a cylindrical chamber 4 inches high and 1 1/2 inches in diameter with a 100 mesh copper screen on one end. A cylindrical compression cup is used with a sample asbestos fiber that has a porosity of 0.80. Air flow is regulated on a Precision Bore Flowrator. Pressures are recorded on either standard "U" tube mercury or water manometers, graduated in centimeters. Air is drawn through the sample by a vacuum pump having a free displacement of 1.3 cfm. Readings on the manometer record the differential pressure across the packed asbestos fiber bed. The average pressure for three runs is reported for relative degree of openness or fineness of the fiber.

Air permeability may also be tested using an air permeability tester, Blaine design, Dyckerhoff system. A 56 gram sample of asbestos fiber with porosity rating 0.7 to S, G. 2.55 is tamped into a cell and compressed with a plunger. The plunger is locked into place to prevent fiber springback. The time it takes for air to be drawn through the fiber plug is recorded to the nearest second. The time is read directly from a clock which is set to stop when a predetermined quantity of air has been drawn through the fiber sample. The test is repeated four times for each fiber sample and the average recorded in seconds. To convert permeability readings in seconds to effective surface area, refer to a suitable calibration graph to determine the surface area in terms of cm^2/gm .

The filtration or freeness test is performed with a 14 inch piece of a 2 inch copper tubing with an adapter at one end to which a cup is screwed. A piece of stainless steel screen is attached to a ring and placed into the cup to give volume of approximately 50 milliliters between the screen and the bottom of the cup. A 1/4 inch pet-cock is fastened to the bottom of the cup. Ten grams of fiber are poured into a 100 milliliter graduate cylinder, and water at 77 degrees Fahrenheit is added to the 500 milliliter mark. The cylinder is inverted 20 times. The slurry is poured quickly into the tube so that the fiber will cover the screen uniformly. After 5 seconds, the pet-cock is opened. Timing starts when 50 milliliters have drained. The interval between 50 milliliters and 150 milliliters is measured and recorded. The time to collect the 100 milliliters of water is reported in seconds as a measure of the freeness.

Oil absorption is tested with a 20-gram sample of fiber. Raw chemical grade linseed oil is added to the fiber sample slowly - one or two drops at a time. The mixture is stirred

with a stiff spatula. The end point is reached when oil can be squeezed out of a ¼ inch diameter ball of fiber held between thumb and first finger. Oil absorption is reported as the amount of oil to reach the end point in milliliters per 100 grams of fiber.

Fiber is tested for rock and spicules using a standard gold pan 16 inches in diameter. Following precise directions for each fiber grade, fiber and water are placed in the gold pan. The pan is agitated 8 to 10 times to give a circular motion to the water in the pan. More water is added and allowed to settle for a few seconds. The pan is tilted to let some of the water out and also as a means of rejecting the floating fiber. This step is repeated several times. When most of the open fiber has been rejected, the remaining fiber is agitated with the finger tips to break the lumps. This step is repeated until all the open fiber has been floated out. The remainder is call the grit. The grit is collected into an evaporating dish, the excess water is decanted and the material is dried under infrared lamps for 20 minutes. The material is weighed and reported as the percent of grit in the fiber. Then, the grit is placed on a 20 x 20 mesh Ro-Tap sieve which is tapped by hand to get rid of the minus 20 mesh fibers. By moving the finger tips over the residue, a technician counts the particles of rock which roll under the finger tips. If the particle count is over 15 it is reported as "lots of particles". If the particle count is less than 15, the exact number of particles is reported. Then, by visual examination of the residue on the 30 mesh sieve the pieces of unopened fiber are counted. If only one or two unopened fibers are found, it is report as "none". If three to five unopened fibers are found, it is reported as "few". If more than five unopened fibers are found, it is reported as "many".

Color testing of asbestos fiber is done with a photoelectric reflection meter with a standard search unit. Interchangeable glass color filters are required with green, blue and amber tristimulus filters. One white enamel working standard calibrated for filters is also required. A sample of asbestos fiber is placed in a cup and pressed to a layer about ¼ inch thick. The cup is placed on the search unit and a galvanometer reading is taken. The report includes the galvanometer reading on the test sample, the color of filter used, and working standard galvanometer readings before and after each test.

Asbestos is tested for moisture by placing 100 grams of fiber to dry at 105 degrees Centigrade for three hours. The sample is reweighed and the percentage of weight loss is calculated and reported as a percentage of moisture of the original, undried sample.

Asbestos fiber is tested in several ways to detect foreign material. Tests for staining are performed by making "pats" from 75% white cement and 25% asbestos fiber. The material is cured for one day and then autoclaved for eight hours at 125 psi (350 degrees Fahrenheit). The material is then inspected for discolored areas. Testing for wood fiber is performed by dumping fiber into water and stirring to disperse the lumps. After the mixture stands for a while, the surface of the water is inspected for floating wood.

Testing for tar, petroleum products, or belt dressing is performed by making a slurry of fiber which is 50% carbon tetrachloride or ether and benzene. The mixture is

agitated to dissolve organic impurities and then filtered. The solvents are allowed to evaporate and the residue examined.

Testing for cotton or wool is performed after a fiber sample has been tested for wood and/or soluble organics as described previously. Examining the fibers under magnification may be sufficient to reveal the presence of fibers such as cotton or wool. Since a wool or cotton fiber will burn when exposed to a flame while asbestos fibers will not. The burned fiber provides the final confirmation of their organic nature.

The potential index test is performed by spreading five pounds of asbestos fiber out on a table and sucking it up with a flexible hose from a blower at a constant rate. After all the fiber has passed through the blower and settled into the can under the collector, the sample is weighed. The following tests are run on the samples to determine when the full potential of the fiber has been developed: flexural strength of asbestos cement pats, Bauer-McNett, wet and dry bulk density, air permeability, water filtration rate, Ro-Tap, and Quebec Standard Screen.

Prescribed formulas are used for preparing the mix in the asbestos cement fiber test. "Pats" of the mixture are steam cured and allowed to condition 16 to 24 hours at room temperature, 100% RH desiccator before autoclaving 7 hours at 125 psig saturated steam. If the normal or humidity cure is used, the "pats" are allowed to cure 7 days at room temperature and 100% RH. It is always advisable to have a set of control "pats" made from a standard fiber. The resulting material is tested for flexural strength, water absorption, density, and percentage of fiber. Reports include data on formula and curing method, flexural strength, density and water absorption test results.

Tensile strength testing is performed with a Clemson Flat Bundle Fiber Tester. Bundle samples are selected by carefully slicing a segment from a chunk of crude fiber along the long axis of the specimen. Samples are usually from 0.5 to 1.5 mg. in weight and from 1.0 to 2.5 cm. in length. The sample is placed in the clamping fixtures of the Clemson Flat Bundle Fiber Tester. A constant rate of load of 1000 grams per second is applied to the sample. Breaking load, in grams, is recorded on a chart by means of a pen attached to the loading system. There is a complicated formula for calculating the tensile strength from this data.

Magnetic testing of asbestos fiber is performed with a Mapes Magnetic Analyzer, including test solenoid and amplifier, specified test specimen holders, standard magnetite powder and C.P. zinc oxide. A ten-gram sample of asbestos fiber is placed in the specimen holder. The apparatus is energized and permitted to warm up for several minutes to become stable. The secondary coils are then balanced using the balancing coil until the deflection on the amplifier dial is a minimum at full sensitivity. The sensitivity is then decreased and the calibrating standard for the range of test desired is placed in the testing solenoid. The amplifier gain control is then adjusted to give a full-scale deflection equal to the magnetic rating of the calibrating standard. The calibrating standard is then removed,

and the sample holder with the 10-gram asbestos test specimen is inserted in the solenoid. The instrument will give the magnetic rating of the asbestos specimen.

Although LAQ has recognized since its inception that exposure to an excessive amount of asbestos over a prolonged period of time might result in the development of asbestosis in some particularly susceptible individuals, LAQ always believed that its chrysotile asbestos could be used safely if appropriate and well known industrial hygiene practices and safety measures were followed.

In order to better understand asbestos-related disease, LAQ helped to fund numerous health studies through its affiliation with certain asbestos-related associations. The Quebec Asbestos Mining Association ("QAMA"), which LAQ joined in 1959, has funded a number of studies in regard to the health aspects of asbestos, some number of which preceded the membership of LAQ in QAMA and in some cases, preceded the existence of LAQ.

The members of the QAMA established the Institute of Occupational and Environmental Health in 1966 with the objective of better assessing the biological effects of asbestos on the health of asbestos workers and the general public. That Institute has supported dozens of research projects in North America and Europe from which numerous scientific publications on the issue of asbestos and health have originated.

Finally, the Asbestos Textile Institute/Asbestos Textile Institute, Inc. ("ATI"), in which LAQ was an associate member between 1959 and 1981, has funded a number of studies with regard to the minimization and elimination of asbestos dust and fibers in the workplace via the implementation of sound industrial hygiene practices and the use of vacuums, filters and other machinery and equipment designed to minimize or eliminate dust. Many of these studies preceded the associate membership of LAQ in the ATI and in some cases preceded the existence of LAQ. Since LAQ was only an associate member of ATI, it held no officer positions in ATI management, and was precluded from voting on policy-making decisions, including such matters as what studies to sponsor and at what funding levels.

2. For each form of Raw Asbestos which you milled and/or distributed, and/or which was milled and/or distributed on your behalf, identify and produce all Documents and Objects evidencing, referring, or relating in anyway to the development and testing of the Raw Asbestos, including, without limitations: (a) design documents; (b) drawings; (c) photographs; (d) laboratory testing data; and (e) reports.

See documents produced by LAQ in response to this discovery request. See also documents produced in response to discovery request E7.

G. Marketing, Sales, and Distribution of Raw Asbestos

1. Identify and produce all Document and Objects evidencing, referring, or relating in any way to the marketing, sales, and/or distribution of Raw Asbestos milled and/or distributed by you and/or on your behalf, including, without limitation: (a) product brochures; (b) pamphlets; (c) catalogs; (d) advertisements; (e) sales contracts; (f) purchase orders; (g) stock transfers; (h) job orders; (i) freight bills; (j) shipping tickets; (k) receipts; (l) sales invoices; and (m) delivery papers.

See LAQ's product brochures, pamphlets, catalogs, and advertisements relating to the marketing, sales and/or distribution of LAQ's asbestos fiber, which are produced in response to this discovery request. See also documents produced in response to discovery request E20.

2. Identify each of your employees responsible for the marketing, sales, and/or distribution of any Raw Asbestos milled and/or distributed by you and/or on your behalf: (a) to CAPCO; (b) to the Plant; (c) to any defendant in this case.

Roland P. Gagnon, former Senior Vice-President, retired.

3. Identify each of your employees who has ever visited the Plant.

**Edward A. Farrell, former Manager and Director of Sales;
Roland P. Gagnon, former Senior Vice-President of Marketing;
Michael J. Messel, former President;
Harold F. X. Plate, former Manager of Marketing;
Lionel C. Piuze, former Vice-President of Operations, deceased; and
Andre Gauthier, former Senior Vice-President of Operations, deceased.**

4. Identify each of your employees who has any knowledge of the manner in which any Raw Asbestos milled and/or distributed by you and/or on your behalf was used at the Plant.

**Edward A. Farrell, former Manager and Director of Sales;
Roland P. Gagnon, former Senior Vice-President of Marketing;
Michael J. Messel, former President;
Harold F. X. Plate, former Manager of Marketing;
Lionel C. Piuze, former Vice-President of Operations, deceased; and
Andre Gauthier, former Senior Vice-President of Operations, deceased.**

5. Identify and produce all Document and Objects evidencing, referring, or relating in any way to the use of any Raw Asbestos milled and/or distributed by you and/or on your behalf at the Plant.

See documents regarding the sale and use of LAQ chrysotile asbestos fiber at the Capco Ragland plant which are produced in response to this and other discovery requests. See also documents produced in response to discovery request F2.

6. Identify each Alabama distributor and/or wholesaler of any Raw Asbestos milled and/or distributed by you and/or on your behalf.

LAQ did not utilize any distributor or wholesaler in the state of Alabama.

7. Identify and produce all Document and Objects evidencing, referring, or relating in any way to the sale and/or distribution of Raw Asbestos milled and/or distributed by you and/or on your behalf: (a) to CAPCO; (b) to the Plant; and/or (c) to any defendant in this case.

LAQ did not sell or distribute asbestos fiber to any of the defendants in this case. See documents regarding sale of LAQ chrysotile asbestos fiber to the Capco Ragland plant.

H. Asbestos-Related Patents

1. Identify and describe each patent which you have ever owned or in which you have ever had license rights relating to Raw Asbestos milled and/or distributed by you and/or on your behalf, including, without limitation: (a) the patent number; (b) the date of the patent; (c) the title of the patent; (d) the inventor; (e) the assignor, if any; and (f) the assignee, if any.

LAQ has never owned any patents. LAQ had a license to Canadian Patent No. 925, 473 relating to the magnetic separation of asbestos fiber. LAQ also had a Technology Licensing Agreement with Johns-Manville that gave LAQ a non-exclusive license to utilize certain technology related to the packaging of asbestos fiber. It would appear, however, that LAQ never paid any licensing fees to Johns-Manville under this agreement and probably never used this technology.

2. Identify and describe each patent which you have ever owned or in which you have ever had license rights relating to substitutes or replacements for Raw Asbestos milled and/or distributed by you and/or on your behalf, including, without limitation: (a) the patent number; (b) the date of the patent; (c) the title of the patent; (d) the inventor; (e) the assignor, if any; and (f) the assignee if any.

None. See response to discovery request H1.

3. Identify and describe each patent which you have ever owned or in which you have ever had license rights relating to safety devices which might minimize or mitigate any possible harmful effects of asbestos fibers or particulates, including, without limitation: (a) the patent number; (b) the date of the patent; (c) the title of the patent; (d) the inventor; (e) the assignor, if any; and (f) the assignee, if any.

None. See response to discovery request H1.

4. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to all patents which you have owned or in which you have had license rights relating to: (a) Raw Asbestos milled and/or distributed by you and/or on your behalf; (b) substitutes or replacements for Raw Asbestos milled and/or distributed by you and/or on your behalf; and (c) safety devices which might minimize or mitigate any possible harmful effects of asbestos fibers or particulates.

Please see the documents produced by LAQ in response to this discovery request.

I. Asbestos-Related Diseases

1. Admit or deny that exposure to asbestos fibers and/or dust can cause and/or contribute to the causation of the following conditions: (a) pleural thickening; (b) pleural plaque; (c) asbestosis; (d) lung cancer (of any type); (e) cancers other than lung cancer; and (f) mesothelioma.

(a) LAQ admits only that inhalation of excessive quantities of asbestos fibers over an extended period of time may cause or contribute to pleural thickening in susceptible individuals.

(b) LAQ admits only that inhalation of excessive quantities of asbestos fibers over an extended period of time may cause or contribute to the development of pleural plaques in susceptible individuals.

(c) LAQ admits only that inhalation of excessive quantities of asbestos fibers over an extended period of time may cause or contribute to asbestosis in susceptible individuals.

(d) LAQ admits only that inhalation of excessive quantities of certain types of asbestos fibers over an extended period of time may cause or contribute to certain types of lung cancers in susceptible individuals.

(e) LAQ is without knowledge or information sufficient to either admit or deny this request as the phrase "cancers other than lung cancer" is not sufficiently precise. Nevertheless, LAQ admits only that inhalation of excessive quantities of asbestos fibers over an extended period of time is believed by some individuals to cause or contribute to certain non-pulmonary tumors. Many researchers believe, however, that there is little or no evidence supporting a causal relationship between the inhalation of chrysotile asbestos and the development of non-pulmonary tumors.

(f) LAQ admits only that inhalation of sufficient quantities of certain types of asbestos fibers over a sufficient period of time may cause or contribute to mesothelioma in susceptible individuals.

2. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to Asbestos-Related Diseases which you prepared, generated, and/or reviewed.

See documents produced by LAQ in response to this discovery request. See also documents produced in response to discovery requests C6 and E7.

3. State whether you contend that there is a safe level of asbestos fiber dust that can be inhaled by human beings that will not increase the risk of any harm to their bodies, what that level is, and the basis for your contention

LAQ contends that there is safe threshold level of exposure, at least as to chrysotile asbestos, below which there is no increased risk of developing asbestosis, mesothelioma or lung cancer. Beyond the information provided, this interrogatory requests detailed expert opinions with regard to medical and industrial hygiene matters on which LAQ is neither competent nor qualified to render an opinion.

J. Defendant's Knowledge of the Hazards of Asbestos

1. Separately admit or deny, for each of the following years, that you had actual knowledge that exposure to asbestos constituted a hazard to the health of human beings at least since: (a) 1930; (b) 1940; (c) 1950; (d) 1960; (e) 1970; (f) 1980; or (g) 1990.

(a) As LAQ was not incorporated until 1952, this subpart is denied;

(b) As LAQ was not incorporated until 1952, this subpart is denied;

(c) As LAQ was not incorporated until 1952, this subpart is denied;

(d) LAQ admits only that as of 1960 it had actual knowledge both that inhalation of excessive quantities of asbestos over prolonged periods of time could be hazardous to the health of certain susceptible individuals and that there were well understood and widely available methods of industrial hygiene which could ensure that the use of LAQ's chrysotile asbestos would not pose a hazard to human health.

(e) LAQ admits only that as of 1970 it had actual knowledge both that inhalation of excessive quantities of asbestos over prolonged periods of time could be hazardous to the health of certain susceptible individuals and that there were well understood and widely available methods of industrial hygiene which could ensure that the use of LAQ's chrysotile asbestos would not pose a hazard to human health.

(f) LAQ admits only that as of 1980 it had actual knowledge both that inhalation of excessive quantities of asbestos over prolonged periods of time could be hazardous to the health of certain susceptible individuals and that there were well understood and widely available methods of industrial hygiene which could ensure that the use of LAQ's chrysotile asbestos would not pose a hazard to human health.

(g) LAQ admits only that as of 1990 it had actual knowledge both that inhalation of excessive quantities of asbestos over prolonged periods of time could be hazardous to the health of certain susceptible individuals and that there were well understood and widely available methods of industrial hygiene which could ensure that the use of LAQ's chrysotile asbestos would not pose a hazard to human health.

2. Separately admit or deny, for each of the following years, that in the exercise of reasonable care you should have known, from an investigation of the medical and/or scientific literature and/or from diligent inquiry, that exposure to asbestos constituted a hazard to the health of human beings at least since: (a) 1930; (b) 1940; (c) 1950; (d) 1960; (e) 1970; (f) 1980; or (g) 1990.

(a) As LAQ was not incorporated until 1952, this subpart is denied;

(b) As LAQ was not incorporated until 1952, this subpart is denied;

(c) As LAQ was not incorporated until 1952, this subpart is denied;

(d) LAQ admits only that as of 1960 the medical literature revealed that inhalation of excessive quantities of asbestos over prolonged periods of time could be hazardous to the health of certain susceptible individuals (see also response to J1(d));

(e) LAQ admits only that as of 1970 the medical literature revealed that inhalation of excessive quantities of chrysotile asbestos over prolonged periods of time could be hazardous to the health of certain susceptible individuals. LAQ further admits that as of 1970 certain authorities believed that amphibole asbestos fiber, and in particular crocidolite, poses a potential health hazard at lower exposure levels and shorter exposure durations than does chrysotile. See also response to J1(e).

(f) LAQ admits only that as of 1980 the medical literature revealed that inhalation of excessive quantities of chrysotile asbestos over prolonged periods of time could be hazardous to the health of certain susceptible individuals. LAQ further admits that as of 1980 certain authorities believed that amphibole asbestos fiber, and in particular crocidolite, poses a potential health hazard at lower exposure levels and shorter exposure durations than does chrysotile. See also response to J1(f).

(g) LAQ admits only that as of 1990 the medial literature revealed that inhalation of excessive quantities of chrysotile asbestos over prolonged periods of time could be hazardous to the health of certain susceptible individuals. LAQ further admits that as of 1990 most authorities believed that amphibole asbestos fiber, and in particular crocidolite, poses a potential health hazard at lower exposure levels and shorter exposure durations than does chrysotile. See also response to J1(g).

3. When did you first learn that exposure to asbestos fibers and/or dust can cause, and/or contribute to the causation of, the following conditions: (a) pleural thickening; (b) pleural plaque; (c) asbestosis; (d) lung cancer (of any type); (e) cancers other than lung cancer; and (f) mesothelioma?

Since the incorporation of LAQ, the management of LAQ has been aware of the possibility that particularly susceptible persons who are exposed to excessive amounts of asbestos fibers over a prolonged period of time might develop the disease asbestosis. LAQ management was further aware that this information was common knowledge among governmental and private industrial hygienists, occupational physicians and the large sophisticated manufacturing concerns to which LAQ began selling chrysotile fiber in 1958. In addition, medical and scientific literature on the potential dangers of asbestos had been published in a wide variety of medical and scientific periodicals, textbooks, and other publications which were readily available to any interested entity or individual.

At or around the time that LAQ began the commercial sale of chrysotile fiber in 1958, it became aware of contradictory articles in the medical literature on whether there was an association between asbestosis and an increased incidence of lung cancer. LAQ is and was aware that most authors who reported the possibility of such an association recognized that both the methodology of the studies and the limited number of cases reported prevented any firm conclusions. Furthermore, LAQ is and was aware that many researchers had reported a lack of association between asbestos exposure and lung cancer and asbestosis and lung cancer.

In addition, through the 1960's LAQ continued to learn of the publication of new studies regarding the health effects of asbestos inhalation. In 1964 LAQ became aware of an epidemiological study which suggested that persons exposed to asbestos-containing products might have an increased risk of developing lung cancer, mesothelioma and certain gastro-intestinal cancers. This study did not, however, differentiate between manufacturing processes or between chrysotile and other forms of asbestos, nor did it take into account the role of cigarette smoking in causing cancer or the levels of workers' exposure to asbestos dust, including such concepts as dose-response relationships and threshold limit values. Many further studies which have been reported since that time have indicated that the risk of developing lung cancer as a result of exposure to chrysotile asbestos is minimal except in extraordinary circumstances of overexposure of high intensity and long duration. Considering the state of industrial hygiene during the period July 1958 to June 1986 (the time frame during which LAQ sold commercial quantities of asbestos fiber), such extraordinary circumstances should not have existed.

Similarly, since the mid-1960's most researchers have reported little or no association between exposure to chrysotile asbestos and the development of mesothelioma or gastro-intestinal cancers. In fact, there are no published studies of which LAQ is aware which demonstrate that these forms of cancer are caused by exposure to milled chrysotile fiber at or below the TLVs in existence during the period of LAQ's sale of commercial

quantities of chrysotile asbestos. Furthermore, numerous studies have been published supporting the position that chrysotile asbestos can be used safely or with minimal risk.

4. Identify and produce all Document and Objects evidencing, referring, or relating in any way to Communications between and among your officers, agents, and employees and concerning actual and/or potential asbestos-related health hazards.

See documents produced by LAQ in response to this discovery request. See also documents produced in response to discovery request I2.

5. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to Communications between and among your officers, agents, and employees and concerning the need for and/or use of respirators, dust masks, etc., when working in the presence of dust (including asbestos dust).

See documents produced by LAQ in response to this discovery request. See also documents produced in response to discovery request I2.

6. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to governmental or industrial hygiene standards for exposure to asbestos fiber dust, including, without limitation: (a) threshold limit values (TLV's) and/or (b) permissible exposure limits (PEL's).

See documents produced by LAQ in response to this discovery request. See also documents produced in response to discovery requests C6 and I2.

7. State the year that you were advised and/or made aware of any governmental and/or industrial hygiene standards for exposure to asbestos fiber dust, including, without limitation: (a) threshold limit values (TLV's) and/or (b) permissible exposure limits (PEL's).

From 1958, when LAQ began commercial mining, milling and sales of chrysotile asbestos fiber, LAQ was aware that the ACGIH TLV for asbestos was five million particles per cubic foot. In 1968 there was a proposed change to the ACGIH TLV for asbestos to two million particles per cubic foot or its equivalent of 12 fibers per cc. LAQ was aware in 1972 that OSHA had adopted a permissible exposure level of 5 fibers per cubic centimeter. On July 1, 1976 the OSHA standard changed to 2 fibers per cubic centimeter. LAQ was aware of these standards.

8. Identify and describe each complaint you have ever received about: (a) Raw Asbestos or Asbestos-Containing Products milled, manufactured, and/or distributed by you and/or on your behalf; (b) health and/or safety hazards associated with asbestos dust and/or fibers; (c) dust conditions in any factory, plant, warehouse, and/or other facility, whether or not owned or operated by you, at which Raw Asbestos or Asbestos-Containing Products milled, manufactured, and/or distributed by your and/or on your behalf were present; (d) worker health and/or safety in any factory, plant, warehouse, and/or other facility, whether or not owned or

operated by you, at which Raw Asbestos or Asbestos-Containing Products milled, manufactured, and/or distributed by you and/or on your behalf were present.

In 1975, there were strikes at all the asbestos mining operations in the Thetford region of Quebec, including LAQ. One of the issues of the strike was the Unions' claim that some of the mines had not reduced airborne asbestos dust concentrations to a level below the then newly-proposed limit of two fibers per cubic centimeter.

LAQ has endeavored, since its inception, to have a complaint free relationship with its customers. However, LAQ did receive two complaints from the Ragland facility. The first complaint came in 1967 regarding a shipment of fiber that had shifted during transport. The second complaint came in 1972 regarding rocks found in some fiber shipped at that time.

9. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to complaints you have ever received about: (a) Raw Asbestos or Asbestos-Containing Products milled, manufactured, and/or distributed by you and/or on your behalf; (b) health and/or safety hazards associated with asbestos dust and/or fibers; (c) dust conditions in any factory, plant, warehouse, and/or other facility, whether or not owned or operated by you, at which Raw Asbestos or Asbestos-Containing Products milled, manufactured, and/or distributed by you and/or on your behalf were present; (d) worker health and/or safety in any factory, plant, warehouse, and/or other facility, whether or not owned or operated by you, at which Raw Asbestos or Asbestos-Containing Products milled, manufactured, and/or distributed by you and/or on your behalf were present.

See documents produced by LAQ relating to complaints received by LAQ from the Capco Ragland plant.

10. Identify and describe each study, if any, which you commissioned and/or sponsored and which concerned the effects of inhalation of asbestos dust and/or fibers by one using, removing, and/or being exposed to Raw Asbestos milled and/or distributed by you and/or on your behalf, including, without limitation: (a) the date of the study; (b) the person or persons who conducted the study; (c) the purpose or purposes of the study; and (d) the results of the study.

This defendant has not performed independent studies concerning the effect of inhalation of asbestos on the physical condition of persons whose employment exposed them to asbestos or asbestos products. However, it should be noted that LAQ has participated in the funding of numerous studies performed by other entities relating to these issues. The Quebec Asbestos Mining association, which LAQ joined in 1959, has funded a number of studies in regard to the health aspects of asbestos, some number of which preceded the membership of LAQ in the Quebec Asbestos Mining Association and, in some cases, preceded the existence of LAQ. The Asbestos Textile Institute ("ATI"), of

which LAQ was an associate member between 1959 and 1981, has funded a number of studies designed to achieve reductions of asbestos dust and fibers in the workplace via the implementation of sound industrial hygiene practices and the use of vacuums, filters and other machinery and equipment designed to minimize or eliminate dust. Many of these studies preceded the membership of LAQ in the ATI and in some cases preceded the existence of LAQ. As LAQ was only an associate member of ATI, it held no officer position in ATI management and was precluded from voting on policy making decisions, including such matters as what studies to sponsor and at what funding levels.

The members of the Quebec Asbestos Mining Association (QAMA) established the Institute of Occupational and Environmental Health (IOEH) in 1966 in Montreal, Quebec, Canada. The objective of the IOEH was to better assess the biological effect of asbestos on the health of asbestos workers and the general population. For this purpose, the IOEH established a scientific committee.

Dr. Wright, of St. Luke's Hospital in Cleveland, Ohio, was the chairman of the Scientific Committee, which was responsible for evaluating grant requests and recommending funding for research projects. In addition, to Dr. Wright the following individuals served on the Scientific Committee at various times: Dr. Fernand Gregoire, Dr. Paul Kotin, Dr. John Beattie, Dr. Daniel Braun, Dr. Premysl Pelnar, Dr. Ian Higgins and Dr. Marvin Kushner.

Scientists submitted grant requests to the Scientific Committee for evaluation according to subject matter, proposed methodology and feasibility. Based on these considerations, the Scientific Committee would make recommendations to the Executive Committee of the IOEH regarding projects to fund. See meeting minutes produced in response to discovery request C6 for further information.

The IOEH has supported numerous research projects on asbestos-related health issues from which many scientific publications have originated. In December of 1977, the Institute published a booklet entitled The Research Projects Supported by IOEH and the Scientific Publications Originating from Them 1966-1976. The booklet presents a comprehensive survey of research projects, the names of researchers, a description of each project, the names of contributing firms, the amount of money spent per project, and the publications generated as a result of the research. Defendant LAQ will produce this booklet.

Dr. Pelnar, Scientific Secretary of the IOEH, administered the daily operations of the Scientific Committee. His primary function was to act as a liaison between the members of the IOEH Scientific Committee, the asbestos industry and the doctors who conducted the independent medical research. He served on the Scientific Committee from 1966 until he retired in 1984. In addition, Dr. Pelnar developed and administered a library of literature on asbestos and health. The extensive collection included newspaper articles, published and unpublished medical treatises, and trade magazines. This literature was available to government officials, researchers, practicing doctors and industry officials.

Initially, IOEH sent full text versions of documents upon request. Later, Dr. Pelnar provided abstracts of articles with the full text sent upon further request. For articles in foreign languages, Dr. Pelnar provided his own translated abstract along with a copy of the original article. In addition to his scientific qualifications, Dr. Pelnar's fluency in six or seven languages made him well suited for the position of IOEH Scientific Secretary. More than two hundred recipients in several countries obtained literature from this library.

Although LAQ, through the IOEH, supported scientific research to better assess the biological effects of asbestos, LAQ has been aware since it began commercial production of chrysotile asbestos that knowledge of the potential dangers of asbestos was common among governmental and private industrial hygienists, occupational physicians and the large sophisticated manufacturing concerns to which LAQ began selling chrysotile fiber in 1958. In addition, medical and scientific literature on the potential dangers of asbestos had been published in a wide variety of medical and scientific periodicals, textbooks, and other publications which were readily available to any interested entity or individual. Furthermore, since it began commercial operation LAQ was aware that there were well understood and widely available methods of industrial hygiene which could ensure that the use of LAQ's chrysotile asbestos would not pose a hazard to human health.

11. Identify and produce All Documents and Objects evidencing, referring, or relating in any way to studies, if any, which you commissioned and/or sponsored and which concerned the effects of inhalation of asbestos dust and/or fibers by one using, removing, and/or being exposed to Raw Asbestos milled and/or distributed by you and/or on your behalf.

See documents produced by LAQ in response to this request. See also documents produced in response to discovery request I2.

12. Identify and describe each subscription to any medical and/or scientific periodical which you now receive or have in the past received, including, without limitation, the period or periods during which you received the periodical.

LAQ has never established or maintained any medical library. At various times, some LAQ employees have had or maintained certain items or materials with regard to medical and scientific literature. There was, and is, no clearing house for this information, nor were subscriptions recorded. LAQ is unable to provide more specific information.

LAQ was a founding member of the Institute of Occupational and Environmental Health (IOEH) in 1966. One of the functions of the IOEH was to develop a library of literature on asbestos and health and to make such literature available to anyone interested, including government officials, researchers, practicing doctors, and industry officials. Similarly, in 1981, LAQ became a member of the Asbestos Information Association, which maintained a library on asbestos and health in Washington, DC and provided information and copies of literature to anyone requesting them.

13. Identify and describe each medical and/or scientific book which you now possess or have in the past possessed, including, without limitation, the period or periods during which you possessed the book

Please see response to discovery request J12.

14. When did you first learn about: (a) the report by W.D. Dressen, *et al.*, entitled *A Study of Asbestos in the Asbestos Textile Industry*, PUBLIC HEALTH BULLETIN NO. 241, Washington, D.C., U.S. Public Health Service, 1938 (the "Dressen Report"); and (b) studies by Drs. Fleisher and Drinker concerning the potential hazards from the use of Asbestos-Containing Products in naval shipyards?

LAQ is not in possession of any information as to when any officer or employee of LAQ learned of these studies. LAQ was not incorporated until September of 1952 and did not commence commercial operations until July of 1958. Although LAQ is not aware of any documents which address this issue, as the Dressen Report was published in 1938 and the Fleisher Drinker study was published in 1946, LAQ may have been aware of the studies' existence at the time it commenced commercial operations.

15. Identify and describe any decision you made in reliance on the literature, reports, and studies identified in the preceding three discovery requests.

Please see response to discovery request J7. In the mid 1950's, LAQ designed and constructed its mill at Black Lake to incorporate the latest industrial hygiene equipment and technology. LAQ was aware that the ACGIH TLV for asbestos was 5 mppcf and designed its mill to achieve at least that level of dust control. LAQ understands that the ACGIH based its TLV, at least in significant part, on the 1938 Dressen study. Furthermore, since the beginning of its commercial operation LAQ was aware that there were well understood and widely available methods of industrial hygiene which could ensure that the use of LAQ's chrysotile asbestos would not pose a hazard to human health.

16. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to the literature, reports and studies identified in the preceding four discovery requests.

See documents produced by LAQ in response to this discovery request.

17. Identify each of your employees who attended the following conferences and/or symposiums at which the hazards of exposure to asbestos was discussed: (a) the 1947 Saranac Symposium; (b) the 1952 Saranac Symposium; (c) the 1955 Saranac Symposium; and (d) the 1964 New York Academy of Sciences conference.

No LAQ employees attended the 1947 Saranac Symposium, the 1952 Saranac Symposium, the 1955 Saranac Symposium or the 1964 New York Academy of Sciences conference.

18. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to: (a) the 1947 Saranac Symposium; (b) the 1952 Saranac Symposium; (c) the 1955 Saranac Symposium; and (d) the 1964 New York Academy of Sciences conference.

See documents produced by LAQ in response to this discovery request. See also documents produced in response to discovery requests J4 and I2.

19. When and how did you first learn about: (a) the 1947 Saranac Symposium; (b) the 1952 Saranac Symposium; (c) the 1955 Saranac Symposium; and (d) the 1964 New York Academy of Sciences conference?

LAQ has no knowledge of when, if ever, except through litigation, it learned of the 1947, 1952 or 1955 Saranac Symposia. LAQ first learned of the 1964 New York Academy of Sciences conference in the fall of 1964.

20. Identify and describe each federal, state, and/or local governmental agency complaint you have received and/or investigation you have undergone related to asbestos and/or asbestos exposure, including, without limitation: (a) the dates of each such investigation and (b) the results of each such investigation.

LAQ has received the following complaints from governmental agencies:

To its knowledge, with the exception of the above, LAQ has never been the subject of a governmental complaint or related investigation.

21. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to each complaint and/or investigation identified in response to the preceding discovery request.

See documents provided by LAQ in response to this discovery request.

K. Warnings and Instructions About the Hazards of Asbestos

1. Admit or deny that Raw Asbestos milled and/or distributed by you and/or on your behalf displayed and/or contained no warning about the hazards of asbestos.

Denied.

2. Identify and describe each warning, cautionary statement, and/or instruction affixed to, and/or provided by you, with regard to Raw Asbestos milled and/or distributed by you and/or on your behalf, including, without limitation: (a) the exact text of the warning, statement, and/or instruction (including each modification); (b) the size of the warning, statement, and/or instruction; (c) the color of the warning, statement, and/or instruction; (d) the location of the warning, statement, and/or instruction on the product and/or container, and/or other manner of distribution; (e) the size and type of each font used; (f) the date on which each such warning, statement, and/or instruction was used; (g) the date on which each such warning, statement and/or instruction was discontinued; (h) the identify of each person who made and/or participated in the decision to use and/or to discontinue each such warning, statement, and/or instruction; (i) the identity of each person who participated in the drafting of each such warning, statement, and/or instruction; (j) graphic images accompanying the warning, statement, and/or instruction; (k) the Raw Asbestos and/or Asbestos-Containing Products in connection with which the warning, statement, and/or instruction was furnished; (l) the person or persons to whom the warning, statement, or instruction was directed; and (m) the efforts, if any, which you made to determine the effectiveness of the warning, statement, and/or instruction.

LAQ placed warnings concerning the potential health hazards of asbestos on its bags of raw asbestos fiber from March of 1970 until it ceased asbestos mining operations in

June of 1986. Moreover, beginning in 1972, LAQ provided information on the proper handling of its asbestos on Material Safety Data Sheets which were required by OSHA. The data sheets also included information relating to the disposal of asbestos, the proper clean up of asbestos, and other related issues. In 1978 LAQ also began distributing to its customers pamphlets regarding the potential health hazards of asbestos.

The warning labels initiated in March 1970 stated:

CAUTION

**THIS BAG CONTAINS CHRYSOTILE ASBESTOS FIBER
PERSONS EXPOSED TO THIS MATERIAL SHOULD
USE ADEQUATE PROTECTIVE DEVICES AS INHALATION
OF THIS MATERIAL OVER LONG PERIODS
MAY BE HARMFUL**

As these bags are no longer in existence, LAQ is unable to provide information regarding the location, size, color, etc., of the warning.

The warning was revised as of September 1972 to conform to OSHA requirements and stated:

CAUTION

**CONTAINS ASBESTOS FIBER
AVOID CREATING DUST
BREATHING ASBESTOS DUST MAY CAUSE
SERIOUS BODILY HARM**

This warning was located in two places on LAQ's bags of asbestos fiber. The warning was printed in the middle of the front of the bag, in blue letters contained in a rectangular 5 x 2 1/4 inch box beneath the words "ASBESTOS" and "AMIANTE". The same warning in the same format was located on the bottom of the bag, next to the grade of asbestos, so as to be visible when the bags were stacked.

The warning was further revised as of June 1, 1977, to state:

**DANGER
CONTAINS ASBESTOS FIBERS
AVOID CREATING DUST
ASBESTOSIS, LUNG CANCER AND OTHER FATAL
DISEASES MAY BE CAUSED BY INHALATION OF
ASBESTOS
SMOKING GREATLY INCREASES LUNG CANCER RISK**

This warning was located in 4 different places on LAQ's bags of asbestos fiber. The warning was printed in red letters, in the middle of the bag beneath the words "ASBESTOS" and "AMIANTE". The warning was also printed in a 6 x 3 inch rectangular box in red letters on both sides of the bag. Also, the warning was printed in a 6 x 3 inch rectangular box on the bottom of the bag, next to the grade of asbestos, so as to be visible when the bags were stacked.

Also, beginning June 1, 1977 the following handling instructions were placed on LAQ's bags of raw asbestos fiber:

HANDLING INSTRUCTIONS:

**DO NOT SMOKE. ALWAYS OPERATE AND MAINTAIN
VENTILATION AND OTHER CONTROL EQUIPMENT.
WEAR APPROVED RESPIRATORS AS INSTRUCTED.
VACUUM LOOSE FIBRE OR WET BEFORE CLEAN UP.
DISCARD WASTE FIBRE IN SEALED BAGS.
USE VACUUM EQUIPMENT TO REMOVE DUST FROM CLOTHES.
REPAIR DAMAGED BAGS IMMEDIATELY.**

These instructions were located on both sides of LAQ's bags of asbestos fiber, printed vertically in a 1 ft. x 2 ½ in. rectangular box next to the warning labels.

The following are excerpts from LAQ Material Safety Data Sheets regarding the use of chrysotile fiber:

Moreover, beginning in 1972, LAQ provided information on the proper handling of its asbestos on Material Safety Data Sheets which were required by OSHA. The data sheets also included information relating to the disposal of asbestos, the proper clean up of asbestos, and other related issues. The following are excerpts from LAQ data sheets regarding the use of fiber:

"8 hour time weighted average 5 fibers/ml greater than 5 microns in length - concentrations above 5 fibers/ml not to exceed 10 fibers/ml at any time." "5 fibres per cc over 5 microns long on a 8Hr. time weighted average." "Potential Carcinogen. Governmental regulations has set 2.0 fibres per cc over 5 microns long on an 8 hour time weighted average." "Sufficient to keep dust count below 2.0 fibres per cc over 5 microns on an 8 hour time weighted average." "2.0 fibres per cc over 5 microns long on a 8Hr. time weighted average." "2 fibres longer than 5 microns per cubic centimeter." "Control with mechanical dust collection equip. to within TLV."

"Place waste in closed containers. Dispose of waste in closed containers. Avoid breathing excessive dust." "Discard waste fibre in sealed, properly labeled bags; dispose of in accordance with applicable EPA regulations." "Care should be taken to avoid asbestos dust to become airborne. Remove spillage and clean storage area by aspiration. Do not smoke. Always operate and maintain ventilation and other equipment. Wear approved

respirators as instructed. Vacuum loose fibre or wet before clean up. Discard waste fibre in sealed bags. Use vacuum equipment to remove dust from clothes. Repair damaged bags immediately." "Spillage should be cleaned up by aspiration, avoid sweeping or other methods causing asbestos to become airborne." "Use plastic bag for transportation. Dispose of waste in earth filled dump." "Maintain good housekeeping practices. Vacuum clean waste and place in closed containers. See caution label on bag." "Wet properly and place in a dustproof container or use a vacuum for aspiration. Bury under earth." "Avoid creating dust - use vacuum to remove spills."

"A clean-up procedure (i.e. vacuuming or wetting) which minimizes exposure is required. Place all material in closed containers with approved labels. If the possibility of dust exposure exists, wear NIOSH/MSHA approved respiratory protection." "Dispose of material in accordance with all Federal, state and local air pollution, water pollution and solid waste regulations. Recommend disposal in an EPA approved hazardous waste landfill." "Local exhaust ventilation, material wetting and/or respiratory protection is required for all sawing, grinding, cutting, bulk handling, spraying, demolition, removal or other activities where dust exposure may occur." "Avoid inhalation or ingestion of dust. Do not smoke. Practice good housekeeping and personal hygiene procedures. Avoid asbestos dust becoming airborne and remove spillage by vacuuming loose fiber or wetting before clean-up. Do not dry sweep. Repair damaged bags immediately. Place all material in closed containers properly labeled."

"Non Flammable." "Vacuum clean spillage - repair broken bags - if sweeping is necessary, wet down spillage - use approved respiratory equipment when required." "Wear approved respirators as instructed. Vacuum loose fibre or wet before clean up. Do not sweep or cause asbestos to become airborne. Repair damaged bags immediately." "Use respirators approved by NIOSH." "Wear NIOSH/MSHA approved self-contained breathing apparatus and protective clothing." "Use approved respirator when working in dusty condition." Use "NIOSH/MSHA [respiratory protection] approved for toxic dusts or asbestos." "Protective clothing is required if exposures exceed the OSHA ceiling limit or significant contact occurs. Remove all work clothing before leaving plant premises."

"Prolonged continuous exposure to asbestos dust may cause impairment to the respiratory system." "Long term exposure to high concentrations of asbestos fiber may cause pulmonary disease." "Asbestosis, lung cancer and other fatal diseases may be caused by inhalation of asbestos. Smoking greatly increases lung cancer risk." "Danger - Contains asbestos fibres - Avoid creating dust - Asbestosis, lung cancer and other fatal diseases may be caused by inhalation of asbestos. Smoking greatly increases lung cancer risk." "Care should be taken to avoid asbestos dust becoming airborne, remove spillage and clean storage area by aspiration." "Avoid breathing excessive dust when handling, dumping and mixing. See caution label on bag." "Inhalation of excessive asbestos dust can have detrimental effects on health." "Lung cancer." "Chronic inhalation of asbestos may cause symptoms of variable cough, dyspnea, chest pains, weakness and decreased chest expansion. Later findings may include asbestosis - a diffuse but non-uniform fibrosis of the lungs; and respiratory cancer."

The following are additional warnings and precautions derived from undated safety data sheets:

"Protective clothing is required if exposure exceeds the OSHA ceiling limit or significant contact occurs, remove all clothing before leaving the plant." "Chronic inhalation of asbestos may cause symptoms of variable cough, dyspnea, chest pains, and decreased chest expansions; later findings may include asbestosis, a diffuse but non-uniform fibrosis of the lungs, and respiratory cancer." "Local exhaust ventilation, material wetting, and or respiratory protection is required for all sawing, grinding, cutting, bulk handling, spraying, demolition, removal or other activities where dust exposure may occur." "Spillage should be cleaned up by aspiration, avoid sweeping or other methods causing asbestos to become airborne." "Avoid inhalation or ingestion of dust." "Practice good housekeeping and personal hygiene." "Always operate and maintain ventilation and other equipment."

The following cautionary statement was included in the pamphlets regarding the potential health hazards of asbestos which LAQ distributed to its customers in 1978:

Health Hazards

Exposure to asbestos dust in the workplace over a period of years can increase the risk of developing certain diseases. The experts are not all in agreement on the level below which there is no risk. Available medical evidence indicates that your chances of contracting asbestos-related disease are minimized as asbestos concentrations in the workplace are reduced to approved levels. Several studies accept and recommend 5 fibers per cubic centimeter while others prefer 2 fibers per cc and reduction to 0.5 fibers has been proposed. Current OSHA regulations are 2 fibers per cc.

In order to provide you with notice and warning of asbestos health hazards, Lake Asbestos places a label on each bag of asbestos fiber which it sells. The label reads as follows:

**DANGER
CONTAINS ASBESTOS FIBERS
AVOID CREATING DUST
ASBESTOSIS, LUNG CANCER AND OTHER FATAL
DISEASES MAY BE CAUSED BY INHALATION OF
ASBESTOS
SMOKING GREATLY INCREASES LUNG CANCER RISK**

There are four diseases associated with asbestos dust exposure. First is asbestosis which damages the lungs and may permanently impair breathing. In certain severe

cases, it may be fatal. This disease appears in those who have been exposed to excessive concentrations of asbestos dust over a period of years.

Lung and gastrointestinal cancer (stomach, colon and rectum) have been shown to be associated with many years of exposure to excess concentrations of asbestos dust and can be fatal. However, studies carried out on workers in the asbestos industry in England and Canada have shown that as total exposure to airborne asbestos fiber was reduced, there was a corresponding reduction in the excess mortality observed.

The fourth disease is mesothelioma, a rare and incurable form of cancer of the lining of the chest or abdominal cavity. It may occur from elevated concentrations of asbestos and has been observed in individuals exposed to low and to no known concentration of asbestos fiber.

Smoking

Here is where you can greatly reduce your chances of developing lung cancer. It has been established that cigarette smoking GREATLY increases the risk of developing lung cancer in asbestos workers. Further, the lung cancer risk for the asbestos worker in a well controlled environment who has never smoked appears to be no greater than the average person who does not smoke.

It is essential that asbestos workers who smoke, during work hours or at other times, take immediate action to STOP SMOKING. Asbestos workers who do not smoke should not start.

Also, if you or your family has a history of lung problems, you may be susceptible to asbestos health hazards. As a result, the regular lung examinations provided by your company are especially important. Be sure to take advantage of this service.

The following LAQ employees took part in the decisions on the placement and wording of the warnings on bags of LAQ asbestos fiber: Michael J. Messel, former President; Roland P. Gagnon, former Senior Vice-President; Gaston Verreault, former Vice-President, Operations; Lionel C. Piuze, former Vice-President, Operations; and, Edward Farrell, former Sales Manager.

3. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to any warning, cautionary statement, and/or instruction affixed to, and/or provided by you, with regard to Raw Asbestos milled and/or distributed by you and/or on your behalf.

See documents produced by LAQ in response to this discovery request. See also documents produced in response to discovery requests J4 and J6.

4. Identify and describe each warning, cautionary statement, and/or instruction which you considered issuing but did not issue, with regard to Raw Asbestos milled and/or distributed by you and/or on your behalf, including, without limitation: (a) the exact text of the warning, statements, and/or instruction (including each modification); (b) the size of the warning, statement, and/or instruction; (c) the color of the warning, statement, and/or instruction; (d) the suggested location of the warning, statement, and/or instruction on the product or container, and/or other manner of distribution; (e) the size and type of each font used; (f) the date on which each such warning, statement, and/or instruction was considered; (g) the identity of each person who made and/or participated in the decision not to use the warning, statement, and/or instruction; (h) the identity of each person who participated in the drafting of each such warning, statement, and/or instruction; (i) graphic images accompanying the warning, statement, and/or instruction; (j) the Raw Asbestos and/or Asbestos-Containing Products in connection with which the warning, statement, and/or instruction was considered; (k) the person or persons to whom the warning, statement, or instruction would have been directed; and (l) your reasons for not issuing the warning, statement, and/or instruction.

LAQ never considered issuing any other warning, cautionary statement, and/or instruction regarding its raw asbestos.

5. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to any warning, cautionary statement, and/or instruction which you considered issuing, but did not issue, with regard to Raw Asbestos milled and/or distributed by you and/or on your behalf.

Not applicable. See response to discovery request K4.

6. For any period during which you did not disseminate any warning, cautionary statement, and/or instruction in connection with Raw Asbestos milled and/or distributed by you and/or on your behalf, state the reason that you did not disseminate any warning, statement, and/or instruction.

LAQ sold chrysotile asbestos fiber only to sophisticated manufacturing concerns. Based on the size and level of sophistication of the manufacturing concerns in the asbestos industry generally, and of LAQ's customers specifically, and upon their legal and statutory duties as employers to provide a safe work place, LAQ believed that its customers were taking all appropriate and necessary steps to protect and safeguard their employees from the possibility of developing asbestos related disease, much as LAQ protected its own

employees. Furthermore, LAQ has relied on the fact that the entities to which LAQ sold its fiber were equally if not more knowledgeable than it in these areas and that such manufacturing entities would not only take measures to safeguard their own employees, but would also act to protect their customers by informing them of any possible risks or harm from the use and handling of asbestos products. Most industrial hygiene and safety experts agree that the prime responsibility for worker protection rests not with outside suppliers whose ability to effectively communicate with workers is limited, but with the employer who understands the nature of the workplace and the potential hazards inherent in working there. The employer is also the only one with easy and continuous access to its employees and thus the ability to instruct employees on potential workplace hazards and to install and/or provide the necessary protective equipment.

7. Admit or deny that you made no effort to instruct CAPCO employees about the dangers of exposure to asbestos.

Denied.

8. Admit or deny that you made no effort to instruct any of the Plaintiffs about the dangers of exposure to asbestos.

Denied.

9. Admit or deny that you made no effort to direct the attention of CAPCO employees to any warning, cautionary statement, and/or instruction you disseminated in connection with Raw Asbestos milled and/or distributed by you and/or on your behalf.

Denied.

10. Admit or deny that you made no effort to direct the attention of any of the Plaintiffs to any warning, cautionary statement, and/or instruction you disseminated in connection with Raw Asbestos milled and/or distributed by you and/or on your behalf.

Denied.

L. Defendant's Misconduct

1. Separately admit or deny, for each of the following time periods, that you failed to exercise reasonable care to protect the Plaintiffs from unreasonable risks of harm from exposure to asbestos: (a) 1952-1960; (b) 1960-1970; (c) 1970-1980; (d) 1980-1990; and/or (e) 1990-1997.

- (a) **denied;**
- (b) **denied;**
- (c) **denied;**
- (d) **denied;**
- (e) **denied.**

2. Separately admit or deny, for each of the following time periods, that you failed to warn and/or to protect Plaintiffs from the hazards created by exposure to the Raw Asbestos and the Asbestos-Containing Products milled, manufactured, and/or distributed by you and/or on your behalf: (a) 1952-1960; (b) 1960-1970; (c) 1970-1980; (d) 1980-1990; and/or (e) 1990-1997.

LAQ denies that Plaintiffs were subjected to hazards from exposure to its chrysotile asbestos at the levels of exposure which LAQ believes existed in the Ragland plant. More particularly, LAQ responds to each of this discovery request's subparts as follows:

- (a) denied;
- (b) denied;
- (c) denied;
- (d) denied;
- (e) denied.

3. Admit or deny that you misrepresented and/or concealed from the following persons your knowledge that exposure to asbestos fibers and/or dust was unreasonably dangerous to human health and safety: (a) your customers; (b) your customers' employees, including Plaintiffs; (c) your customers' invitees, including contractors who came upon your customers' premises from time to time; and (d) government and medical authorities.

LAQ denies that exposure to its chrysotile asbestos fiber under properly controlled conditions is unreasonably dangerous to human health and safety. More particularly, LAQ responds to each of this discovery request's subparts as follows:

- (a) denied;
- (b) denied;
- (c) denied;
- (d) denied.

4. Admit or deny that you failed to disclose to the following persons your knowledge that exposure to asbestos fibers and/or dust was unreasonably dangerous to human health and safety: (a) your customers; (b) your customers' employees, including Plaintiffs; (c) your customers' invitees, including contractors who came upon your customers' premises from time to time; and (d) government and medical authorities.

LAQ denies that exposure to its chrysotile asbestos fiber under properly controlled conditions is unreasonably dangerous to human health and safety. More particularly, LAQ responds to each of this discovery request's subparts as follows:

- (a) denied;
- (b) denied;
- (c) denied;
- (d) denied.

5. Admit or deny that before the Complaint was filed, you destroyed and/or altered evidence supporting allegations made by the Plaintiffs in the Complaint.

Denied.

6. Admit or deny that after the Complaint was filed, you destroyed and/or altered evidence supporting allegations made by Plaintiffs in the Complaint.

Denied.

M. Defendant's Remedial Efforts

1. Identify and describe the measures you took, if any, once you became aware of the hazards of exposure to asbestos, to protect the ultimate users of the Raw Asbestos and /or the Asbestos-Containing Products milled, manufactured, and /or distributed by you and /or on your behalf, including, without limitation, efforts to: (a) warn and/or instruct the ultimate users of the Raw Asbestos and/or the Asbestos-Containing Products milled, manufactured, and/or distributed by you and/or on your behalf; (b) modify the Raw Asbestos milled, manufactured and/or distributed by you and /or on your behalf; and (c) remove the Raw Asbestos and/or the Asbestos-Containing Products milled, manufactured, and/or distributed by you and/or on your behalf from the market.

As LAQ never designed, manufactured, sold or distributed asbestos-containing products, this question is inapplicable as it relates to such products. In addition, see LAQ's responses to discovery requests, E7-9 and K2-4, 6.

2. Have you removed and/or retrieved any Raw Asbestos milled and/or distributed by you and/or on your behalf from buildings, plants, and other facilities?

Not applicable. It is impossible to remove raw asbestos from buildings, plants or other facilities once it has been incorporated into asbestos-containing finished products. LAQ's sophisticated manufacturing customers incorporated LAQ's chrysotile asbestos into a broad variety of such finished products at or shortly after the time of receipt of the fiber from LAQ. LAQ's customers purchased LAQ's chrysotile asbestos with the specific intent of incorporating it into such finished products designed and manufactured by them for sale to third parties. LAQ had no knowledge of the identity of those third parties.

3. Have you attempted to remove and/or retrieve any Raw Asbestos milled and/or distributed by you and/or on your behalf from buildings, plants, and other facilities?

Not applicable. See LAQ's response to discovery request M2.

4. Have you offered to remove and/or retrieve any Raw Asbestos milled and/or distributed by you and/or on your behalf from building, plants, and other facilities?

Not applicable. See LAQ's response to discovery request M2.

N. Defenses

1. Identify each defense which you have asserted, or intend to assert, in this lawsuit, and describe each fact supporting each such defense.

LAQ responds to this discovery request to the best of its ability based on knowledge and information available to it at this time. As discovery is ongoing, LAQ reserves the right to supplement this answer with facts and information which becomes available as discovery progresses.

LAQ does not now and never has manufactured any asbestos-containing products; LAQ mined, milled and sold raw asbestos fiber only.

A. **Statute of Limitations:** Twenty of the 61 plaintiffs are barred by the applicable statute of limitations. Plaintiffs filed their Complaint on January 31, 1996. The asbestos exposures of twenty of the plaintiffs were limited to time periods before May 1979. Under Alabama law, claims alleging asbestos exposure occurring on or before May 19, 1979 are subject to a statute of limitations which bars claims unless an action was filed within one year after the date of the plaintiff's last exposure to asbestos. No "discovery" exception exists. None of the twenty plaintiffs filed a complaint within one year of his last date of exposure to asbestos; therefore claims of all twenty plaintiffs are untimely. Discovery relating to plaintiffs' treating physicians and hospitals as well as any other medical personnel that dealt with plaintiffs is not yet concluded, and thus LAQ reserves the right to supplement its answer to this interrogatory subpart after the close of discovery.

B. **No Product Defect:** Plaintiffs have failed to show that LAQ asbestos fiber is unreasonably dangerous when used in its usual and customary matter. In support of this defense, LAQ will rely upon the testimony of plaintiffs and various fact witnesses who have yet to be deposed. LAQ will also rely upon expert testimony with regard to the hazards posed by the ordinary use of its raw asbestos. Further, through warning and instruction labels on bags of raw asbestos it shipped to the Ragland plant, LAQ provided adequate and reasonable warnings as prescribed by Alabama's Extended Manufacturer's Liability Doctrine. As LAQ's raw asbestos was accompanied by proper directions and warnings, it was not defective as a matter of law. LAQ reserves the right to supplement its answer to this interrogatory subpart after the close of discovery.

C. **No Asbestos Related Disease:** See reports of Drs. Goldstein, Miller and Gibbs, previously provided in discovery.

D. **Lack of Causal Relationship:** Plaintiffs have not shown a causal relationship between the activities of LAQ and the alleged injuries and damages claimed in the

Complaint. To the extent that plaintiffs suffer any health problems, they were proximately caused by: crocidolite asbestos fiber mined, milled and sold by entities other than LAQ; exposure to asbestos or asbestos-containing products mined, milled, manufactured and sold by entities other than LAQ; plaintiffs' use of tobacco products; and/or other pre-existing conditions or deleterious exposures. Similarly, to the extent many of the plaintiffs failed to pay attention to warning labels on products such as cigarettes or failed to change their behavior based on such warnings, then it is clear that nothing LAQ did or did not do vis-a-vis warnings on its asbestos could have caused plaintiffs' alleged injuries.

E. Contributory Negligence: This defendant, through warning labels on bags of raw asbestos it shipped to the Ragland plant, provided adequate and reasonable warning, as prescribed in the Alabama Extended Manufacturer's Liability Doctrine. In addition, Capco Ragland employees acquired knowledge of potential asbestos hazards from Capco training programs from their doctors, from their union, and/or from other sources. Plaintiffs and plaintiffs' decedents ignored this knowledge and/or these warnings and did not wear respirators and other safety equipment that was available to all employees. Plaintiffs thereby failed to use reasonable care in working with asbestos. Plaintiffs also were contributorily negligent in continuing to smoke cigarettes or use other tobacco products despite knowledge and/or warnings relating to the health hazards of smoking.

F. Assumption of Risk: LAQ first placed warnings on bags of its chrysotile asbestos fiber in March 1970. From that date on, LAQ placed the same warnings, both in size and content, on bags of each of the various grades of chrysotile asbestos it sold. Plaintiffs, and plaintiffs' decedents, who came into contact with the bags of asbestos fiber were therefore warned of the possible hazards associated with raw asbestos fiber. Plaintiffs and plaintiffs' decedents also acquired knowledge of potential asbestos health hazards from numerous sources other than warning labels on bags of asbestos fiber. Plaintiffs' claims are barred by the doctrine of assumption of risk because, to the extent that any dangers existed, plaintiffs were aware of them and assumed the risk of continued exposure to asbestos at the Ragland facility.

G. Sophisticated Purchaser: Based on the size and level of sophistication of LAQ's customers generally, and of Capco specifically, and upon the legal and statutory duty of employers to provide a safe workplace, LAQ was reasonable in believing, and still believes, that Capco was taking all appropriate and necessary steps to protect and safeguard its workers from the possibility of developing any asbestos-related disease from LAQ chrysotile fiber.

H. Third Party: Plaintiffs' employers were sophisticated purchasers and users of asbestos having knowledge of the proper use thereof and the proper safety devices to be provided to and used by the plaintiffs. This defendant has neither control nor right of control of plaintiffs' employers.

I. Privity: No privity exists between this defendant and plaintiffs and/or plaintiffs' decedents and, therefore, this defendant has no liability.

J. Release: The following plaintiffs have executed releases which arose from the settlement of various Texas and Alabama state and federal court actions involving thousands of plaintiffs brought by plaintiffs' current counsel, Environmental Litigation Group, P.C.:

1. **Alverson, Clarence Ervin**
2. **Alverson, Roy Ervin**
3. **Bean, Robert Jerome**
4. **Bean, William Edward**
5. **Bishop, Ricky Allen**
6. **Bothwell, Larry**
7. **Bunt, Albert Nelson**
8. **Campbell, Durrell Wayne**
9. **Campbell, Steve**
10. **Carlisle, Elisha Columbus**
11. **Coleman, Timothy Wayne**
12. **Cook, Donald Hulston**
13. **Dafron, Jack E.**
14. **Daniels, Otis**
15. **Echols, Clarence Ervin**
16. **Echols, Dennis Lee**
17. **Edge, Norman Ronnie**
18. **Ford, Gene**
19. **Ford, Stanley**
20. **Gant, Jackie Barnard**
21. **Hartley, Pinkney Marshall**
22. **Haynes, Fay Howard**
23. **Henderson, Tony R.**
24. **Howard, Jimmy Earl**
25. **Kay, Samuel**
26. **Kendrick, Robert Wayne**
27. **Lane, Hugh Roger**
28. **Lehr, John William**
29. **Lehr, William Earl**
30. **Limbaugh, Floyd Wayne**
31. **Looney, James Edward**
32. **Looney, Willie Edward**
33. **McClendon, Edgar Dennis**
34. **McGuffie, Alford**
35. **McGuffie, Donald Lee**
36. **McGuffie, James Rickey**
37. **Merryman, Charles E.**
38. **Mostella, Jerry**
39. **O'Donnell, Herbert Curtis**

40. Phillips, Gene Hayward
41. Phillips, Lomer Ray
42. Phillips, Lonnie
43. Phillips, Sherman L.
44. Pinkston, Lonnie J.
45. Pope, Marvin
46. Pryor, James Edward
47. Ramsey, James
48. Reaves, Harrell Jean
49. Riggs, Farrell Wade
50. Smith, Richard Austin, Jr.
51. Smitherman, William Franklin
52. Southern, Johnny Lee
53. Swafford, Robert Broughton, Sr.
54. White, James Alton
55. Whitehead, Willie L.
56. Woods, Howard Lee
57. Woods, John Samuel

These plaintiffs have released ASARCO, including its "subsidiaries" such as LAQ, from "any and all claims ... for asbestos-related disease or death." In addition, the releases provide that "The undersigned [plaintiffs] expressly contract that no claim or cause of action against the Releasees for asbestos-related personal injury or death is reserved." (*Id* at p. 2)

Notwithstanding that unequivocal language, plaintiffs' counsel, J. William Lewis, noted in several letters that to the extent some of the plaintiffs had been employed at Capco, the releases were not intended to extinguish their asbestos claims as Capco co-employees. However, it is clear that plaintiffs did release all their asbestos claims other than as Capco co-employees.

The correspondence noted above exempted from the settlement only plaintiffs' claims as Capco co-employees, referring specifically and exclusively to preservation of Capco co-employee claims "against LAQ filed in [the prior Capco co-employee case] *Gray v. Beasley*, (CV-93-3405), Jefferson County Alabama," as well as "future co-employee cases," also termed "the *Gray* look-a-likes." The Complaints in *Gray*, like the Complaints in the present case, alleged claims for plaintiffs' asbestos exposure "while working within the line and scope of their employment at Capco."

Accordingly, only plaintiffs' claims of injury from asbestos exposure "while working within the line and scope of their employment at Capco" were preserved from the settlement. Plaintiffs released "any and all" other claims against LAQ for asbestos exposure other than while employed at Capco. Specifically, these plaintiffs have released those claims for exposure to LAQ asbestos which allegedly occurred outside of the scope of their employment with Capco and which are set forth in paragraph 3 of Count I,

paragraph 2 of Count III, paragraph 2 of Count VI and paragraph 2 of Count VIII of Plaintiffs' Fourth Amendment to Complaint.

LAQ reserves the right to supplement its answer to this interrogatory subpart after the close of discovery.

K. Pendency: Pending Civil Action 96-00239 in Circuit Court of Jefferson County, AL during commencement of this action is a defense pursuant to Section 6-5-440 of the Code of Alabama of 1975.

L. Workers Compensation: Defendant is entitled to an offset or credit for any amounts recovered or paid to the plaintiffs by way of Workers Compensation benefits or from any other source based upon the same personal injuries and damages.

M. Ingredient Supplier: Defendant is not liable to plaintiffs for any alleged exposure to finished Capco pipe, or any other asbestos-containing products. LAQ merely sold to Capco a non-defective raw material which Capco or other product manufacturers may have used as a component of other products. LAQ did not participate in Capco's decision to use asbestos in its products.

2. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to each defense which you have asserted, or intend to assert, in this lawsuit.

See documents produced by LAQ in response to these discovery requests generally.

3. Admit or deny that at a minimum, a NIOSH-approved cartridge respirator with HEPA filters would be required for some protection from respirable asbestos fibers.

Denied.

4. Admit or deny that even a NIOSH-approved cartridge respirator with HEPA filters would not offer complete protection from respirable asbestos fibers.

Denied.

5. Admit or deny that simple paper dust masks are inadequate for protection from respirable asbestos fibers.

Denied.

6. Separately admit or deny that simple paper dust masks are inadequate for protection from respirable asbestos fibers released while working with, installing, or removing any Raw Asbestos milled and/or distributed by your and/or on your behalf.

Denied.

7. Identify and describe any mask, respirator, and/or other breathing device, if any, which you contend would prevent and/or mitigate the inhalation of asbestos fiber dust and which you contend was available to Plaintiffs, including, without limitation: (a) the name and a detailed description of the respirator and/or other breathing device; (b) all sources of information on which you rely in asserting that the respirator and/or other breathing device would prevent the inhalation of asbestos fiber dust; (c) any tests conducted on the respirator and/or other breathing device; and (d) the date on which the respirator and/or other breathing device first became available.

Since LAQ began to sell asbestos fiber in commercial quantities in July 1958, LAQ understood that respirators could be effective to reduce dust exposure during situations of short duration, high intensity exposure. Further, LAQ sold its asbestos fiber only to large manufacturing concerns and relied on the fact that the entities to which LAQ sold its fiber were equally, if not more knowledgeable, in these areas and would take the appropriate housekeeping and industrial hygiene measures to safeguard their own employees.

LAQ has used a number of breathing devices designed to reduce the inhalation of asbestos dust and fibers for its own employees, and has relied on the fact that the entities to which LAQ sold its fiber also took similar measures to safeguard their employees. Several types of breathing devices available for use were: the MFA Dustfoe, the R2000 American Optical Respirator, the 3M 8500 and the 3M 8710.

According to co-defendant Saleem's answers to interrogatories, served August 8, 1997, Capco required respirators in circumstances where OSHA mandated that they be worn. In addition, masks were available to anyone who wanted to use them throughout the plant. Warning signs pertaining to the hazards of asbestos and the use of respirators hung in various work areas of the plant as a reminder to the employees.

In co-defendant, Lamar Sanders' answers to interrogatories, served August 8, 1997, Sanders asserted that, depending upon particular job tasks, Capco recommended and/or required employees to wear dust masks or respirators.

Plaintiff Clarence E. Alverson, during his deposition, stated that he and other workers in the fitting department at Capco used both paper and rubber masks. These masks were obtained from the supply room and the office.

Plaintiff Robert J. Bean, at his deposition, testified that he did not wear a dust mask or respirator, but other employees did wear the protective equipment. The paper disposable masks were white; the respirators were a "black plastic rubber" type with cartridges. As a purchasing agent, Bean was responsible for buying respirators and masks. He thought that the masks were purchased from Southern Safety Supply in Birmingham, Alabama.

Plaintiff Thomas E. Bean, in his deposition testimony, confirmed that during his employment at Capco, he wore two different protective breathing devices. First, he wore a

paper dust mask, which he obtained from the storeroom. Later when it became available, he wore a respirator with a filter. Bean wore a mask or respirator when he swept and when he worked on a coupling lathe. He said that he saw other employees also wearing masks and respirators.

Plaintiff Albert N. Bunt, at his deposition, testified that he used both the paper dust mask and, when it became available, the rubber mask with filters. The breathing equipment could be obtained from the store room.

Plaintiff Elisha C. Carlisle, at his deposition, stated that although he did not wear a mask or respirator when he worked, he did see other Capco employees wearing them.

Plaintiff Donald H. Cook's deposition testimony documents that he regularly wore a dust mask when he worked as a batch operator. He obtained the masks from the supply room.

Plaintiff Clarence Echols testified, at his deposition, that he used a mask when the working conditions got dusty. The supervisors would place a box of masks in the area for workers to use. Echols replaced used masks with new ones when the older masks got clogged. Echols saw other employees wearing masks as they worked.

Plaintiff Charles Hannah, during his deposition, admitted to wearing a dust mask when he swept, when he worked in the storage area moving bags of fiber from pallets to shelves, and when he dumped hot pieces of pipe. He obtained his masks from the main office. He saw other employees also using dust masks.

Plaintiff Fay H. Haynes, at his deposition, testified that he occasionally used a dust mask when he cleaned the silo. Haynes also stated that he saw other workers wearing dust masks.

Plaintiff Hugh R. Lane's deposition testimony documents that he occasionally wore a dust mask in his job as the finish line supervisor. Other employees also wore masks.

Plaintiff William E. Looney, in his deposition testimony, confirmed that supervisors told the employees that masks were available from the store room. Looney, and his co-workers, wore masks while unloading asbestos fiber and while working near the coupling lathe.

Plaintiff Lonnie L. Phillips' deposition testimony documents that he and other workers occasionally wore dust masks when they worked near the lathes and near the air or dust bags. Masks were obtained from the supply room.

Plaintiff Sherman L. Phillips, during his deposition, testified that he wore a white paper mask whenever he emptied out the dust collector. His supervisor or foreman would

get the masks for the workers. Phillips' last supervisor at Capco, Tammy Payne, told the workers to wear masks when they cleaned the dust collector.

Plaintiff Marvin C. Pope stated, at his deposition, that in addition to intermittently using masks himself, he saw other Capco employees and supervisors using them. The masks were available from the store room.

Plaintiff Harrell J. Reaves, at his deposition, stated that he used a dust mask when he worked as a grinder or when other workers were sandblasting near his work area. Masks were available from the supply house. Reaves added that he thought that most employees wore masks at one time or another.

Former Capco employee Roy G. Jackson stated in his deposition testimony that when he worked as a store room clerk, one of his duties was to issue dust masks and rubber respirators to employees who presented request forms for these items. Jackson testified that beginning in 1972 it was mandatory for the batch operator to wear either a dust mask or a rubber respirator. When Jackson worked as a purchasing agent from 1971 to 1976, he was responsible for ordering new dust masks and replacement cartridges for the respirators. Three to four cases of paper masks were delivered from Birmingham twice a week. Each case contained six boxes of 25 masks each.

8. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to any mask, respirator, and/or other breathing device, if any, which you contend would prevent and/or mitigate the inhalation of asbestos fiber dust and which you contend was available to Plaintiffs.

See documents produced by LAQ in response to these discovery requests generally.

O. Plaintiffs' Exposure

1. For each Plaintiff, admit or deny that the Plaintiff used Raw Asbestos milled and/or distributed by you and/or on your behalf.

LAQ is without knowledge or information sufficient to either admit or deny this request.

2. For each Plaintiff, admit or deny that the Plaintiff worked in the vicinity of Raw Asbestos milled and/or distributed by you and/or on your behalf.

LAQ is without knowledge or information sufficient to either admit or deny this request.

3. For each Plaintiff, admit or deny that the Plaintiff was exposed to Raw Asbestos milled and/or distributed by you and/or on your behalf.

LAQ is without knowledge or information sufficient to either admit or deny this request.

P. Witnesses and Exhibits

1. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to each person whom you expect to call as a fact witness at trial.

LAQ has not yet determined whom it intends to call as fact witnesses at trial. When such decision is made, LAQ will provide documents responsive to this request as required by the court's scheduling or other orders. LAQ reserves the right to supplement its response to this discovery request as new information is discovered.

2. Identify and describe each person whom you expect to call as an expert witness at trial, and state the following: (a) the person's current business and home addresses; (b) the person's occupation; (c) the person's employer, or, if the person is self employed, the name of the person's business; (d) each academic degree and award (by institution and date) received by the person; (e) all books, articles, and computer models authored and/or created by the person (by title, date, and publisher); (f) all judicial, legislative, and/or administrative proceedings in which the person has testified; (g) all professional and trade organizations and/or associations in which the person has been a member; (h) the date the person was retained by you for purposes of this litigation; (i) the terms by which the person will be compensated for testifying; (j) the subject matter about which the person is expected to testify; (k) the substance of the facts and opinions about which the person is expected to testify; and (l) a summary of the grounds and/or bases for each opinion which the person is expected offer and the facts and data underlying each such opinion.

LAQ will provide this information in keeping with Judge Woodall's scheduling order entered on May 14, 1997, or any subsequent orders which might be entered.

3. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to each person whom you expect to call as an expert witness at trial.

LAQ will provide this information in keeping with Judge Woodall's scheduling order entered on May 14, 1997, or any subsequent orders which might be entered.

4. Identify each person whom you have retained and/or specially employed as an expert in anticipation of this litigation and/or preparation for trial of this action and who is not expected to be called as a witness at trial, including, without limitation: (a) the person's current business and home addresses; (b) the person's occupation; (c) the person's employer, or, if the person is self employed, the name of the person's business; (d) each academic degree and award (by institution and date) received by the person; (e) all books, articles, and computer models authored and/or created by the person (by title, date, and publisher); (f) all judicial, legislative, and/or administrative proceedings in which the person has testified; (g) all professional and trade organizations and/or associations in which the person has been a member; (h) the date the person

was retained by you for purposes of this litigation; and (i) the terms by which the person will be compensated for this litigation.

LAQ understands that the court has ruled that this information need not be provided in discovery.

5. Identify and produce each exhibit you intend to offer at trial.

As discovery is ongoing, LAQ has not made any determinations as to what Exhibits may be offered at trial. LAQ will provide this information when it becomes available and as required by the court's scheduling or other orders.

6. Identify each witness and potential witness from whom you have obtained any written and/or recorded statement.

LAQ has not obtained any written or recorded statements in conjunction with this litigation with the exception of those received in formal discovery.

7. Produce a copy of each written and/or recorded statement you have obtained from any witness or potential witness in this case, together with all Documents and Objects evidencing, referring, or relating in any way thereto.

See LAQ's response to discovery request P6.

Q. Other Lawsuits and Claims Against Defendant

1. Identify and describe each lawsuit in which you have been a party and in which any other party has alleged one or more causes of action against you arising out of any personal injury or property damage caused by exposure to asbestos fibers and/or dust from Raw Asbestos or from any Asbestos-Containing Product milled, manufactured, and/or distributed by you and/or on your behalf, including, without limitation: (a) the caption and case number of the lawsuit; (b) the Court in which the lawsuit was initially filed; (c) each Court to which the lawsuit was ever transferred; (d) the parties to the lawsuit; (e) the Asbestos-Related Disease suffered by each plaintiff in the lawsuit; and (f) the amount of the judgment, if any, rendered against you in the lawsuit.

LAQ never designed, manufactured, distributed or sold any asbestos-containing products. Attached is a list of asbestos-related cases to which LAQ has been a party. LAQ has never had a judgment rendered against it.

2. Identify and produce all Documents and Objects evidencing, referring, or relating in any way to each lawsuit in which you have been a party and in which any other party has alleged one or more causes of action against you arising out of any personal injury or property damage caused by exposure to asbestos fibers and/or dust from Raw Asbestos or from any Asbestos-Containing Product milled, manufactured, and/or distributed by you and/or on your behalf.

See documents produced by LAQ pertaining to prior lawsuits concerning allegations of personal injury arising from exposure to LAQ asbestos fiber at the Capco Ragland plant.

R. Records

1. Identify your custodian of records for all Documents and Objects identified in these discovery requests or in your responses to these discovery requests, together with all Documents and Objects evidencing, referring, or relating in any way thereto.

Carmen D. Gonzalez, Assistant Secretary of Lac d'Amiante du Quebec, Ltee, is LAQ's Custodian of Records. Certain documents which have been received during the course of litigation are in the possession of Porzio, Bromberg & Newman, P.C.

2. Identify each person who has knowledge of the destruction of any Document and/or Object identified in these discovery requests or in your responses to these discovery requests.

LAQ is not aware of the destruction of any documents responsive to these discovery requests.

3. Identify and produce the file structure and forms of reports for each computer system containing information identified in these discovery requests or in your responses to these discovery requests, together with all Documents and Objects evidencing, referring, or relating in any way thereto.

LAQ maintains a database prepared by its counsel for the purposes of litigation of personal injury claims filed against the company using the FOCUS database software. The database tracks each case and its venue, the number of plaintiffs, exposure dates and settlement information. Furthermore, during the period of time that LAQ mined, milled and sold chrysotile asbestos, it utilized certain computer systems in operating its business.

4. State verbatim your record retention rules and/or guidelines in effect at any time.

Since 1975, when it was first sued in an asbestos-related personal injury matter, it has always been LAQ's policy not to destroy records which it believes may be relevant to its potential liability in pending or reasonably anticipated litigation. At this time, LAQ has no knowledge of its pertinent record retention rules and/or guidelines in effect prior to 1975.

5. Identify and produce any written record retention rules and/or guidelines which you have ever had, together with all Documents and Objects evidencing, referring, or relating in any way thereto.

See response to discovery request R4.

6. Identify the custodian of any written record retention rules and/or guidelines which you have ever had.

See responses to discovery requests R4 and R5. Carmen D. Gonzalez, Assistant Secretary of LAQ, is the custodian of LAQ records.

S. Defendant's Market Share

1. State the exact annual dollar volume of sales of Raw Asbestos milled and/or distributed by you and/or on your behalf.

LAQ has incomplete data on the dollar volume of its sales of raw chrysotile asbestos fiber. The dollar volume of sales for the years 1962, 1963, 1964, and 1965 were \$12,602,117, \$11,291,343, \$14,298,083, and \$13,820,972, respectively. LAQ has not mined, milled, sold or distributed raw chrysotile asbestos within the last ten years.

2. State your approximate market share of Raw Asbestos and/or Asbestos-Containing Products.

LAQ never manufactured, sold, or distributed asbestos-containing products and thus has no market share in this industrial market. Moreover, LAQ does not possess industry-wide production or consumption statistics for asbestos fiber. It does, however, possess some information relating to the tonnage of raw chrysotile fiber shipped to North America by members of the QAMA. LAQ appears to have produced approximately 6% of

raw chrysotile fiber shipped to North America by QAMA member companies during the 1960s and 1970s.

3. Identify and produce your annual reports for each year you milled, manufactured, and/or distributed Raw Asbestos and/or Asbestos-Containing Products and/or during which Raw Asbestos and/or Asbestos-Containing Products were milled, manufactured, and/or distributed on your behalf, together with all Documents and Objects evidencing, referring, or relating in any way thereto.

As LAQ was a wholly-owned subsidiary of ASARCO and since LAQ stock has never been publicly traded, it did not produce annual reports.

T. Defendant's Ability to Pay

1. Identify and produce your annual reports for the past thirty years, together with all Documents and Objects evidencing, referring, or relating in any way thereto.

See response to discovery request S3.

2. For each of the past thirty years, described your year-end financial condition, including, without limitation: (a) gross sales; (b) income from operations; (c) current assets; (d) current liabilities; (e) net income; and (f) net worth.

Please see LAQ balance sheets and income statements for the years 1989 through 1995 which will describe LAQ's year-end financial condition including, as applicable, (a) gross sales, (b) income from operations, (c) current assets, (d) current liabilities, (e) net income and (f) net worth.

3. If your fair market value (or that of any of your divisions, subsidiaries, or land holdings) has ever been estimated, for each such valuation describe, without limitation: (a) each asset which was valued; (b) the identify of the person who made the valuation; (c) when the valuation was made; and (d) the value placed on each asset.

The fair market value of LAQ has never been estimated.

4. If you have sold or otherwise transferred any of your material assets (e.g. subsidiaries, manufacturing plants, land, etc.) at any time within the past thirty years, other than in the normal course of business operations, for each such transaction identify and describe, without limitation: (a) the assets sold or otherwise transferred; (b) all parties to the transaction; (c) the purchase price or other consideration; (d) other material terms and conditions of the transaction; and (e) the closing date.

Please see answers to B9, B14 and T5.

At present, there are no credit facilities available to LAQ or its subsidiaries.

11. For each of the last thirty years, identify any off balance sheet transaction, lease, asset, liability, or other factor which would have a material effect on the financial condition reflected on the balance sheets prepared for you or any of your subsidiaries.

There are no off balance sheet transactions, leases, assets, liabilities, or other factors which would have a material effect on the financial condition reflected on the balance sheets prepared for LAQ.

12. For each of the last thirty years, describe for yourself and for each of your subsidiaries the following financial ratios: (a) current ratio; (b) quick ratio; (c) income after taxes to sales; (d) income before interest and taxes to sales; (e) income after taxes to equity; (f) sales to assets; (g) sales to equity; (h) sales to inventory; (i) equity to assets; (j) equity to debt; (k) cost of goods sold to sales; and (l) general and administrative expenses to sales.

See LAQ Balance Sheets and Statements of Income as provided for the years 1989 through 1995.

13. Identify and describe all dividends, corporate allocations, and charges for corporate expenses which you have paid to any parent corporation.

LAQ has not paid any dividends to its parent corporation in the last 16 years. From its inception through 1980, LAQ paid, on average, yearly dividends of Canadian \$1,873,698.

From time to time, LAQ utilized the services of certain ASARCO departments, such as the Insurance Department, as specifically agreed to in advance between the two corporations. LAQ typically paid a monthly fee to ASARCO for these services. All out-of-pocket expenses associated with the purchased services were the responsibility of LAQ and paid for by LAQ. Moreover, LAQ had a quality review function to insure that services were performed pursuant to LAQ's requests.

14. If you contend that you are unable to pay an award of punitive damages because of your financial condition or otherwise, state the facts upon which you base your contention.

LAQ does not contend that it is or will be unable to pay an award of punitive damages because of its financial condition or otherwise.

U. Insurance Coverage

1. Identify and describe each policy of insurance which you maintain should apply as coverage for the injuries alleged by the Plaintiffs, including, without limitation: (a) type of policy;

(b) policy number; (c) policy carrier's name, and street address; (d) whether it is primary or excess coverage; (e) the amount of any deductibles; (f) the policy limits; and (g) each reason you have to believe that the carrier will deny coverage, including exhaustion of aggregate policy coverage.

LAQ does not know when this action will go to trial or when final judgment may be entered. Therefore, it cannot predict with certainty the insurance policy or policies which should apply as coverage for the injuries alleged by the plaintiffs. However, if liability were ever found against LAQ, coverage could come from one or more of the following companies: American Home Assurance Company, Midland Insurance Company (or the State Liquidator for Midland or from various State Guaranty Associations), Columbia Casualty Company, Commercial Union Assurance Company of Canada, First State Insurance Company, Northbrook Insurance Company, various London Underwriters (including Lloyds), California Union Insurance Company, Gibraltar Casualty Company, Highlands Insurance Company, and PSAC. For further information, see policies provided by LAQ in response to discovery request U14.

Certain of these policies are currently the subject of dispute, and in some cases, litigation. As to those policies, LAQ cannot specifically offer an opinion as to the availability of coverage and the limits thereof. To the extent plaintiffs wish to render their own opinions as to the availability of coverage, LAQ directs them to the policies produced herein for analysis. In any event, it is LAQ's current belief that sufficient uncontested insurance exists to cover any likely outcome in this litigation.

2. For each policy of insurance you identified in response to the preceding discovery request, state whether you have any reason to believe that the insurance carrier will deny coverage in this lawsuit, and, if so, explain each reason.

See LAQ's responses to discovery request U1 and U14.

3. Identify and describe each Communication between you and any insurer concerning any asbestos-related claim and/or lawsuit.

LAQ has been involved in asbestos-related litigation for more than 20 years and has communicated with a number of the insurers identified in its response to discovery request U1 concerning coverage for and the defense of such litigation. See LAQ's responses to discovery requests U1 and U14 and attached policies.

4. If you are self-insured with respect to the injuries alleged by the Plaintiffs in this lawsuit, state: (a) whether it is for excess coverage, primary coverage, or a deductible; (b) if by deductible, state the amount of the deductible, the name and street address of the primary and excess carriers, the policy numbers, and the policy limits; (c) if on primary coverage, the amount of self-insurance, the name and street address of the excess carrier, the excess policy number, the excess policy limits, the amount of reserves you have established for asbestos-related injuries, and whether those reserves have been exhausted; and (d) if on the excess coverage, the amount of

primary coverage, the name and street address of the primary carrier, the primary policy number, the primary policy limits, the conditions under which you must begin to pay the excess coverage, and whether those conditions will exist as to the recovery in this lawsuit.

LAQ does not consider itself to be self insured.

5. For each policy of insurance you identified in your response to the preceding discovery request, state whether you have any reason to believe that the insurance carrier will deny coverage in this lawsuit, and, if so, explain each reason.

Not applicable. See response to discovery request U4.

6. List each of your insurers, that you presently believe should provide coverage for this lawsuit, and include the dates of the coverage relative to the exposures claimed by the Plaintiffs in this action.

See LAQ's responses to discovery requests U1 and U14 and attached policies.

7. Describe all insurance policies, whether primary, excess, additional insured, or reinsurance, which you and/or each of your subsidiaries and associated entities now have or have had at any time during the Relevant Period for injury and/or death due to exposure to asbestos-containing dust, specifying (as stated in the insurance policy or other evidential Document of coverage): (a) the insurer; (b) the insured; (c) the policy period (referring to the actual period for which the insurance policy is or was in effect); (d) the policy type (specifying whether primary excess or self-insured); (e) the standard form policy incorporated into the insurance policy, if any; (f) the per occurrence and per accident limits (refer to the limit for any one occurrence or any one accident); (g) the products aggregate (refer to the aggregate limit applicable to products bodily injury liability coverage - certain insurance policies may contain a combined aggregate for bodily injury, property damage, and other covered perils; if so, refer to the combined limit); (h) the products aggregate consumption (the function of the aggregate consumption summary is to track the consumption of total products liability aggregate limits claims); (i) the types and amounts of deductibles and retentions (per occurrence, per claim, reduction of aggregate limits, self-insured retention, loss limit, or other); (j) the policy number; (k) insurer Objections to coverage, if any; (l) the name and address of the insurance agency or broker through whom the insurance coverage was procured; (m) the date upon which the insurance policy limits were paid out or exhausted, if applicable; (n) the annual amounts of carrier indemnity payments, carrier costs for defense attorneys fees, and carrier litigation related expenses (e.g. expert witnesses, depositions, etc.) paid or allocated for each year in which the policy applied; (o) the internal or other costs you incurred or allocated, on an annual basis, in connection with administration or application of the policy, including the costs of any underlying litigation concerning application of the policy; (p) whether or not in your opinion the insurance policy provides coverage for the acts alleged in plaintiffs' complaint or any judgment which may be entered against you in this lawsuit; (q) whether the insurance policy has been the subject of litigation, mediation, or arbitration, and if so, all details concerning the litigation (e.g. court, full caption, date of filing, outcome, counsel for all parties,

etc.); and (r) whether the policy covers indemnity plus costs of defense, ultimate net loss, indemnity only, or other.

See LAQ's responses to discovery requests U1 and U14 and attached policies. Several of these policies are the subject of dispute and/or litigation. Accordingly, this interrogatory cannot be answered more specifically at this time.

8. For each insurance policy identified in response to the preceding discovery request, state whether the insurance policy expressly provides coverage: (a) on a specific manifestation basis; (b) on a claims-made basis; or (c) on a first discovery basis.

See documents produced in response to discovery request U14.

9. For each insurance policy identified in response to the preceding two discovery requests, state whether the insurance policy pays allocated expenses (all fees and expenses incurred for services performed directly attributable to the defense and disposition of a particular asbestos-related claim), and, if so, when allocated expenses are payable (e.g. following exhaustion of aggregate limits).

See documents produced in response to discovery request U14.

10. For each insurance policy identified in response to the preceding discovery request, state whether allocated expenses apply against aggregate limits.

See documents produced in response to discovery request U14.

11. Are you affected by any contract or agreement providing for your indemnification for any claims or judgments for personal liability or property damage? If so, please state: (a) the name and address of the indemnitor; (b) the contract or agreement under which such indemnities are claimed; (c) the nature and terms of the indemnifying agreement.

LAQ is not affected by any such contract or agreement.

12. Is there in existence or has there been in existence, any bond, guarantee, or suretyship in your favor for acts performed by you or for liability, personal injury, or property damage arising from your business operations? If so, state: (a) the name and address of the bonding company, guarantor, or surety; (b) the effective dates of coverage; and (c) the nature and extent of the coverage provided, including limits of liability.

There is not now and there never have been such bonds, guarantees or suretyships in LAQ's favor.

13. For each policy of insurance identified in response to these discovery requests, identify any agreement (oral or written) which you contend modified the insurance policy and identify each person with knowledge and each Document pertaining to such modification.

See documents produced in response to discovery request U14.

14. Identify and produce each written portion of any policy of insurance identified in the preceding eleven discovery requests and/or in response to such discovery requests, together with all Documents and Objects evidencing, referring, or relating in any way thereto.

LAQ is producing herewith the following policies of insurance referenced in its response to discovery request U1:

discovery requests which are written
interrogatories.

STATE OF NEW YORK)
COUNTY OF NEW YORK)

Before me the undersigned authority in and for said County and said State personally appeared Carmen D. Gonzalez, who is known to me, and who by me first being duly sworn, deposes and says that she is the Assistant Secretary of Lac d'Amiante du Quebec, Ltee, a corporation, that she has read the portion of the foregoing responses to Plaintiffs' discovery requests which are answers to written interrogatories, that as such Assistant Secretary she has authority to execute these answers on behalf of the said corporation, and that the said answers are true and correct to the best of her knowledge, information and belief.

Sworn to and subscribed before me this 22nd day of September 1997.

Notary Public

BETH BERNETT
Notary Public, State of New York
No. 31-4862218
Qualified in New York County
