Dear Mr. Hauser,

Confirming our recent telephone conversations, we understand the total availability for Port Allegany and Tyler plants, for shipment in October, will be 270 tons D11. We understand that Grade M is available should you need any additional shipments to supplement the shortage of D11.

We also wish to confirm that we believe we can secure tonnage of Grade DX Amosite from Baton Rouge for your Tyler, Texas plant, and from Belle Mead, New Jersey for your Port Allegany plant, at \$182 per ton, loaded rail cars f. o. b. shipping point. Should you wish us to effect shipment of this grade to your plants, please let us know and we will be happy to arrange this for you. We will need a lead time of approximately three weeks prior to shipment.

Sincerely yours,

NORTH AMERICAN ASBESTOS CORPORATION
