Mr. C. D. Carter
Director of Far Eastern Sales
Ethyl Corporation
1600 W. Eight Mile Road
Detroit 20, Michigan, U.S.A.

Dear Mr. Carter:

I suggest the following program for getting Governmental approval of TMI in Japan and I hope for your further steps if you agree with me.

1. I shall perform toxicity tests on TMI in my laboratory for presentation to the Dept. of Public Health and Welfare and of Labor. I believe this step to be essential in getting Governmental approval.

2. Dr. Kehoe immediately should furnish the results of his tests in the U.S. for presentation to our government. My tests would supplement those of Dr. Kehoe.

3. I shall inform Dr. H. Koinuma, Member of Labor Committee on Industrial Hygiene, Former Prof. of Hygiene at Nagoya University, Medical School, President of Japan Association of Industrial Health and also Dr. K. Moriuchi, Prof. of Hygiene and Public Health at Osaka City University, Medical School. These gentlemen would corroborate my tests and approach to the government on TMI.

4. Approach Government concerning use of TMI in Japan.

Very truly yours,

K. Akatsuka

K. Akatsuka

K. Akatsuka, M.D., Dr. M. Sc. (Tokyo University)
M. P. H., Dr. P. H. (Harvard)
Prof. of Preventive Medicine & Public Health,
and Director of Tokyo Medical College.
