Dr. Morton Corn
Professor of Industrial Hygiene Engineering
Graduate School of Public Health
University of Pittsburgh
Pittsburgh, Pennsylvania 15213

Dear Mort:

Subject: Port Allegany Plant - Pittsburgh-Loring Corporation

I have discussed both your letter and Dr. Melding's letter of July 29 with Mr. Earl Stout regarding the engineering design for asbestos dust control and the evaluation and control of environmental heat stress. He is delighted that you and Dr. Melding will be able to visit the Port Allegany Plant on August 26-28, and he will advise them of your visit.

I would recommend that you call Larry Griffith only if you have any special requirements. Otherwise, by a copy of this letter and your letter to me of July 29, Larry will be informed and make necessary hotel reservations, etc. for you and Dr. Melding.

Sincerely,

Lee B. Grant, M.D.
