AGV

Dear Tony:

Thank you, first of all, for the copy of your "Comments on Asbestos", which I have read with very great interest. There seems still to be one or two things to be learned on this subject. Secondly, I am much obliged for your prompt reply to my letter about Mrs. Lee and her granitic difficulties. I am communicating this to her and you will no doubt hear from her before long.

I have just secured and had a photostat copy made of the discussion on Jones' sericite theory which appeared in the February, 1934 Bulletin of the Institution of Mining and Metallurgy, London. I suppose this is already old stuff to you, but in case it is not, I would be glad to lend it to you. David Beyer has it at the moment.

Edwin and I spent a couple of interesting hours with Dr. Gray in Hartford yesterday and came away more than ever impressed with the excellent job he is doing on a minimum of wherewithal.

Sincerely,

A handwritten signature in cursive script, appearing to read "Manfred Bowditch".
