

Piping Problems?

For Fast
Economical
Installation
and Longer
Service Life...

Fast Economical Installation — Ric-wil systems are prefabricated under ideal factory conditions leaving a minimum of work to be done in the field. Ric-wil engineering service provides complete technical data and detailed working drawings — assuring rapid and accurate installation.

Longer Service Life — Ric-wil systems are factory prefabricated on precision machines — all operations are carefully controlled eliminating chances for faulty workmanship to cause service failure.

Whether your problem involves underground or overhead piping — extreme temperatures or corrosive products — if proven insulated piping systems are required... it will pay you to call in your Ric-wil representative as early as possible in your planning.

Refrigeration

DOUBLES PRODUCTION OF RUBBER REACTORS

Synthetic rubber plants all over this country, and in Canada, are finding Frick special coils and controls the answer to the problem of cooling reactors. Vertical pipes flooded with ammonia, inside the reactors, replace sluggish brine jackets with trigger-fast cooling. This exclusive Frick development cuts reactor time in half—an unbelievable achievement!

What is YOUR cooling problem? Whether for process work, research, air conditioning, cold storage, or quick freezing, there's a Frick refrigerating system to suit your needs. Let us submit estimates now on your requirements. Branches and Distributors in principal cities: write, wire, phone or visit.
